

G92 Series BASOTROL® Automatic Pilot Gas Valve

The G92 Series BASOTROL gas valve combines the automatic pilot valve and automatic main valve functions in one valve. Typical applications include central heating units, unit heaters, commercial clothes dryers and similar applications. Bipolar magnetic operator construction provides dependable operation and long life.

Figure 1: G92 Automatic Gas Valve (Shown with Optional B Valve)

Features and Benefits				
☐ Bipolar Magnetic Operator Construction	Provides dependable operation and long life			
☐ Numerous Magnetic Operator Cover Styles Available	Allows various mounting options and connection choices to best suit your requirements			
☐ Compact Design	Permits installation in dimensionally restricted applications			
☐ Selectable Pilot Tap Positions	Provides application flexibility			

Application

The G92 valves can be used with natural gas, Liquefied Petroleum (LP) gas or LP gas-air mixtures, at pressures up to 0.5 psi (35 mbar). The G92 is suitable for operation over a temperature range of -30 to 175°F (-34 to 79°C). Models with a rotor B valve are suitable for operation over a temperature range of 32 to 175°F (0 to 79°C).

Note: This unit should be used only in applications that are within the limitations and provisions of the applicable American National and/or Underwriters Laboratories® (UL) standards.

Description

The G92 valves are 100% shutoff valves. They are supplied with a standard magnetic operator. Bipolar magnetic operator construction reduces the possibility of the valves' sticking in the open position from residual magnetism or from mechanical interference.

Valve Constructions

The G92 Series is available with $1/2 \times 1/2$ in. or $1/2 \times 3/4$ in. body connections with a 25, 120 or 240 VAC 2-wire magnetic operator. Some models are also available with a 12 VDC or 208/240 VAC operator. Refer to the *Ordering Information* section for more information.

Additionally, the G92 Series is available with other optional configurations.

Pressure Connection

The G92 valve is available with 1/8-27 NPT pressure taps when required. Contact BASO Gas Products for details and ordering.

Magnetic Operator Cover Styles

An aluminum magnetic operator cover with conduit hub and 30 in. (762 mm), 18 AWG stranded lead wires are supplied as standard on all line voltage models. The leads and hub position may be located at the top, over the outlet, on the right side or on the left side of the valve. Lead wires with 1/4 in. (6.35 mm) quick-connect terminals are also available.

The UL listed steel operator cover is available with a top conduit hub only.

A plastic magnetic operator cover with 1/4 in. (6.35 mm) quick-connect male terminals is supplied as standard on all voltage models.

Contact BASO Gas Products for details and ordering of magnetic operator cover style and wiring requirements.

Pilot Gas

External or internal pilot gas flow is available (contact BASO Gas Products).

Rotor B Valve

Figure 5 illustrates a typical installation showing a rotor B valve.

A rotor B valve (for pilot flame) with pilot flow adjuster is available. Various outlet positions are available.

Contact BASO Gas Products for details and ordering.

Pilot Tap Options

Right- or left-hand pilot tap options take advantage of space or access limitations.

Mounting

G92 valves may be mounted on a horizontal manifold with the magnetic operator pointed up (vertical) or in a position not exceeding 90° from vertical. They may also be mounted on a vertical manifold in any position around its axis (see Figure 2).
