

# Packard

Supplying HVACR solutions with your needs in mind.

## 2018-2019

### FULL-LINE CATALOG

**A 100% EMPLOYEE OWNED COMPANY**

**PACKARDONLINE.COM**

# LG COMPRESSORS DROP IN REPLACEMENT FOR OTHER SCROLL BRANDS WITH NO RE-PIPING!

LG Compressors established in 1973

---

Proven reliability in leading HVAC OEMs since 2006

---

Unique features include:

- Service friendly all copper stubs
- IPR valve
- Vacuum prevention device
- Bypass valves for easier starts as well as protection against over compression
- Proprietary oil formulation provides optimum lubrication while resisting coagulation

Scan with smart phone for cross reference

## A Note from Susan Kirkland, President

If I had just two words to describe 2017 it would be PERSEVERANCE and PRIDE. We started 2017 with a wish list as long as my arm. We knew what we wanted to accomplish in 2017 and in many cases, we knew what we needed to do to get there, it was just a matter of perseverance. As we began 2017, the management team at Packard had aggressive goals; to protect our employees in this drastically unstable world, to secure our foundation in this industry and to continue to grow our commitment to our customers. It may have taken us almost all of 2017 to get there, but we persevered, and we succeeded in every goal.

In August after a lot of blood, sweat, tears and tons of support we successfully completed the transition to a 100% Employee Owned company. The purpose of this ESOP is to enable eligible employees to: share in the growth and prosperity of the company; and acquire beneficial stock ownership interests in the company. This evolution allows Packard to stabilize ownership while insisting on a continuity of culture that in many cases simply doesn't exist when companies change hands. Completing this transaction accomplished our first "big-picture" goal for 2017...**protect our employees.**

**Securing our foundation...**this proved to be a much more daunting task if you can believe it. In October, we made our presence known in Kennesaw by relocating our corporate offices across town to a brand-new space almost twice the size at 154,000 sq. feet of warehousing and offices! In no time, a core group of managers organized, prioritized and mobilized our employees AND inventory. We were moved in and set-up without any major breaks in shipping or service. This move will make us a force to be reckoned with as we have paired up our team with a well-known shipping powerhouse to raise our efficiency to the next level.

The coming year will not be without change and excitement either. At present, we have plans to add yet another Distribution Center in the 1st Quarter of 2018 bringing the total to three. This addition will serve our West Coast customers with greater shipping proficiency, in some cases cutting transit time in half. This is just one way in which we **continue to grow our commitment to our customers...** greater availability, countless options, and superior service.

This newest catalog affirms our pledge to expand our selection of products that you and your customers need to help you grow your businesses. We have added well over 1,000 items to this catalog in the hopes that you will have more reason to trust all your HVACR replacement parts to Packard.

As of today, all the enhancements we have made in 2017 have positioned us for the next 10 years. When I take time to think about what we have achieved as a team my heart is full. The PRIDE I have in my team, my Packard family, is overwhelming. I sincerely hope that you sense that pride when you move forward with Packard. We invite you to take this journey with us, but remember the words of Margaret Shepard, American heiress and primary philanthropist of the YMCA, "sometimes your only available transportation is a leap of faith".

*Susan A. Kirkland*

# PACKARD IS NOW 100% EMPLOYEE OWNED

PROUD  
OWNERS OF  
PACKARD!

In 2017, we continued to lead the way by becoming the first master distributor in the HVACR industry to adopt a 100% Employee Stock Ownership Plan. This transfer of ownership will preserve and strengthen our well-known standards, culture and legacy.

# MOTORS

Selection is one of the three fundamental pillars to the Packard mission. We ensure quality replacement motors across a wide range of applications to meet your customer's repair needs.

# EC MAX<sup>®</sup>

**Look no further...**

**The NEW Electronically Commutated Motor is here.**

**See page 54  
for full details.**

**Replaces X13  
and PSC motors.**

## Applications

- Supermarket refrigeration, vending machines and other condenser and evaporator fan applications

## Features

- Drop in replacement for shaded pole and PSC motors
- Electronically commutated motors with integrated electronic control
- ECR up to 70% energy savings; UL recognized
- IP55 moisture and dust protection
- Totally enclosed, ball bearings, CCWSE rotation, can be mounted in any position
- Operating temperature of ECR ONE motors: -22°F to +122°F
- Operating temperature of ECR UltraSynch motors: -22°F to +104°F
- Motors are built using 30% less copper and 80% less steel for a greener, more affordable solution
- ECR UltraSynch motor includes Lyall plug
- ECR ONE is a constant torque motor and will replace a shaded pole motor of matching wattage using the same fan blade
- ECR UltraSynch is a constant speed motor operating at 1800 RPM over a wide range of voltage and load conditions. The correct fan blade must be specified to properly balance air flow.

## ECR ONE Constant Torque Motor

Item ID	Watts	Volts	RPM	Amps	Hertz
<b>Wellington - ECR ONE</b>					
ECR01A0241	9	115	1550	0.23	60

<b>Wellington - ECR UltraSynch™</b>					
ECR92PJA12	9-16	120	1800	0.34	60

## High Efficient Motors - ECM-IP Series

### Features

- Electronically commutated - 115V, 50/60Hz
- Moisture protection: IP65
- Front mount: M4 studs on 3.72" B.C. for shroud/guard
- Drop-in replacement for front mount shaded pole/ECM
- CCW rotation from the shaft end
- All angle mount
- Totally enclosed
- Continuous air over
- Long-life sealed ball bearings

### Features

- 3.3" Diameter
- Brushless High Efficiency up to 75%
- Constant Speed Design

- Straight Lyall Plug
- Rated IP55
- 6 Drilled Holes with Threaded Inserts on Opposite Shaft End

Item ID	Watts	RPM	Volts	Amps	Rotation	Shaft Dimension (In.)	Hertz	Replaces
<b>Packard</b>

## Unitronix Unit Bearing EC Motors

### Features

- Patented EMS electronically commutated motor technology
- Drop in replacements for shaded pole and PSC unit bearing motors
- Utilizes traditional cast iron unit bearing design for proven, trouble free long life
- Up to 70% efficient
- Low heat rise maximizes system efficiency
- Maintains constant speed over a wide range of fan applications
- Special patented water protection package
- 60/50 Hz
- Includes Lyall plug
- Rotation determined viewing lead end
- 13 mounting holes
- UL and cUL recognized

Item ID	Watts	RPM	Volts	Amps	Rotation	Mounting Holes	Replaces

### Applications

- Commercial refrigeration walk in coolers and freezers, air moving applications demanding high efficiency

### Features

- Electronically commutated motor
- Drop in replacements for 3.3" Diameter Shaded Pole & PSC Motors
- Includes Lyall plug
- Unit Bearing
- Standard thru bolt configuration
- Totally enclosed, air over
- Rotation determined viewing the shaft end
- Automatic overload
- Efficiencies up to 3 times higher than shaded pole motors and 40% higher than PSC

## Solid State Commutated Unit Bearing Motors

### Features

- The next generation of ECM unit bearing motor with multi-watt range capability
- Used for commercial refrigeration
- IP65 Certified making it compatible for applications where the use of pressurized water for wash down is a standard procedure
- ATEX Certified allowing its application where flammable refrigerants are used
- 66% Peak Efficiency = 45% higher than a PSC motor
- Ball bearing with low temperature grease
- Operating Temps: -40° C to 55° C ambient
- 5 drilled & tapped mounting holes on rear of the motor

## Solid State Commutated Unit Bearing Motors

### Features

- Direct drop-in replacements
- Ultimate commutated technology
- Unit bearing construction
- 100% performance tested
- Includes Lyall plug
- Rotation is determined by viewing opposite shaft end
- Peak efficiencies in excess of 80% means lower operating temperatures and extended motor life
- Constant 1550 RPM operating speed is identical on either 50 or 60 Hertz
- Constant 1550 RPM regardless of fluctuations in voltage

<b>EBM9538</b>	8	31	115	800-2100	0.46	2	CCWSE	Ball

## EBM Programmer

### Features

- Allows for effortless programming of the two ESM speeds
- Inserts directly into fan's programming port
- Battery operated, no cables required
- Easy to read LCD display

Item ID
<b>ebmpapst</b>
<b>EBM600003</b>

## EBM Unit Cooler Fan Assembly

### Features

- Heatcraft replacement
  - Voltage sensing
  - High efficiency ECM design
  - Plug included
- Two options available:**
- Fixed RPM suitable for use in Heatcraft unit coolers
  - RPM adjustable rotary switch

## Evergreen EM

### Replace 100s of Different OEM X13 ECM Models.

Evergreen EM is Designed to replace direct-drive blower motors in residential and light commercial indoor furnaces, air handlers, and package systems that were designed with a standard EC motor, such as an X13 or equivalent competitor model.

#### Features

- Multi-speed, constant torque, brushless DC motor
- Available in 1/3, 1/2, 3/4 and 1HP ratings
- Automatically determines motor rotation direction
- 5 discrete speeds using 24VAC (3 using 18VDC)
- Operating speed range of 600-1200 rpm
- NEMA 48-frame (5.6 inch diameter) Belly Band Mount with 5-inch long 1/2 inch diameter shaft
- UL recognized component
- Standard ECM replacement (Does not replace premium ECM constant airflow products such as Eon, 3.0, 2.3, and 2.5)
- Maintains ECM-level efficiency up to 80%
- Soft Start and Off Ramp for quiet operation
- Electronic overload protection

## Evergreen IM

### Energy Savings. Quiet Operation Comfort. Indoor Air Quality.

Evergreen IM is a high-efficiency ECM replacement motor that is designed to replace factory PSC blower motors in HVAC systems including fossil fuels, electric heat, A/C, heat pump, dual fuel and geothermal; does not replace variable speed or X13 EC motors.

Evergreen uses up to 25% fewer watts in operating mode and up to 74% fewer Watts than a PSC motor in constant fan.

#### Features

- Two Motors cover most applications
- Multi-volt 115/230VAC, 50/60 Hertz
- Integrated with HVAC system controls/operation
- Four speed selections for heating and cooling
- Optimized constant fan speed
- 1/2 inch diameter flat shaft
- Auto Sensing rotation
- 5.5 inch diameter
- Automatic overload protection
- Ball bearing
- Open enclosure
- Band mounting
- Continuous duty

## Evergreen CM

### ECM Replacement for Commercial VAV Boxes.

Evergreen CM replaces standard 48 frame motors in VAV systems enhancing the ability of energy efficient systems to qualify for government rebate programs. With slow ramp up and ramp down there is less system noise and greater occupant comfort.

#### Features

- Variable speed, constant torque, brushless DC motor
- 277V AC single-phase input, 50/60Hz
- Designed for direct-drive blower replacement applications in commercial building systems
- Standard CCW Rotation (CW Rotation option available)
- 5 discrete speeds using 24VAC (3 using 18VDC); 600-1200 RPM
- Efficiency up to 80%
- Ready for Building Automation System Control interface using a PWM speed controller
- Constant torque with better External Static Pressure Control than standard PSC motors
- Soft Start and Off Ramp for quieter operation

## ARKTIC™ 142 Motor

#### Applications

- Designed primarily for use in the evaporator of commercial refrigeration and walk-in coolers and freezers as well as outdoor condensers can also be used in many applications demanding high efficiency and dependability with output ratings between 1/5 - 1 H.P. including parallel rack fan motors.

#### Features

- Shaft water slinger
- 26 inch cord set attached to motor
- Horizontal - vertical down orientation desired
- Totally enclosed, Non-vented (air-over ECM required)
- Designed for 50 or 60 Hertz operation
- RoHS compliant NEMA 48 Frame electronically commutated motor

### MOTOR EFFICIENCY STATISTICS:

# Drop In Replacements For Commercial Refrigeration Evaporator Fan Motors

### Features

- Energy savings ECM design
- Ball bearings
- 60 Hertz
- Replaces Heatcraft, Bohn, Chandler, Climate Control and Larkin
- 42 Frame
- Class B insulation
- Four mounting studs on each end
- Includes Lyall plug
- Replaces 1/15, 1/20, 1/25 HP PSC and lower efficient shaded pole designs

## 3.3 Inch Diameter Electronically Commutated Motors

### Applications

Commercial refrigeration walk-in coolers and freezers, air-moving applications demanding high efficiency and dependability

### Features

- Commercial refrigeration walk-in coolers and freezers, air-moving applications demanding high efficiency and dependability
- Efficiencies up to three times higher than shaded pole motors and 40% higher than PSC
- Ball bearing with low temperature grease
- Standard thru-bolt configuration
- All angle mount
- Totally enclosed, air over
- Rotation viewed opposite shaft end (OSE)
- Water Slinger
- Automatic overload
- 50/60 Hertz
- Single phase
- Single speed

### Notes:

- 104. Same as 65100 except mounting screws are on the shaft end
- 105. Includes A65100FB impeller
- 106. Assembled with bracket as illustrated
- 108. Has a one shot overload
- 354. Impedance protected
- 464. Same as 65100 except motor only
- 472. Includes stand offs for other Bohn applications
- 474. Used in Bohn commercial evaporators
- 485. Includes two prong plug

## Direct Replacements For General Electric 11 Frame

### Features

- All angle unit bearings
- 60 Hertz
- Automatic overload
- 1.83 inch resilient rings
- Single speed / single phase
- Stud and resilient mounting
- 4 Holes #8-32 UNF-2B on 2.84" bolt circle

#### Notes:

40. Mounting bracket designed to match the original motor (four 8-36 drilled and tapped holes)  
 43. Mounting hardware included

44. Has 22" leads with 1/16" thick insulation  
 46. Three studs opposite shaft end are 8-32 on a standard 2.84" bolt circle, 120° apart

47. Includes 1/2" studs for mounting

### Features

- Shaded pole
- Stud mounting
- 60 Hertz
- Automatic overload
- Single phase
- Rotation is determined by viewing the shaft end; leads are on shaft end
- Bolt circle 2.84"

## Applications

- Supermarket refrigeration, vending machines and other condenser and evaporator fan applications

## Features

- Drop in replacement for shaded pole and PSC motors
- Electronically commutated motors with integrated electronic control
- ECR up to 70%; UL recognized
- IP55 moisture and dust protection
- Totally enclosed, ball bearings, CCWSE rotation, can be mounted in any position
- Operating temperature of ECR ONE motors: -22°F to +122°F
- Operating temperature of ECR UltraSynch motors: -22°F to +104°F
- Motors are built using 30% less copper and 80% less steel for a greener, more affordable solution
- ECR UltraSynch motor includes Lyall plug
- ECR ONE is a constant torque motor and will replace a shaded pole motor of matching wattage using the same fan blade
- ECR UltraSynch is a constant speed motor operating at 1800 RPM over a wide range of voltage and load conditions. The correct fan blade must be specified to properly balance air flow.

## High Efficient Motors - ECM-IP Series

### Features

- Electronically commutated - 115V, 50/60Hz
- Moisture protection: IP65
- Front mount: M4 studs on 3.72" B.C. for shroud / guard
- Drop-in replacement for front mount shaded pole / ECM
- CCW rotation from the shaft end
- All angle mount
- Totally enclosed
- Continuous air over
- Long-life sealed ball bearings

...from universal to OEM direct replacements, your choice of reliable replacement parts is important to us.

## ECM Replacements for Heatcraft

### Features

- 3.3" Diameter
- Brushless High Efficiency up to 75%
- Constant Speed Design
- Straight Lyall Plug
- Rated IP55
- 6 Drilled Holes with Threaded Inserts on Opposite Shaft End

Item ID	Watts	RPM	Volts	Amps	Rotation	Shaft Dimension (In.)	Hertz	Replaces
<b>Packard</b>								
91635	16-35	1625	120-230	0.76 - 0.48	CWSE	5/16 x 2 1/2	60/50	Heatcraft 25317701 Heatcraft 25317801

### Features

- Will replace 6 to 16 watt shaded pole unit bearing motors with clockwise shaft end rotation

Item ID	Watts	RPM	Volts	Amps	Rotation	Shaft Dimension (In.)	Hertz
<b>Packard</b>							
91636	6-16	1550	120-230	0.35 - 0.22	CWSE	1/4 x 1/2 Threaded	60/50

## Unitronix Unit Bearing EM Motors

### Features

- Patented EMS electronically commutated motor technology
- Drop in replacements for shaded pole and PSC unit bearing motors
- Utilizes traditional cast iron unit bearing design for proven, trouble free long life
- Up to 70% efficient
- Low heat rise maximizes system efficiency
- Maintains constant speed over a wide range of fan applications
- Special patented water protection package
- 60/50 Hz
- Includes Lyall plug
- Rotation determined viewing lead end
- 13 mounting holes
- UL and cUL recognized

Item ID	Watts	RPM	Volts	Amps	Rotation	Mounting Holes	Replaces
<b>Electric Motor &amp; Specialties</b>							
15621	6-12	1550	115	0.2 - 0.3	CWLE	5 Rear holes	Hussman, Hill, Kysor/Warren
15624	14-16	1550	115	0.47 - 0.58	CWLE	5 Rear holes	Hussman, Hill, Kysor/Warren

### Applications

- Commercial refrigeration walk in coolers and freezers, air moving applications demanding high efficiency

### Features

- Electronically commutated motor
- Drop in replacements for 3.3" Diameter Shaded Pole & PSC Motors
- Includes Lyall plug
- Unit Bearing
- Standard thru bolt configuration
- Totally enclosed, air over
- Rotation determined viewing the shaft end
- Automatic overload
- Efficiencies up to 3 times higher than shaded pole motors and 40% higher than PSC

## Solid State Commutated Unit Bearing Motors

### Features

- The next generation of ECM unit bearing motor with multi-watt range capability
- Used for commercial refrigeration
- IP65 Certified making it compatible for applications where the use of pressurized water for wash down is a standard procedure
- ATEX Certified allowing its application where flammable refrigerants are used
- 66% Peak Efficiency = 45% higher than a PSC motor
- Ball bearing with low temperature grease
- Operating Temps: -40° C to 55° C ambient
- 5 drilled & tapped mounting holes on rear of the motor

## Solid State Commutated Unit Bearing Motors

### Features

- Direct drop-in replacements
- Ultimate commutated technology
- Unit bearing construction
- 100% performance tested
- Includes Lyall plug
- Rotation is determined by viewing opposite shaft end
- Peak efficiencies in excess of 80% means lower operating temperatures and extended motor life
- Constant 1550 RPM operating speed is identical on either 50 or 60 Hertz
- Constant 1550 RPM regardless of fluctuations in voltage

The engineer's choice

## The new standard in EC unit cooler fans.

The S1G305 is specifically designed for harsh environments.

10-Position  
rotary switch

*Eligible for EC motor upgrade rebates from utility companies for WICF retrofits*

- Wide voltage range
- Rotary switch to set the required RPM
- Reliable and efficient EC technology
- Fully assembled for fast installation in the field

## EBM Energy Saving Motor (ESM) Axial Fan Assembly

### Features

- Can be programmed with Nano programmer
- Program two-speeds between available range
- 50/60 Hertz
- 115 & 230 VAC models available
- Three wiring harness termination options, sold separately

Item ID	Diameter Fan (in.)	Watts	Volts	RPM	Amps	Speeds	Rotation	Bearing
<b>ebmpapst</b>								
EBM9122	7	21	230	1700-2500	0.18	2	CCWSE	Ball
EBM9137	8	31	230	800-2100	0.24	2	CCWSE	Ball
EBM9523	7	22	115	1700-2500	0.3	2	CCWSE	Ball
EBM9538	8	31	115	800-2100	0.46	2	CCWSE	Ball

## EBM Programmer

### Features

- Allows for effortless programming of the two ESM speeds
- Inserts directly into fan's programming port
- Battery operated, no cables required
- Easy to read LCD display

Item ID
<b>ebmpapst</b>
EBM60003

## EBM Unit Cooler Fan Assembly

### Features

- Heatcraft replacement
  - Voltage sensing
  - High efficiency ECM design
  - Plug included
- Two options available:**
- Fixed RPM suitable for use in Heatcraft unit coolers
  - RPM adjustable rotary switch

Item ID	Watts	Volts	RPM	Amps	Speeds	Rotation	Bearings
<b>ebmpapst</b>							
EBM0207	63	100-240	1590	0.55	1	CWSE	Ball

## EBM Harness

### Features

- Interchangeable cord sets for 8 in (200mm) EBM fan basket

Item ID	Connection	Length (in.)
<b>ebmpapst</b>		
EBM10637	3 wire connection without plug	17.7

Item ID	Connection	Length (in.)
<b>ebmpapst</b>		
EBM10901	2 wire connection without plug	17.7

Item ID	Connection	Length (in.)
<b>ebmpapst</b>		
EBM10847	Two Pin Right Angle Lyall Plug	17.7

Item ID	Connection	Length (in.)
<b>ebmpapst</b>		
EBM10910	Three Pin Straight Lyall Plug	11

## Square Frame Condenser Fan Motors

### Applications

- Industrial and commercial refrigeration fans for condensing, ventilating and evaporator units, walk-in and reach-in coolers, freezers, food and beverage chillers.

### Features

- All angle self-aligning sleeve bearings
- Totally Enclosed
- Continuous air over
- Class B insulation
- Standard operating temperatures: -40° F to + 104° F (-40° C to +40° C)
- UL recognized
- Rear mount: 6 tapped holes #8-36 thread
- Foot mount: 4 holes, #8-36 thread

## Bracket Adapter Kit

### Features

- This kit allows mounting "American style" ELCO motors (NU Series) on "European style" U-type or V-type brackets
- See page 411 for bracket offering

Item ID	Contains
ELCO	
EUBKT01	Plastic Bracket M4x16 Screw (4 pcs.) Serrated M4 Hex nut (6 pcs.)

## Packard 3.3 Inch Diameter Motors - Open Enclosure

### Features

- Shaded pole
- Automatic overload
- Open enclosure
- 60 Hertz
- Single phase
- Rotation is determined by viewing the shaft end

## MultiFit® Condenser Fan Motors

### Features

Replaces hundreds of 1/4 - 1/12 horsepower applications

- All angle mount
- Class B insulation
- Reversing plug
- Totally enclosed
- 36 inch leads
- 60°C ambient
- Single speed
- Multi-mounting system
- Double sealed ball bearings
- Energy efficient PSC design
- One simple connection eliminates the need to select various horsepower or change capacitor sizes

## 5 Inch Diameter Unit Heater Motors

### Features

- U6520 and U6521 have capacitor mounted on motors
- Permanent split capacitor and shaded pole
- Automatic overload
- Sleeve bearings
- Totally enclosed
- Reznor replacements
- 60 Hertz
- Single phase

## 5 5/8 Inch Diameter Unit Heater Motors

### Features

- Permanent split capacitor
- Continuous duty air over
- Ball bearing
- Class B insulation
- Single phase
- Includes capacitor mounted on motor
- Horizontal or vertical mounting
- Dual bolt circle applications, 30-60 degree and 45 degree
- Automatic overload
- UL recognized
- Mounting clamps included

### Replaces

## Fasco 5 Inch Diameter Direct Drive Blower Motors

### Features

- Shaded pole or permanent split capacitor
- Single phase
- Automatic overload
- 60 Hertz

Item ID	H.P.	Volts	RPM	Amps	Speeds	Rotation	Shaft Dim. (In.)	Length Less Shaft (In.)	ENCL.	Bearings	Mounting

### Notes:

- 9. No mounting rings
- 19. Drilled and tapped for Coleman mounting
- 20. For International Oil Burner Co.

## TechTip >>>

from Packard Academy

**RICK'S TIP**  
Rick Streacker  
National Training Coordinator

When installed properly a direct drive, air over induction motor should not exceed 10% over nameplate amps or 25% below.

## 42 Frame Direct Drive Blower Motors

### Features

- 42 Frame
- 60 Hertz
- Open enclosure
- Single phase
- Automatic overload

## Electronically Commutated Direct Drive Motors

### Features

- High Efficiency ECM: Up to 80% Efficient
- Replaces either PSC or X13 model of equivalent HP
- Dual Voltage Design: Replace 115 or 230V with one motor
  - 4 motors replaces 8 motors
- Wiring harness and simple installation guide included
- Rotation Sensing Technology
  - Automatically selects rotation upon first start up
- 45" wiring harness

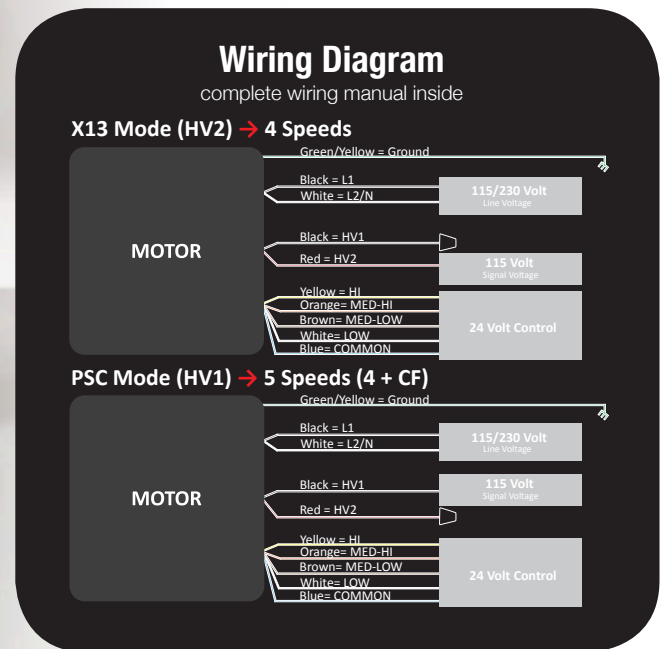

Item ID	H.P.	Volts	RPM	Amps	Hertz	Shaft Dimension (in.)	Length Less Shaft (in.)	Motor Type	Chord Length
<b>EC Max</b>

**I OWN  
PACKARD!**

**DION ROHRER**  
Product Development Manager

*I'm proud to be a Packard employee owner...*

“ because our corporate philosophy coincides with my personal philosophy of how business should be conducted. ”

What **if**...

you always had the right  
replacement motor on hand?

Century® HVAC motors are designed for universal compatibility, to maximize same-day repairs with minimal inventory.

Century HVAC motors can replace thousands of different motors making them the Serviceman's Best Friend™.

### WHAT IS THE VALUE OF HAVING THE PART YOU NEED ON THE TRUCK?

- Reduce unnecessary trips to the distributor and long drive times to get a replacement
- Eliminate temporary motor substitutions
- Get the job done the same day with the right part
- Reduce truck stocking costs
- Get more jobs done in the same day

## Permanent Split Capacitor Condenser Fan Motors

### Features

- Permanent split capacitor
- Single speed
- Reversible rotation
- Totally enclosed
- Automatic overload
- 48 Frame
- 60 Hertz
- Single phase
- Rheem Mounting

**!** Bracket available for Trane applications See page 408

### Notes:

126. 4 drilled and tapped holes in shell for Rheem applications  
 135. All angle mount bearings  
 138. All angle mount bearings. Use rain shield when necessary

145. Special wiring configuration. Cannot be used with SPDT switching.  
 146. Keyed Shaft  
 189. Reversing plug  
 208. 60°C ambient

246. No hubs on either end  
 422. 1/2" hub on shaft end frame with slinger. Grommet on lead exits.  
 517. Electrically reversible

## 5 5/8 Inch Diameter Multi-Horsepower Condenser Fan Motors

### Features

Replaces Rheem and Hundreds of Other Condenser Motors!

- Permanent split capacitor
- Single speed
- Ball bearings
- UL recognized
- Totally enclosed
- Electrically reversible
- Mounts by belly band, thru bolts or Rheem mounting holes with screws
- Single phase
- All angle mounting
- 48 Frame
- Automatic overload
- 60 Hertz

## Genteq Condenser Fan Motors

### Applications

- Designed for condenser fan and heat pump units requiring vertical shaft up or vertical shaft down positioning with “belly band” or extended clamp screw mounting.

### Features

- Permanent split capacitor
- Standard efficiency designs
- Sleeve or ball bearings
- Designed for 370 Volt capacitor, not included
- Mounting holes in shell for capacitor bracket
- Water slinger on shaft
- 26 inch motor leads
- Single phase
- 48 Frame

## TechTip >>>>

from Packard Academy

When replacing a condenser fan motor, it is always a good idea to check the fan blade. If a fan blade replacement is needed, make sure your technicians supply you with the maximum horsepower to help find the right replacement.

See our line of Revcor fan blades starting on page 371.

## HeatMaster® Condenser Fan Motor

### Features

- 70°C (158°F) max ambient
- UL recognized Class F insulation
- High-temperature UL recognized overload protector
- Energy-efficient PSC design
- All-angle mount
- Mounts by belly band, adjustable extended thru-bolts, or Rheem mounting holes, with screws supplied
- Lead length 26 to 48 inch
- Water-resistant reversing plug
- Double sealed ball bearing, or dependable all-angle sleeve bearings
- 60 Hertz
- 48 Frame
- Class F insulation
- Totally enclosed
- Single speed
- Continuous duty, air over
- UL recognized

## PSC, Air Over, 48 Frame, Thru-Bolt, All-Angle

### Application

Direct drive condenser fans for all angle mounting. These motors need to be mounted within the airflow of the fan for proper cooling.

### Features

- Frame and end brackets enclosed
- Single and multi-speed models, as noted
- Ball bearings (except as noted)
- Weather resistant reversing plug
- 30" long leads
- Shaft slinger
- 1-1/2" thru-boltson shaft end, 1" thru-boltson lead end (except as noted)
- Automatic reset thermal protector
- Weep holes with removable plugs on end brackets. Remove bottom plug after installation.
- Lug mount kits and other accessories available
- Reversible rotation
- 60°C ambient, as noted
- UL recognized and CSA certified
- Capacitor not included

 94. 1/2" thru-bolts, shaft end

## MasterFit® Pro Outdoor Condenser Fan Motors

### Features

- All purpose, multi-rating
- Permanent split capacitor
- Extended thru bolts
- Rheem mounting holes in shells
- 4 end frame mounting holes for Trane
- Class F insulation
- Energy efficient
- Ball bearing
- Reversible
- Totally enclosed
- 60 Hertz
- 70°C ambient
- 2 Speed

## TechTip >>>>

from Packard Academy

When installing a condenser fan motor, allow a “drip loop” in the leads to prevent moisture from migrating along the leads into the motor.

Rick Streacker  
National Training Coordinator

## genteq Life-Line Multi-Horsepower Motors

### Applications

- Designed for condenser fan and heat pump units requiring vertical shaft up or vertical shaft down positioning with “belly band” or extended clamp screw mounting.

### Features

- Ball bearings
- Water slinger on shaft
- Class B insulation
- Single phase
- Automatic overload
- Permanent split capacitor
- Designed for 370 Volt capacitor, not included
- Different capacitor/speed combinations to fit various HP applications
- Holes in motor shell for mounting brackets
- Extended clampbolts or studs for mounting

Item ID	H.P.	Volts	RPM	Amps	Speeds	Rotation	Type	Bearings	Base
<b>genteq</b>									
3465	1/3-1/6	208-230	1075	2.60	2	Reversible	PSC	Ball	NB

3468	1/2-1/5	208-230	1075	3.00	2	Reversible	PSC	Ball	NB

### Applications

- Designed for continuous air over applications, such as direct drive residential, commercial and industrial air conditioners, fan and blowers.

### Features

- Permanent split capacitor
- Ball and sleeve bearings
- Class B insulation
- Single phase
- Automatic overload
- Different capacitor/speed combinations to fit various HP applications
- Holes in motor shell for mounting brackets
- Mounts and accessories can be found on pages 408-422

	3/4	20/370	All Speeds	4.20
	1/2	10/370	All Speeds	3.80
	1/3	10/370	Med-Hi or Med-Lo:Lo	2.30

\* Using a 7.5 MFD/370V capacitor will result in approximately 10% stronger motor.

## 4-in-1® Fan Motors (Economy Models) - 60°C Ambient

### Features

- Class B insulation
- Energy-efficient PSC design
- Reversing connectors
- Durable ball bearings or dependable all-angle sleeve bearings
- Mounts by belly band, adjustable extended thru-bolts or Rheem mounting holes with supplied screws
- All-angle mount
- Lead length 36 inch to 48 inch
- Single speed
- Totally enclosed
- Continuous duty, air over
- UL recognized
- 48 Frame
- 60 Hertz
- 60°C ambient

## 4-in-1® HeatMaster® Fan Motors (Deluxe Models) - 70°C Ambient

### Features

- Energy-efficient PSC design
- Reversing connectors
- Water-resistant reversing plug
- Double sealed ball bearings or dependable all-angle sleeve bearings
- Mounts by belly band, adjustable extended thru-bolts or Rheem mounting holes with supplied screws
- All-angle mount
- Lead length 36 inch to 48 inch
- Single speed
- Totally enclosed
- Continuous duty, air over
- UL recognized
- 48 Frame
- Class F insulation
- 60 Hertz
- 70°C ambient
- High-temperature UL approved overload protector

## 4-in-1® HeatMaster® Ultra Multi-horsepower Replacement Motors- 80°C Ambient

### Features

- 80°C (176°F) max ambient
- Double sealed ball bearings with high temperature synthetic grease
- Energy-efficient PSC design
- Mounts by belly band, adjustable extended thru-bolts, or Rheem/Trane mounting holes, with screws supplied
- Works with Johnson Controls Speed controls
- Reversible rotation

# MOTORS | MARATHON CONDENSER FAN/HEAT PUMP

## PSC, Open Air Over, Thru-Bolt, Shaft Up or Horizontal

### Application

Direct drive condenser fans mounted vertically, shaft up. Models with open brackets should be mounted where they are shielded from rain. These motors need to be mounted within the airflow of the fan for proper cooling.

### Features

- Frame and shaft end bracket enclosed, except X011 and X012 have open frames
- Single and multi-speed models as noted
- Ball bearings
- Weather resistant reversing plug
- 30" long leads
- Shaft with flat, unless otherwise noted
- Shaft slinger
- 1-5/8" Extended thru-bolts on shaft end, except where noted
- Automatic reset thermal protector
- Lug mount kits and other accessories available
- UL recognized and CSA certified
- Capacitor not included

Item ID	HP	RPM	Volts	Frame	Model No.	Cap. Required	F.L. Amps	Weight (lbs.)	Frame Length (in.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes

## PSC, Open Air Over, Thru-Bolt Mount, Shaft Down

### Application

Direct drive condenser fans mounted vertically, shaft down. These motors need to be mounted within the airflow of the fan for proper cooling.

### Features

- Frame and opposite shaft end bracket are enclosed for vertical shaft down mounting
- Weather resistant reversing plug
- 30" Long leads
- Shaft slinger
- 1-1/4" Extended thru-bolts on shaft end, except where noted
- Automatic reset thermal protector
- Ball bearings
- UL recognized and CSA certified
- Capacitor not included

# MOTORS | MARATHON CONDENSER FAN/HEAT PUMP

## Single Phase, PSC, 56 Frame, Resilient Ring, Thru-Bolt, Open Air Over, Shaft Up

### Application

Direct drive condenser fans mounted vertically, shaft up or horizontal. These motors need to be mounted within the airflow of the fan for proper cooling.

### Features

- Enclosed shaft end bracket with vented frame
- Ball bearings
- 30" long leads
- Shaft slinger
- 60°C ambient, as noted
- Automatic reset thermal protector
- Flat & keyway on shaft
- Reversible rotation
- UL recognized and CSA certified
- Capacitor not included

Item ID	HP	RPM	Volts	Frame	Model No.	Cap. Required	F.L. Amps	Weight (lbs.)	Frame Length (in.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes
<b>Marathon</b>

## PSC, Open Air Over, Resilient Ring & Thru-Bolt Mount

### Features

- Open end bracket
- Ball bearings
- Automatic reset thermal protector
- BX connector included in frame (except Marathon # X262)
- Reversible rotation
- UL recognized and CSA certified
- Capacitor included (except Marathon # X262)

### Notes:

- 1. Capacitor Start/Capacitor Run design for reduced amperage
- 15. Fixed CW Rotation, viewing opposite shaft (or lead end) of motor
- 34. 1" thru-bolts, shaft end
- 37. 1-1/2" thru-bolts, shaft end

- 45. 60° C ambient
- 67. Capacitor not included, 5 MFD/370V Required
- 69. 50° C ambient
- 82. Welded Rigid Base

## 5 5/8 Inch Diameter Direct Drive Blower Motors

### Features

- Permanent split capacitor
- Continuous air over
- 2 1/2 inch mounting rings
- Class B insulation
- 40°C ambient
- Electrically reversible
- Open enclosure
- Automatic overload
- 48 Frame
- 60 Hertz
- Single phase

Detailed wiring diagram shown for ease of installation

Capacitor leads equipped with quick connect terminals

Compatible with a three-wire or four-wire installation

## 5 5/8 Inch Diameter Multi-Horsepower Direct Drive Blower Motors

### Features

- Permanent split capacitor
- Multiple capacitor/speed combinations
- Continuous duty, air over
- Mounting rings, thru bolts and holes in shell
- Class B insulation
- Reversible rotation
- Automatic overload
- 48 Frame
- 60 Hertz
- Single phase
- 5 Speed

## Direct Drive, PSC, Open Air Over, Torsion Flex Mount

### Application

Residential and commercial furnaces, air conditioners, exhaust fans, and other air handling equipment installed in clean and dry environments.

### Features

- Open frames and brackets
- Three lug mount fits 9" or 10" bolt circle. Mounting holes on lugs are .435" dia., with gromets and sleeves for .26" dia. option.
- Multi-speed capacity
- Weather resistant reversing plug
- 30" long leads
- Automatic reset thermal protector
- Ball bearings
- UL recognized and CSA certified
- Capacitor not included

## Direct Drive, PSC, Open Air Over, Resilient Ring, Thru-Bolt Mount

### Features

- Open frames and brackets (except X011 and X012 have enclosed shaft end bracket)
- Single and multi-speed models as noted
- Grommeted lead exit
- Weather resistant reversing plug
- 2-1/4" resilient ring mounting except where noted (base not included)
- 2 1/2" adapter rings supplied, shipped loose in box
- Extended thru-bolts on shaft end
- 30" long leads
- Automatic reset thermal protector
- Ball bearings
- UL recognized and CSA certified
- Capacitor not included

### Notes:

30. Resilient ring mount, base not included  
 31. 5/8" thru-bolts, shaft end  
 32. 3/4" Thru bolts, shaft end

34. 1" thru-bolts, shaft end  
 39. No thru-bolts, shaft end  
 42. 3/4" thru-bolts, opposite shaft end

43. 2-1/2" Resilient Rings included  
 44. 1" Thru-bolts, opposite shaft end  
 51. Does not include resilient rings  
 73. No hubs

## Two And Three Speed Direct Drive Blower Motors

### Applications

- Designed for continuous air over applications, such as furnace blowers or central air handling units with single shaft requirements.

### Features

- Reversible rotation
- Automatic overload
- Single phase
- 5 1/2 inch diameter
- Permanent split capacitor
- Standard efficiency designs
- 4 inch shaft extension
- Extended thru bolts on shaft end with a mounting ring kit provided
- Ring kit allows both 2 1/4 inch and 2 1/2 inch resilient ring mounting
- Mounting holes in shell for capacitor bracket
- Designed for 370 volt capacitor, not included (See Electrical Section).

## 460 Volt Two Speed Direct Drive Blower Motors

### Applications

- Designed for continuous air over applications, such as high voltage fan and blower systems.

### Features

- Energy saver designs
- Ball bearings
- Extended thru bolts
- Designed for 50Hz or 60Hz operation
- Single phase
- 5 1/2 inch diameter
- Open enclosure
- Single shaft
- Automatic overload

## Direct Drive, PSC, Open Air Over, Resilient Ring

### Application

Single speed PSC motors designed to replace PSC and Shaded pole motors, used in direct drive furnace, air conditioners, and others blowers.

### Features

- Open frame and brackets
- Heavy gauge steel frame and base
- Shaft with flat side
- Reversible rotation
- 70°C ambient
- 37" Leads
- Thermal overload protection
- 1/4" terminals on the capacitor leads
- 2 1/4" resilient rings, includes 2 1/2" expanders
- Capacitor not included

## Direct Drive, PSC, Open Air Over, Extended Thru-Bolt, 460 Volt

### Application

Residential and commercial furnaces, air conditioners, exhaust fans, and other air handling equipment installed in clean and dry environments.

### Features

- Enclosed frame and open end brackets
- Multi-speed capability
- Grommeted lead exit
- Weather resistant reversing plug
- Automatic reset thermal protector
- 7/8" extended thru-bolts on shaft end
- Ball bearings
- UL recognized and CSA certified
- Capacitor not included

**Notes:**  
51. Does not include resilient rings

For additional product information visit [packardonline.com](http://packardonline.com).

## PSC, TEAO, Resilient Base

### Application

Replacement motors for unit heaters. Air over motors need to be mounted within the airstream for proper cooling.

### Features

- Totally enclosed
- Direct drive, air over
- Ball bearings
- Horizontal or vertical mount
- Weather resistant reversing plug
- BX connector mounted in frame
- 1" Extended thru-bolts
- 48Y frame has non-standard BA dimension
- Automatic reset thermal protection
- UL recognized and CSA certified
- Capacitor included

## TechTip >>>>

from Packard Academy

### RICK'S TIP

Rick Streacker  
National Training Coordinator

One of the major reasons for the failure of unit heater motors is dust and dirt that accumulates on the motor winding. This will prevent proper cooling of the motor. The resultant additional heat will break down the winding insulation, shortening the life of the motor. This dust and dirt can also penetrate the motor through the shaft, wicking the oil out of some sleeve bearing motors causing premature failure. Even though the original motor might be an open air over motor, a replacement motor that is totally enclosed air over might be the best choice in that extended motor life might result. The totally enclosed motor design will help protect from dust and dirt getting on the winding.

## Direct Drive, PSC, Open Air Over, Belly Band Thru-Bolt, Double Shaft

### Application

Continuous air over applications, such as room air conditioners, fan coil units, and other air moving applications.

### Features

- Open frame and brackets
- Multi-speed capability
- Automatic reset thermal protector
- 30" leads
- CCW rotation, fixed lead end
- 1" extended thru-bolts both ends
- 20" overall length
- Length adapter kits included where noted
- Ball bearings
- UL recognized and CSA certified
- Capacitor not included

## Three Phase, Open Air Over, Rigid Base, Shaft Up or Horizontal

### Application

Commercial condenser fans may be installed outdoors. These motors need to be mounted within the airflow of the fan for proper cooling. Used on Trane, Carrier, Climtrol and York units, 5 tons and larger.

### Features

- 70°C ambient (except as noted)
- Enclosed shaft end bracket, vented frame
- Continuous duty, air over
- Automatic reset thermal protector
- Shaft slinger
- Threaded lead exit
- Nameplated 60/50 hertz 190/380 Volts, at next lower HP
- Double sealed Ball bearings
- Flat and keyway on shaft
- Patented VCD™ - Voltage Change Device (as noted)
- Ball bearings
- UL recognized and CSA certified

## Three Phase, Open Air Over, Shaft Up & Horizontal Rigid Base Mount

### Application

Replacement motor for refrigeration equipment.

### Features

- 70°C ambient
- Enclosed shaft end bracket, vented frame
- Continuous duty
- Automatic reset thermal protector
- Shaft slinger
- Threaded lead exit
- Nameplated 60/50 hertz 190/380 Volts, at next lower HP
- Double sealed Ball bearings
- Flat and keyway on shaft
- Patented VCD, Voltage Change Device
- Ball bearings
- UL recognized and CSA certified

### Notes:

5. 56H, 143T, and 145T Combination Base with 12 mounting holes  
45. 60° C ambient

50. Designed for 50 Hz operation  
VC - Voltage Change Device feature for quick voltage changes

## JuggerNaut® Three Phase Inverter Duty Condenser Fan Motors

Removable 56H Base 70°C (158°F) Max Ambient

### Features

- Inverter duty
- 70°C (158°F) max ambient
- Class F moisture resistant insulation
- Automatic overload protector
- Large water slinger
- Double sealed ball bearings
- Lugs for belly-band mounting
- Shaft up mounting
- Quick connect design
- Energy-efficient three phase design
- Conductive bearing grease for inverter applications
- 50/60 Hertz
- Three phase
- Energy-efficient three phase design

**Note:** It is the responsibility of the installer to properly adjust the drive to the motor for the specific application. The correct volts/Hz settings are application specific and unique to each motor. Failure to perform proper set up can lead to substandard performance and/or premature failure of the system components. All other replacements are not inverter duty.

Rigid 56H Base 70°C (158°F) Max Ambient

### Features

- Inverter duty
- 70°C (158°F) max ambient
- Class F moisture resistant insulation
- Automatic overload protector
- Large water slinger
- Double sealed ball bearings
- Shaft up mounting
- Quick connect design
- Energy-efficient three phase design
- Conductive bearing grease for inverter applications
- 50/60 Hertz
- Three phase
- Energy-efficient three phase design

Item ID	H.P.	Volts	RPM	Amps	Shaft Dimension (In.)	Length Less Shaft (In.)
<b>Century</b>						
H1050RB	1	460/208-230	1140	2.20/4.40-4.00	5/8 x 6	10.3
H1051RB	1 1/2	460/208-230	1140	2.90/5.80-5.80	5/8 x 6	11.3
H1052RB	2	460/208-230	1140	3.70/7.40-7.00	5/8 x 6	12.3
H1053RB	1	460/208-230	850	2.60/5.20-5.00	5/8 x 6	12.3
H1054RB	1 1/2	460/208-230	850	3.60/6.70-7.20	5/8 x 6	12.3

**Note:** It is the responsibility of the installer to properly adjust the drive to the motor for the specific application. The correct volts/Hz settings are application specific and unique to each motor. Failure to perform proper set up can lead to substandard performance and/or premature failure of the system components. All other replacements are not inverter duty.

## HeatMaster® Fan Canopy

### Features

- 70°C (158°F) max ambient
- UL recognized Class F insulation
- Energy-efficient PSC and three phase designs
- Patented fan canopy
- Vertical shaft up only
- Double sealed ball bearing
- Open, air over
- Reversible
- 60 Hertz
- Totally enclosed
- Single speed
- 48 Frame
- UL recognized

## Commercial, PSC, Open Air Over, Belly Band, Shaft Up

### Application

Heavy duty design for commercial direct drive condenser fans mounted vertically, shaft up. These motors need to be mounted within the airflow of the fan for proper cooling.

### Features

- Open frame and end brackets
- Shaft with flat, unless otherwise noted
- Unique Rain Shield fits over shaft to protect motor in vertical shaft up position
- Shaft slinger
- Automatic reset thermal protector
- 60°C ambient (as noted)
- Reversible rotation
- Ball bearings
- UL recognized and CSA certified
- Capacitor not included

## PSC, Resilient Base, Shaft Up or Horizontal

### Application

Condenser fans, installed outdoors. These motors need to be mounted within the airflow of the fan for proper cooling.

### Features

- Frame and shaft end bracket enclosed
- Automatic reset thermal protector
- Ball bearings
- UL recognized and CSA certified
- Reversible rotation
- Capacitor included

Item ID	HP	RPM	Volts	Frame	Model No.	F.L. Amps	Weight (lbs.)	Frame Length (in.)	Shaft Dim. (in.)	Length Less Shaft (in.)

## Three Phase, Open Air Over, Belly Band/Resilient Ring

### Application

Commercial condenser fans may be installed outdoors. These motors need to be mounted within the airflow of the fan for proper cooling. Used on Trane, Carrier, Climatrol and York units, 5 tons and larger.

### Features

- 70°C ambient (except as noted)
- Enclosed shaft end bracket, vented frame
- Automatic reset thermal protector
- Nameplate 60/50 hertz 190/380 Volts, at next lower HP (except as noted)
- Double sealed Ball bearings
- 5/8" Dia. x 5" long shaft with flat and keyway
- Threaded lead exit
- Patented VCD™ - Voltage Change Device
- 4 Locating screws 90 degrees apart, 3.33" from outer edge of shaft slinger
- Hubs on both ends will accept resilient base kits, see Accessories section (except X524 - horizontal only)
- UL recognized and CSA certified
- External shaft slinger on all, internal slinger on 5K models

## TechTip >>>>

from Packard Academy

It is not uncommon to see commercial condenser fan motors in which the frame is open to some degree. When mounted in the condensing unit if the top side of the motor is open a rainshield may be attached to prevent rain from entering the motor. Some rainshields may be identified as fan canopies. This indicates that not only will the canopy shield against rain but that it also is designed with blades that actually act as a fan when the motor is operating, providing additional air for cooling the motor.

### DION'S TIP

Product Development Manager

## Evaporative Cooler Motors

### Applications

- Belt driven evaporative coolers

### Features

- Brass current carrying terminal board parts
- Class B insulation
- Continuous oil filtration
- Electro-zinc plated governor parts, dust caps, terminal board cover
- Heavy magnet wire insulation
- High viscosity encapsulating varnish
- Moisture resistance terminal board
- No ventilation openings in the top portion of the frame
- 7 1/2" ring to ring dimension (Split Phase)
- 60 Hertz
- Automatic overload
- NEMA 56Z Frame
- 1.0 Service Factor

## 48/56 Frame, Split Phase Belt Drive Fan And Blower Motors

### Applications

- Centrifugal pumps, belt drive furnace blowers, fans

### Features

- 40°C ambient
- Continuous duty
- 5/8 inch shaft adapter and key included
- Resilient base has 48 and 56 Frame mounting holes
- Full service factor ratings
- Class B insulation
- Electrically reversible
- Open drip proof enclosure
- 5 5/8 inch diameter
- Split phase
- Automatic overload
- 60 Hertz
- Single speed

### Notes:

- 8. Shaft extension 1-7/8" long by 1/2" diameter
- 9. Shaft extension 2-1/4" long by 1/2" diameter
- 19. 1.25 Service Factor
- 20. 1.35 Service Factor
- 26. 5/8" shaft adapter included
- 28. Steel Endshields
- 31. 5/8" thru-bolts, shaft end

- 32. 3/4" Thru bolts, shaft end
- 47. Connected for CCW rotation (U.S. standard) facing opposite shaft end. Reversible by reconnection of leads
- 52. 1/2" x 1-7/8" Shaft with 1-5/8" Flat
- 53. 1/2" Shaft with 5/8" adapter and Key
- 54. 30 minute duty cycle, not rated for continuous duty
- CF - Consult Factory for Accessory Kit and/or Modification Selection

The most reliable and efficient residential and commercial motors supplied by Packard.

## Permanent Split Capacitor Oil Burner Motor

### Features

- Direct replacement for Beckett 21805U as well as a suitable replacement for many other oil burner motors
- Easy installation with new flange style
- 18 1/2 Inch lead sets
- Continuous duty
- Automatic thermal protection
- 60 Hertz
- Class F insulation
- 40°C Ambient
- UL recognized
- Open shaft end bracket
- Totally enclosed
- Ball bearing

### Replaces

- Beckett 21805U
- Emerson 3083
- Emerson 3248
- Emerson 3274
- GE 4777
- Marathon 0700
- Nordyne 621945
- Rotom R21805U

## Split Phase and Capacitor Start, NEMA 48M and 48N Flange Mount

### Application

Direct replacement motors for residential and commercial oil burners and hot water pressure/steam cleaners.

### Features

- Ball bearings (except as noted)
- Semi- or totally enclosed steel frame
- 20" Long leads from a 1/2" NPT opening (totally enclosed footnoted with N)
- Split phase and capacitor start designs
- Reversible rotation
- Two-bolt, NEMA N- or M-Flange direct
- Catalog numbers 0010 and 0011 have drip proof enclosures
- 1.0 Service Factor

## PSC, NEMA 48M Flange Mount

### Application

Replacement motors for mini pumps in residential or light commercial furnaces.

### Features

- High efficiency design
- 14" cord for easy connection
- Ultra quiet performance
- UL recognized and CSA certified

N - Totally Enclosed, Non-Ventilated

CF - Consult Factory for Accessory Kit and/or Modification Selection

## Split Phase, Drip Proof, Resilient Ring

### Application

Direct replacements for Taco hot water circulators.

### Features

- Quiet sleeve bearing construction
- 48Y frame with 1/2" diameter shaft, 1" long without flat
- 1.40 Service Factor (except as noted)
- Fixed CCW rotation, viewed opposite shaft end
- UL recognized and CSA certified

## Hot Water Circulator Pump Motors

### Features

- Replacement motors for use on hot water circulator pumps by Bell and Gossett, Armstrong, Taco and others
- Sleeve and ball bearings
- Cushion rings and base included
- For use with adjustable base
- Special red paint
- Open drip proof
- Automatic overload
- 60 Hertz
- Single phase
- Capacitor included

## Square Flange Pool Pump Motors

### Features

- Used on many Sta-Rite, Red Jacket, Pac Fab, American Products and Sears jet and pool pumps
- High and low service factors
- Open drip proof enclosure
- Sealed ball bearings
- CCW pump end rotation
- 303 Stainless steel threaded shaft
- 50°C ambient
- Square flange mounting
- Capacitor start
- 3450 RPM
- Automatic overload
- 60 Hertz
- Single speed
- Single phase

### Notes:

199. Energy efficient capacitor start, capacitor run Conservationist motor

## NEMA C Face Pool Pump Motors

Total output (HP x service factor) of replacement motor must equal or exceed motor being replaced

### Features

- Sealed ball bearings
- Sealed switch design
- 50°C ambient
- 3450 RPM
- Not reversible
- Capacitor start and capacitor start-capacitor run
- NEMA "56C" face mount
- 303 Stainless shaft (56J (threaded shaft) and 56C (keyed shaft))
- 304 Ball bearing on shaft end
- High service factor (full rated)
- Standard efficiency and high efficiency design (conservationist)
- Open drip proof enclosure
- Automatic overload
- CCWPE rotation
- "1081" Design
- 60 Hertz
- Single speed
- Single phase

## Split Phase and Capacitor Start, Drip Proof, NEMA 56C, C-Face Footless

### Features

- Ball bearings
- Manual or automatic reset thermal
- Split Phase and capacitor start designs
- NEMA 56C direct mounting
- NEMA Jet Pump Service Factors
- Moderate starting torque
- UL recognized and CSA certified

### Notes:

1. Capacitor Start/Capacitor Run design for reduced amperage
2. Capacitor Start Induction Run design
3. Split Phase design
15. Fixed CW Rotation, viewing opposite shaft (or lead end) of motor

18. 1.15 Service Factor
68. Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower
110. 1.20 Service Factor
111. 1.30 Service Factor

112. 1.40 Service Factor
113. 1.50 Service Factor
114. 1.60 Service Factor
115. 1.75 Service Factor

## Single Phase, Drip proof, C-Face Footless, 56C/56J

### Features

- Double sealed Ball bearings, mechanically locked on shaft end
- Capacitor start/capacitor run design for higher efficiency, as noted
- Fixed CW rotation, viewed opposite shaft end
- Automatic reset thermal protector
- 56C = carbon steel shaft with key
- 56J = 416 stainless steel threaded shaft with slinger
- Drip cover not included, see Accessory section
- UL recognized and CSA certified

## Three Phase, Drip proof, C-Face Footless, 56C/56J

### Features

- Service Factor, as noted
- Double sealed Ball bearings, mechanically locked on shaft end
- Continuous Duty
- Nameplated 60/50 hertz, 190/380 Volts at next lower HP, as noted
- 56C = carbon steel shaft with key
- 56J = 416 stainless steel threaded shaft with slinger
- UL recognized and CSA certified
- Drip cover not included, see Accessory section

Item ID	HP	RPM	Volts	Frame	Model No.	Service Factor	F.L. Amps	Weight (lbs.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes
<b>Marathon</b>											
<b>K217</b>	1/2	3600	208-230/460	56J	5K36JN56	1.6	2.0-2.0/1.0	16	5/8 X 2 3/8	8.43	48, 68

### Notes:

1. Capacitor Start/Capacitor Run design for reduced amperage
3. Split Phase design
15. Fixed CW Rotation, viewing opposite shaft (or lead end) of motor

48. Connected for CW rotation (Canadian standard) facing opposite shaft end. Reversible by reconnection of leads
68. Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower

## Three Phase, Totally Enclosed, C-Face Footless, 56C/56J

### Features

- Service Factor, as noted
- Double sealed Ball bearings, mechanically locked on shaft end
- Continuous Duty
- Nameplated 60/50 hertz, 190/380 Volts at next lower HP, as noted
- 56C = carbon steel shaft with key
- 56J = 416 stainless steel threaded shaft with slinger
- UL recognized, CSA certified, and CE mark
- Drip cover not included, see Accessories Section

Item ID	HP	RPM	Volts	Frame	Model No.	Service Factor	F.L. Amps	Weight (lbs.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes
<b>Marathon</b>

## Split Phase, Drip proof, Resilient Base (Single & Two-Speed)

### Features

- Ball bearings (except as noted)
- Service Factor, as noted
- Thermal protection, as noted
- Variable torque on two speed motors
- Extended thru-bolts, as noted
- Heavy gauge steel frame and base
- 48Y and 48YZ frame have 48/56 frame mounting holes
- Reversible rotation
- UL recognized and CSA certified

19. 1.25 Service Factor
20. 1.35 Service Factor
26. 5/8" shaft adapter included

31. 5/8" thru-bolts, shaft end
32. 3/4" Thru bolts, shaft end
47. Connected for CCW rotation (U.S. standard) facing opposite shaft end. Reversible by reconnection of leads
52. 1/2" x 1-7/8" Shaft with 1-5/8" Flat
53. 1/2" Shaft with 5/8" adapter and Key

72. Usable on 200 Volts at 1.0 Service Factor
74. Split phase/capacitor run electrical design
82. Welded Rigid Base
- CF - Consult Factory for Accessory Kit and/or Modification Selection
- ES - Energy Saver Design

## Split Phase, Open, PDQ Mounting

### Application

Designed for replacement of virtually any NEMA 48 and 56 frame belt drive furnace blower motors. PDQ models have 1 1/2" extended splined hub on the opposite shaft end for quick and easy positioning of resilient ring to properly fit the pre-existing motor base.

### Features

- Ball bearings
- Reversible rotation connected for CCW rotation from factory
- Attic Fan
- NEMA Service Factors
- UL recognized and CSA certified

DIANA LABARCA  
 Accounting - New Accounts

### Customer Focused...

“...means that we strive to make sure that all of our customer’s needs are met, both in the physical sense of the product and the final step in accounting.”

# MARATHON GENERAL PURPOSE, SINGLE PHASE | MOTORS

## (NEMA Service Factor), Drip Proof - Rigid Base

### Features

- Heavy gauge steel frame and base
- Ball bearings (except as noted)
- Economical split phase or capacitor start designs, as noted
- Service Factor, as noted
- Reversible rotation
- UL recognized and CSA certified

# MARATHON FAN AND BLOWER DUTY, SINGLE PHASE | MOTORS

## (NEMA Service Factor), Drip Proof - Resilient Base

### Features

- Heavy gauge steel frame and base
- Ball bearings (except as noted)
- Thermal protection, as noted
- Capacitor start design for high starting torque
- Capacitor start/capacitor run design for higher efficiency, as noted
- 48Y and 48YZ have 48/56 frame mounting holes
- Service Factor, as noted
- Reversible rotation
- UL recognized and CSA certified

### Notes:

1. Capacitor Start/Capacitor Run design for reduced amperage
2. Capacitor Start Induction Run design
5. 56H, 143T, and 145T Combination Base with 12 mounting holes

14. Will accept C-Face kit, see Accessory Section
17. 1.0 Service Factor
18. 1.15 Service Factor

24. Motor will NOT accept a Brake kit
- ES - Energy Saver Design
- F - Class F Insulation

## Capacitor Start, Drip proof, Resilient Base (Single & Two-Speed)

### Features

- Ball bearings
- Heavy gauge steel frame and base
- Service Factor, as noted
- Capacitor start / capacitor run as noted
- Thermal protection, as noted
- 48Y and 48YZ Frame have 48/56 Frame mounting holes
- Reversible rotation
- UL recognized and CSA certified

## Capacitor Start, Drip proof, Resilient Base (Single & Two-Speed)

### Features

- Ball bearings
- Heavy gauge steel frame and base
- Service Factor, as noted
- Capacitor start / capacitor run as noted
- Thermal protection, as noted
- 48Y and 48YZ Frame have 48/56 Frame mounting holes
- Reversible rotation
- UL recognized and CSA certified

## Three Phase, Drip Proof, Resilient Base (Single and Two-Speed)

### Features

- Single and two-speed models, as noted
- Variable torque on two speed ratings
- Ball bearings
- Heavy gauge steel frame and base
- Thermal protection, as noted
- Service Factor, as noted
- Nameplated 60/50 Hz at next lower horsepower (except as noted)
- Patented VCD™, Voltage Change Device where footnoted "VC"
- UL recognized and CSA certified

18. 1.15 Service Factor

19. 1.25 Service Factor  
VC - Voltage Change Device feature for quick voltage changes  
Z - 56HZ with 7/8" shaft dia., 3-1/2" shaft height, and slotted 56 frame base

## Drip Proof, Rigid Base

### Features

- EISA compliant efficiencies, as noted
- Ball bearings (except where noted)
- NEMA Service Factors
- Will accept C-Face kits, non-stock item - Call Packard for details
- UL recognized and CSA certified

Suitable for use on VFD per guidelines on page 120.

## Drip Proof, C-Face Footless

### Features

- Ball bearings, mechanically locked on shaft end
- NEMA Service Factors
- UL recognized and CSA certified

Suitable for use on VFD per guidelines on page 120.

Item ID	HP	RPM	Volts	Frame	Model No.	Nom. Eff.	F.L. Amps	Weight (lbs.)	Shaft Dim. (in.)	Length Less Shaft (in.)
<b>Marathon</b>

### Notes:

5. 56H, 143T, and 145T Combination Base with 12 mounting holes  
 13. F1 Mounting only, cannot reassemble to F2  
 25. Motor will NOT accept C-Face Kits  
 68. Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower

Z - 56HZ with 7/8" shaft dia., 3-1/2" shaft height, and slotted 56 frame base  
 CF - Consult Factory for Accessory Kit and/or Modification Selection  
 VC - Voltage Change Device feature for quick voltage changes  
<sup>1</sup>Has efficiency levels that meet EISA requirements

## Totally Enclosed, Four in One - C-Face Footed (Removable Base)

### Features

- Double sealed ball bearings, mechanically locked on shaft end
- Heavy gauge steel constructions
- Bolt-on, removable rigid base
- Suitable for horizontal or vertical mounting
- Capacitor start design for high starting torque
- Capacitor start/capacitor run design for higher efficiency, as noted
- 1.15 Service Factor (except as noted)
- Will accept brake kits, see Accessory section
- Will accept drip cover kits, non-stock item - Call Packard for details
- UL recognized and CSA certified

## Customer Focused...

“ means doing everything you can to let that customer know how important and valued they are to Packard. To continually go above and beyond for each and every one of our customers. ”

ROSALIND PAGANO LESSIN  
Human Resources Manager

## Totally Enclosed - Rigid Base

### Features

- Ball bearings
- Heavy gauge steel constructions
- Economical split phase or capacitor start designs, as noted
- Service Factor, as noted
- UL recognized and CSA certified

## (NEMA Service Factor), Drip Proof - C-Face Footless

### Features

- Ball bearings mechanically locked on shaft end (excludes 5K models)
- Heavy gauge steel frame and base
- Capacitor start design for high starting torque
- Capacitor start/capacitor run design for higher efficiency, as noted
- Service Factor, as noted
- UL recognized and CSA certified

### Notes:

1. Capacitor Start/Capacitor Run design for reduced amperage
2. Capacitor Start Induction Run design
3. Split Phase design
14. Will accept C-Face kit, see Accessory Section

17. 1.0 Service Factor
18. 1.15 Service Factor
19. 1.25 Service Factor
20. 1.35 Service Factor

68. Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower
- ES - Energy Saver Design

## Single Phase, Totally Enclosed Fan Cooled Rigid Base

### Features

- Ball bearings, shaft end mechanically locked on C-face models
- Heavy gauge steel constructions
- Capacitor start/capacitor run design for higher efficiency, (except as noted)
- Continuous duty, 1.15 Service Factor
- Manual reset thermal protector
- UL recognized and CSA certified

Item ID	HP	RPM	Volts	Frame	Model No.	F.L. Amps	Weight (lbs.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes

## Single Phase, Totally Enclosed Fan Cooled, C-Face Footed (Rigid Base)

### Features

- Ball bearings, shaft end mechanically locked on C-face models
- Heavy gauge steel constructions
- Capacitor start/capacitor run design for higher efficiency, (except as noted)
- Continuous duty, 1.15 Service Factor
- Manual reset thermal protector
- UL recognized and CSA certified

### Notes:

1. Capacitor Start/Capacitor Run design for reduced amperage
2. Capacitor Start Induction Run design

5. 56H, 143T, and 145T Combination Base with 12 mounting holes
14. Will accept C-Face kit, see Accessory Section

For full product details visit  
[packardonline.com](http://packardonline.com).

## Single Phase, Drip Proof, Rigid Base

### Features

- Capacitor start / capacitor run design for low amps and high efficiency, as noted
- High starting and breakdown torque
- Heavy gauge steel frame and base
- Continuous duty at nameplate ratings
- Thermal protection, as noted
- UL recognized and CSA certified

Item ID	HP	RPM	Volts	Frame	Overload	Model No.	F.L. Amps	Weight (lbs.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes
<b>Marathon</b>

## Definite Purpose: Two-Speed, Two-Winding, Variable Torque

### Application

Commercial and industrial fans, blowers, pumps, and other machinery that have variable torque characteristics. Prolonged use at low speed can result in significant energy savings. Drip proof motors are intended for use in environments that are relatively clean and dry. For use outdoors an enclosure or drip cover may be required.

### Features

- Ball bearings
- Economical two-winding design
- 1.15 Service Factor
- UL recognized and CSA certified

Item ID	HP	RPM	Volts	Frame	Model No.	Nom. Eff.	F.L. Amps	Weight (lbs.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes
<b>Marathon</b>											
Y468A	3/7.5	1800/900	460	184T	184TTDW7230	82.5	4/2.75	68	1 1/8 x 2 3/4	10.44	13

### Notes:

1. Capacitor Start/Capacitor Run design for reduced amperage
2. Capacitor Start Induction Run design
13. F1 Mounting only, cannot reassemble to F2

## TechTip >>>

from Packard Academy

Some applications require high starting torque as well as high running torque. These requirements can usually be met with a three phase motor. However, three phase power is not always available. In the case when only single phase power is available then a motor designed with both start and run capacitors may be the answer. This design will provide the needed torque but minimize the operating amps.

**JOEY'S TIP**  
Joseph Laminack  
Product Engineer

# MARATHON GENERAL PURPOSE, THREE PHASE | MOTORS

## Drip Proof, Rigid Base

### Features

- EISA compliant efficiencies, as noted
- Ball bearings (except where noted)
- NEMA Service Factors
- Will accept C-Face Kits, see Accessories Section (except as noted)
- UL recognized and CSA certified

Suitable for use on VFD per guidelines on page 120.

## Three Phase, Drip Proof, Resilient Base (Single and Two-Speed)

### Features

- Single and two-speed models, as noted
- Variable torque on two speed ratings
- Ball bearings
- Heavy gauge steel frame and base
- Thermal protection, as noted
- Service Factor, as noted
- Nameplated 60/50 Hz at next lower horsepower (except as noted)
- Patented VCD™, Voltage Change Device where footnoted "VC"
- UL recognized and CSA certified

As Noted

### Notes:

- 56H, 143T, and 145T Combination Base with 12 mounting holes
- With rigid base
- F1 Mounting only, cannot reassemble to F2
- 1.0 Service Factor
- 1.15 Service Factor

- 1.35 Service Factor
- Motor will NOT accept C-Face Kits
- Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower
- Not Nameplated 50 hz

- CF - Consult Factory for Accessory Kit and/or Modification Selection  
 VC - Voltage Change Device feature for quick voltage changes  
 Z - 56HZ with 7/8" shaft dia., 3-1/2" shaft height, and slotted 56 frame base  
<sup>1</sup>Has efficiency levels that meet EISA requirements

## Totally Enclosed (Four in One), C-Face Footed (Rigid and Removable Base)

### Features

- Ball bearings, mechanically locked on shaft end (excludes 5K models)
- 1.15 Service Factor (except as noted)
- Class F insulation (except as noted)
- Rated 60/50 hertz, 190/380 or 380 volt, at next lower horsepower (as noted)
- 56-145T frame motors accept brake kits
- UL recognized and CSA certified

### Additional features for "Four-In-One" motors only:

- CR200 Corona resistant magnet wire
- Bolt-on, removable rigid base
- Suitable for horizontal and vertical mounting
- Will accept drip cover kits

Suitable for use on VFD per guidelines on page 120.

## Single Phase, Drip Proof, C-Face Footless, Single Speed

### Features

- Split phase (except as noted)
- Thermal protection, as noted
- Service Factor, as noted
- Motors with 56CZ frames have 2-1/4 x 5/8 shaft dimensions
- Ball bearings

### Notes:

5. 56H, 143T, and 145T Combination Base with 12 mounting holes  
 6. Bolt-on removable base for footless mounting option  
 13. F1 Mounting only, cannot reassemble to F2

19. 1.25 Service Factor  
 20. 1.35 Service Factor  
 24. Motor will NOT accept a Brake kit

68. Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower  
 112. 1.40 Service Factor  
 N - Totally Enclosed, Non-Ventilated

## Totally Enclosed, Rigid Base

### Application

General purpose use on pumps, fans, blowers, compressors, conveyors, and other industrial machinery installed in damp, dusty, or dirty environments. Additionally, cast iron frame motors may be suitable for the process industries.

### Features

- Ball bearings (except as noted)
- 1.15 Service Factor (except as noted)
- 60/50 hertz at next lower horsepower, as noted
- Will accept C-Face Kits as noted, also see Accessories section
- UL recognized and CSA certified

Suitable for use on VFD per guidelines on page 120

<sup>2</sup>Requires nameplate modification

## Totally Enclosed, C-Face Footless

### Application

General purpose use on gear reducers, pumps, machine tools, and other direct-coupled equipment installed in damp, dusty, or dirty environments. Additionally, cast iron frame motors may be suitable for the process industries.

### Features

- Ball bearings, mechanically locked on shaft end (excludes 5K models)
- Rated 60/50 hertz, 190/380 or 380 volt, at next lower horsepower (as noted)
- 1.15 Service Factor (except as noted)
- Rolled steel 56-145T frame motors accept brake kits
- UL recognized and CSA certified

Suitable for use on VFD per guidelines on page 120.

## Totally Enclosed, C-Face Footed (Rigid Base)

### Features:

Meets or exceeds NEMA Premium<sup>®</sup> efficiencies

NEMA Premium<sup>®</sup> models are in compliance with EISA2007

- Cast iron frame and brackets
- Inverter Duty 10:1 Variable Torque and 10:1 Constant Torque, 1.0 SF (except as noted)
- 1.15 Service Factor
- Class F Insulation
- Standard assembly F1, reversible to F2 assembly
- UL recognized, CSA certified, CE mark

### Notes:

5. 56H, 143T, and 145T Combination Base with 12 mounting holes  
18. 1.15 Service Factor

19. 1.25 Service Factor  
20. 1.35 Service Factor

24. Motor will NOT accept a Brake kit  
68. Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower

## Drip proof, C-Face Footless (Vertical) and C-Face Footed (Rigid Base)

### Features

- NEMA JM pump shaft dimensions
- JMV frame includes drip cover for vertical mount without base
- JM frame has rigid base, drip cover not included
- Ball bearings, mechanically locked on shaft end
- Continuous duty
- 1.15 Service Factor
- UL recognized and CSA certified
- UL Listed for Fire Pump applications (except as noted)

Suitable for use on VFD per guidelines on page 120.

### Notes:

27. Drip Cover included

68. Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower

<sup>1</sup>Has efficiency levels that meet EISA requirements

## TechTip >>>>

from Packard Academy

Always remember that when replacing a general purpose, or self cooled motors, such as a pump motor, to consider Service Factor (SF). Service Factor is a multiplier. Multiplying the Service Factor times the nameplate horsepower of the motor provides the available range of horse power. For example, a 1 horsepower motor with a 1.15 Service Factor can safely operate a 1.15 horsepower load, i.e.,  $1 \times 1.15 = 1.15$ . A 1 horsepower motor with a 1.40 Service Factor can safely operate a 1.4 horsepower load, i.e.,  $1 \times 1.40 = 1.4$ .

### CHRIS'S TIP

Chris Baxter  
Technical Support

## Drip proof, NEMA Premium® XRI® Efficiency, Rigid Base

### Application

General purpose use on compressors, pumps, conveyors, blowers, and other machinery in environments that are relatively clean and dry. Substantial energy savings can be realized when using these high efficiency motors. Guaranteed efficiencies offer an extra return on your investment when using these premium efficiency motors on high cycle or long run time applications.

### Features

- Meets or exceeds NEMA Premium® efficiencies  
NEMA Premium® models are in compliance with EISA2007
- Motors are suitable for 10:1 VT on all frame sizes and
- 10:1 CT up to 365T frame (Except where noted)
- 1.15 Service Factor
- Normally closed thermostats, as noted
- Class F Insulation
- Nameplated 60/50 hertz
- UL recognized, CSA certified and CE mark
- Will accept C-Face kits, Non-stock item - Call Packard for details

Suitable for use on VFD per guidelines on page 120.

Models ending in "-P" denotes BCP - Bearing Current Protection

### Notes:

13. F1 Mounting only, cannot reassemble to F2  
A - NEMA Design A  
TS - Normally Closed Thermostats installed

YD - 12 Leads for WYE-DELTA, Part Winding on low voltage, or across-the-line starting  
<sup>1</sup>Has efficiency levels that meet EISA requirements

## Three Phase, Totally Enclosed, Rigid Base

### Application

General purpose use on compressors, pumps, conveyors, blowers, and other machinery in dirty and dusty environments. Substantial energy savings can be realized when using these high efficiency motors. Guaranteed efficiencies offer an extra return on your investment when using these premium efficiency motors on high cycle or long run time applications.

### Features

- Meets or exceeds NEMA Premium® efficiencies, except where noted NEMA Premium® models are in compliance with EISA2007
- Suitable for use on a VFD. Variable Torque and Constant Torque (as noted)
- 1.15 Service Factor on sinewave, 1.0 Service Factor on IGBT power
- F1 conduit box on Rigid Base, F3 on C-Face Footed (Rigid Base) motors
- Bearing Current Protection (BCP), as noted
- Shaft slinger
- Class F insulation
- 1.15 Service Factor
- Ball bearings (except as noted)
- C-Face Footed models are rated 60/50 Hz, same HP
- Motors accept C-face kits, as noted
- UL recognized, CSA certified and CE mark

Models through 40 HP are capable of modification as follows (contact factory to confirm):

- 1.25 Service Factor (sinewave only)
- 50Hz at same HP, 1.0 Service Factor (sinewave only)
- Certain combinations of existing and new nameplate markings are not possible (contact factory to confirm)
- Any nameplate changes are subject to modification charges (see MOD Central section)
- Contact Marathon Motors for optional nameplate markings on 50 HP and larger

Suitable for use on VFD per guidelines on page 120.

## Totally Enclosed Wet Environment / Car Wash Motor, C-Face Footless, Three Phase

### Features

- 303 Stainless steel shafts with contact lip seal & V-ring slinger
- Rolled Steel construction
- Gray epoxy paint
- Class F insulation
- 1.15 Service Factor (except as noted)
- Automatic thermal protection

Suitable for use on VFD per guidelines on page 120.

## Steel Frame, Standard and NEMA Premium Efficiencies, Three Phase, Rigid Base

### Features

- 1.0 Service Factor (except as noted)
- Meets temperature code T3B
- Explosion proof conduit box included, shipped loose
- UL Listed File No. E12044
- CSA certified File No. LR47504
- Automatic Overload

Suitable for use on VFD per guidelines on page 120.

## High Torque, Single Phase, TEFC, Rigid Base

### Features

- Ball bearings, shaft end mechanically locked on C-face models (excludes 5K models)
- Capacitor start design for high starting torque
- Low temperature manual reset thermal protector
- Totally enclosed and fully gasketed construction for dirty environments
- Condensate drains
- Shaft slinger
- UL recognized and CSA certified

Item ID	HP	RPM	Volts	Frame	Model No.	F.L. Amps	Weight (lbs.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes

## Single Phase, Totally Enclosed, C-Face Footless (Removable Base)

### Features

- Fail-safe, spring set Stearns 56 Series brake for holding or stopping
- Brake has manual wear adjustment for longer pad life
- Manual release lever on rear of brake housing
- Brake leads are terminated at the brake
- Universal mounting, no modifications needed
- Brake coil voltage matches motor voltages, see mod section for other brake coils
- Ball bearings, mechanically locked on shaft end
- 1.15 Service Factor (1.0 Service Factor as noted)
- Nameplated 60/50 hertz at next lowest horsepower
- UL recognized and CSA certified

## Three Phase, C-Face Footed (Removable Base)

### Features

- Fail-safe, spring set Stearns 56 series brake for holding or stopping
- Manual release lever on rear of brake housing
- Brake leads are terminated at the brake
- Brake coil voltage matches motor voltages, see mod section for other brake coils
- Ball bearings, mechanically locked on shaft end
- Nameplated 60/50 hertz at next lowest horsepower
- UL recognized and CSA certified
- Brake has manual wear adjustment up to 25 Lb/Ft. for longer pad life
- Stearns brakes, 56 series through 25 Lb/Ft, 87 series above 35 Lb-Ft and larger
- Brake leads routed through motor conduit box (TENV only)
- Universal mounting up to 15 Lb/Ft, C406 has verticle springs included, for larger brakes, see mod section
- CR200 Corona resistant magnet wire (motor can be operated 10:1 variable torque and 2:1 constant torque)
- 1.15 Service Factor, 1.0 Service Factor where footnoted

Suitable for use on VFD per guidelines on page 120.

Explosion Proof	All efficiency levels	Explosion Proof motors must be properly nameplated with inverter duty information prior to use on VFD. See catalog pages for specific rating capabilities. Motors with automatic overload protectors cannot be used on VFDs.									
IEC Motors		ALL FRAMES	63-90		100-225		250-315				
All Enclosures	All efficiency levels	10:1	20:1		Up to 20:1		Up to 2:1				

- Notes: (1) 324-449T, 4 & 6 Pole XRI motors are rated for 20:1 C.T. with fan modification; otherwise rated for 2:1 C.T. continuous duty, or 20:1 C.T. 60 minute duty at lowest RPM.  
 (2) Washdown TEFC motors are rated for 10:1 C.T. 60 minute duty or 2:1 C.T. continuous duty at lowest RPM.  
 Model numbers beginning with 5K are not suitable for use with Variable Frequency Drives.

## Application Notes

Bearing currents	Marathon Motors recommends that any motors used with Variable Frequency Drives be equipped with suitable means to protect the motor bearings from shaft currents caused by common mode voltages inherent with operation on a non-sinusoidal power supply. Marathon Motors offers several options for motors in non-classified (non-hazardous) locations, including ground brushes, insulated bearings and non-contact shaft grounding rings. For more information on ground brushes and bearing currents, see the VARIABLE SPEED OPERATION section. For installation cost and available options, see the MOD CENTRAL section.
Restricted use	DO NOT APPLY THE FOLLOWING MOTORS ON VARIABLE FREQUENCY DRIVES: Single Phase motors, Motors with inherent overload protection, Multi-Speed motors, Motors with 1.0 Service Factor on sine wave power. Fire Pump motors should not be used with variable frequency power supplies, due to the critical nature of these applications.
Hazardous Locations	Consult with Marathon Motors when applying motors and drives into Hazardous Locations, either Division/Zone 1 or Division/Zone 2 areas. UL and CSA policies prohibit the installation of bearing protection devices, such as shaft grounding brushes, rings or insulated bearings on motors in Hazardous Locations.

## Maximum Cable Lengths from the Motor to Drive

PRODUCT DESCRIPTION	3 kHz CARRIER FREQUENCY (PHASE TO PHASE)*		
	230 VOLT	460 VOLT	575 VOLT
56-326 NEMA, 100-225 IEC Frames	600 ft.	125 ft.	40 ft.
364-5013 NEMA, 250-315 IEC Frames	1000 ft.	225 ft.	60 ft.
Motors with CR200 Corona Resistant Magnet Wire	1500 ft.	475 ft.	140 ft.
Motors with MAX GUARD® insulation system	Unlimited	Unlimited	650 ft.
Form-wound low voltage motors	Unlimited	Unlimited	650 ft.

\* Higher carrier frequencies require shorter cable length to obtain normal (50Khrs) insulation life.

## Altitude/Ambient - MOD7 (Mult. Symbol S4)

The rating of standard motors assumes operation at sea level. Listed motors are suitable for operation at altitudes up to 3,300 feet in a maximum ambient temperature of 40°C. The ambient temperature is the temperature of the cooling medium surrounding the motor. All standard motors are suitable for operation over the range of -15°C to 40°C ambient per NEMA MG-1.

## AC Motor Altitude or Ambient Re-Rating

Re-rating of a non-explosion proof motor can be done by evaluating the performance data and possibly changing the Service Factor. Contact Marathon Motors for motor capabilities prior to motor selection and modification.

## Bearings - MOD18 (Mult. Symbol S4)

Most standard motors use anti-friction deep groove Conrad type Ball bearing, sized for the loads to be expected in industrial applications. Roller bearings are used on the drive end to handle heavy or overhung (radial) shaft loads.

## Ball to Roller Bearing

Roller bearings have the capability to handle higher radial loads than Ball bearings, but must have minimum radial loads to operate correctly. Roller bearings must only be used on belted loads. They are not suitable for direct-coupled loads. (Marathon Motors recommends that belting data is reviewed by Engineering prior to converting any motor to roller bearing.) This option includes replacing only the standard drive end bearing with a roller bearing and locking the opposite bearing axially. Available on TEFC Blue Chip® and Blue Chip® XRI® motors. Lead-time is 3 days.

## Roller to Ball bearing

Larger horsepower motors are stocked standard with a roller bearing on the drive end. For direct-coupled applications, a Ball bearing must be installed on the drive-end. Lead-time is 2 days.

## Sealed Bearing

This modification provides the option of replacing the standard bearings in AC motors with sealed bearings and replacing the grease fittings with plugs. May not be suitable for belted applications. 250 - 449 frame, 3600RPM, no sealed bearing option. 250 - 445, 1800RPM and below, non contact sealed only. 48 - 215, All RPM's are available for sealed bearings. Consult Marathon Motors for full application details. Call for lead-time.

## Insulated Bearing

Insulated bearings are used to reduce the transmission of shaft currents. In accordance with NEMA MG1-31.4.4.3, both bearings must be insulated to protect inverter-driven motors from inverter-sourced shaft voltages. The connected load must also be insulated from the motor shaft to prevent damage to it's bearings. Per UL, insulated bearings may not be installed in Division 1 or Division 2 hazardous locations. Division 2 will be removed from XRI®-Severe Duty and IEEE 841 motors when this modification is performed. Call for lead-time.

## Blowers - MOD19 (Mult. Symbol S4)

Low rotational speeds, common in many vector drive applications, cause additional heat within the motor. As a result, these motors are designed as TENV or TEBC. Marathon Motors offers two types of blower units, depending upon the application requirements. The axial blower is available on Marathon's XRI® and XRI®-Severe Duty.

## Axial Blower

Most TEBC requirements are satisfied with Marathon's axial blower. The blower motor and fan are in the same (horizontal) plane as the motor drive shaft. Lead-time is 3 days.

## C-Face Brackets - MOD2 (Mult. Symbol S4)

The addition of a C-Face kit to a standard foot mount (rigid base) motor, results in a non-NEMA "BA" dimension in 143-256 Frames due to NEMA's establishment of two distinct "BA" dimensions for each of the affected frame sizes: one for rigid base motors and another for C-Face/rigid base motors. No motor manufacturer can meet both prescribed dimensions on reworked motors. The following table identifies the "BA" dimensions (defined as the distance from the center of the front foot hole to the shaft shoulder) for 143T-256T and TC frames:

\* C-Face Kit (rework) "BA" dimension is identical to foot mount "BA."

## D-Flange Brackets - MOD17

NEMA FRAME	FOOT MOUNT*	C-FACE
143T-145T	2.38"	2.75"
182T-184T	2.75"	3.50"
213T-215T	3.50"	4.25"
254T-256T	4.25"	4.75"

## (Mult. Symbol S4)

Add a D-Flange Kit to rigid base, cast iron motor. Available on Blue Chip 254T-365T and Drip proof 284T-286T ("TTDP" and "TTDC" designs). Addition of D-Flange Kit results in non-NEMA 'BA' dimension or 254T-256T. Lead time is 2 days.

## IEC Brackets - MOD55 (Mult. Symbol S4)

B14 FT Flange (IEC C-Face)

IEC mounting arrangement with the motor flange at the drive end similar to a NEMA C-Face motor. Modification includes motor disassembly and installation of a FT Flange to a Globetrotter® motor. Lead-time is 2 days.

## B5 FF Flange (IEC D-Flange)

IEC mounting arrangement with the motor flange at the drive end similar to a D-Flange. Modification includes motor disassembly and installation of a FF Flange to Globetrotter® motor. Lead-time is 2 days.

## Brake Motors - MOD3 (Mult. Symbol S4)

Spring-set, electrically released mechanical disc brakes are available for stopping and/or holding the load. Marathon's brakes are suitable for any angle mounting. Price of modification includes brake kit and installation.

# MOTORS | MARATHON ONLY MOTOR MODIFICATIONS

MOTOR HP	BRAKEMOTOR SHAFT R.P.M.		
	Lb-Ft @3600	Lb-Ft @1800	Lb-Ft @1200
1/4	---	---	3
1/3	---	3	3
1/2	3	3	3
3/4	3	6	6
1	3	6	6
1 1/2	6	10	10
2	6	10	---

## Brake Selection Chart

\*\* For normal (140%) torque rating, do not apply on motors larger than 2 HP. Reduced braking torque and /or longer stopping times can result from applying an undersized brake on higher HP motors.

## Brake Addition - TEFC

This modification includes the addition of a 3,6, or 10 Lb-Ft brake to single or three phase, TEFC, 56 (5000 series model numbers) and 143/145T Frame motors. Operating voltages are 115/208-230, 208-230/460, and 575 Volts. Lead-time is 3 days.

## Brake Addition - Inverter Duty

This modification includes the addition of a 6 or 10 Lb-Ft brake to Marathon Motors's Black Max® or Blue Max® Vector Duty motors. Operating voltages are 115/208-230, 208-230/460, or 575 Volts. Lead-time is 3 days.

## Brake Coil Voltage (Stearns only)

Brake coil changes allow for operation of brakes at various voltages on 50 or 60 Hertz AC power supplies. Available coil voltages at 50 HZ are 110, 220, 415, and 110/220 Volts. Coil voltages at 60 HZ are 115, 200, 575, and 200/400 Volts. Coil voltages at 60/50 HZ are 230/190, 460/380, and 208-230/460-190/380 Volts. External brake coil lead connections will be brought out from the brake. Specify brake lead location, brake coil voltage, and supply frequency at time of order. Lead-time is 10 days.

MOD NUMBER	BRAKE RATING	BRAKE SERIES	LIST PRICE PER MOTOR
MOD3X	3 Ft/Lb	56,000	\$410
	6 Ft/Lb		
	10 Ft/Lb		
	15 Ft/Lb		
MOD3Y	25 Ft/Lb	87,000	\$510
	35 Ft/Lb		
	50 Ft/Lb		
	75 Ft/Lb		
	105 Ft/Lb		

## Vertical Modification Kit (Stearns 87,000 series)

Includes required hardware to accommodate vertical above (shaft down) or vertical below (shaft up) mounting.

TORQUE RATING (Lb/Ft)	MOUNTING	
	SHAFT UP	SHAFT DOWN
25,35	Not req'd	Required
50,75,105	Required	Required

## Conduit Box - MOD56 (Mult. Symbol S4)

Standard conduit box construction is based on the individual product description, e.g. severe duty motors always have a cast iron conduit box, while some standard duty motors come with stamped steel and others cast iron. Conduit boxes meet or exceed NEC 430.12 requirements for volume.

Termination of protective or monitoring devices can be provided in a separate auxiliary conduit box or conduit. Auxiliary conduit boxes are not available on explosion proof motors.

## Rotate Conduit Box Lead Opening

Standard motors have lead opening facing down toward motor base. Modifications include rotating the conduit box so the lead opening is facing the desired direction. Specify lead opening location facing conduit box. Available on non-explosion proof motors. Lead-time is 2 days.

## Convert to Cast Iron

Replacement of steel conduit box with a cast iron conduit box. This modification is available on non-explosion proof cast iron motors as Marathon's explosion proof integral stock motors come standard with a cast iron conduit box. Lead-time is 2 days.

## Auxiliary Box (Condulet)

A condulet can be added to the main motor conduit box for routing of accessory leads. Available on ODP and TEFC (non-explosion proof) motors. Call for lead-time.

## Connections - MOD0 (Mult. Symbol S4)

Motor connections consist of special cords, plugs, and switches added to a single phase motor.

## Drains - MOD21 (Mult. Symbol S4)

Standard duty motors include a weep hole as standard, while severe duty and explosion proof motors include a brass drain/breather as standard. These are located in the drive end bracket at the lowest point.

## Condensation Drain Holes

Additional drilled holes will be made in both end brackets of TEFC motors. Not available on explosion proof motors. Lead-time is 2 days.

## Brass Drain & Breather

Combination self-draining and breather plugs are available on TEFC motors. Not available on explosion proof motors. Lead-time is 2 days.

## Stainless Steel Drain & Breather

Combination self-draining and breather plugs are available on TEFC motors. Not available on explosion proof motors. Lead-time is 2 days.

## Drip Covers - MOD4 (Mult. Symbol S4)

Drip covers can be furnished on standard motors for extra protection from dripping liquids and falling objects when the motor is mounted in the vertical shaft down position. These covers are recommended on all open Drip proof and totally enclosed motors for vertical shaft down operation. These covers have no vertical lifting provisions provided.

## Canopy Cover (ODP and TEFC Motors)

Modification includes installation of a sheet metal drip cover to the motor for vertical shaft down mounting. Available on rolled steel Drip proof motors through 256T frame and select TEFC motors. Lead-time is 2 days.

## Encoders - MOD22, and MOD24 (Mult. Symbol E3)

These electrical devices sense rotor speed and direction providing feedback to a control device. An encoder is a feedback device that translates mechanical motion into an electrical signal. A cable is connected from the encoder to the variable frequency drive to provide this feedback. Various mechanical provisions on the motor are required to attach the encoder. These may include C-Face on the non-drive end of the motor and special shaft extension. Various resolutions are available. All encoders offered have quadrature signal with line driver output.

Encoders can be mounted on Black Max® and Blue Max® 2000 Vector Duty motors, TENV 56 through 286T Frame, TEBC construction in 284T through 449T Frame.

## Stub Shaft - MOD42 (Mult. Symbol S4)

Add Stub Shaft to Fan Cooled XRI-SD, XRI-841 (182-449 Frames) to accommodate addition of encoder on opposite drive end of motor. Lead-time 2 days.

## Fan - MOD43, and MOD44 (Mult. Symbol S4)

Marathon Motors's XRI® Severe Duty and IEEE841 motors have non-sparking fans made with, high-temperature, reinforced corrosion resistant plastic that is impervious to chemical attack and has been specially designed for motor applications. All motors utilize bi-directional cooling fans.

**Oversized fan (Inverter Duty)** - See MOD43 Inverter Duty

## Fan Removal - MOD44

TEFC to TEAO. Convert a motor from totally enclosed, fan cooled construction to totally enclosed, air-over by removing fan cover, fan, and cutting off the fan end shaft. The modified motor must be mounted in the air stream of the driven fan for cooling purposes. The customer is responsible for providing adequate airflow over the motor. Lead-time is 2 days.

## Vane Axial Fan - MOD43

The modification can be done on rigid or C-Face mount, TEFC, TENV, EPFC, EPNV, or DP enclosures. Motors will be modified for Vane Axial fan applications. All motors will get an additional nameplate, and 42" extended leads. TEFC models will have the fan and fan guard removed and enclosure changed to TEAO. A minimum airstream velocity of 3000' per minute is required.

Lead time is 4 days.

## Frequency - MOD7 (Mult. Symbol S4)

Most motors commonly operate on 60 hertz (HZ) within North America. However, 50 hertz systems are common in other countries.

## Frequency Re-Rate 60 HZ to 50 HZ

Marathon Motors's standard motors rated at 60 HZ may be operated at 50 HZ at reduced voltage and horsepower or Service Factor. A label containing specific re-rating information will be attached to the motor. Frame size is subject to change.

Lead-time is 1 day.

Standard grease is Exxon Polyrex® EM with a bearing operating temperature range of -30° to +150°C for ball and roller bearings. Devices for installing grease into the motors, such as zerk fittings, are available.

## Grease Relief Fittings - MOD15

Install standard grease relief fitting on motor. Grease relief fittings serve as an outlet to equalize pressure in the motor. Not available on explosion proof motors. Lead-time is 2 days.

## Zerk Fittings (Cast Iron Motors) - MOD15

Replace standard grease plugs on motors with zerk fittings. XRI® Severe Duty and IEEE841 motors come with zerk fittings as standard equipment. Not available on explosion proof motors. Lead-time is 2 days.

## Low Temperature Grease - MOD0

Bearing grease may be changed to allow for a lower operation range. The motor bearings and end bells are purged and repacked with Beacon 325 grease or equivalent with a grease temperature range of -60°C to +120°C. Call for lead-time.

## High Temperature Grease - MOD0

Bearing grease may be changed to allow for a higher operating range. The motor bearings and end bells are purged and repacked with Dow Corning DC44M grease or equivalent with a grease temperature range of -40° to +204°C. Call for lead-time.

## Grounding - MOD20 (Mult. Symbol S4)

All motors 48 to 449T Frame have grounding provisions per NEMA and NEC Standards. Explosion proof motors are permitted to have a frame ground, but electrical ground in conduit box must also be connected.

## Conduit Box Grounding Lug

Add clamp-type grounding lug in the conduit box. Lead-time is 2 days.

## On-Frame Grounding (Cast Iron Motors)

Addition of drilled and tapped hole on conduit box side of frame with installation of grounding lug. Available on non-explosion proof cast iron ratings only. Lead-time is 2 days.

## Bearing Current Protection - BCP

BCP is a shaft current mitigation system utilizing shaft ground rings for MODS. They are recommended (NEMA MG1 31.4.4.3) as an effective means of bearing protection for motors operated from inverter power. One ring is adequate to bleed down inverter-sourced shaft voltages, thereby protecting both bearings for motors as large as 5011 frame. BCP may not be installed on motors used in Division 1 or Division 2 hazardous locations or motors with a modified shaft. Does not fit all motor types. Lead-time is 2 days.

## Inverter Duty - MOD25, MOD26, and MOD43 (Mult.Symbol S4)

"Inverter Duty" describes a class of motors that are capable of operation from a variable frequency drive. Many Marathon general purpose motors are suitable for most variable torque and some limited constant torque applications.

These motors do not have provisions for mounting encoders, but are suitable for use with Volts/hertz or open loop vector controls. As required under Federal law, these motors comply with EPA efficiencies when operating from utility power. Lead-time is 2 days.

**Grease/Fittings - MOD0, MOD15 (Mult. Symbol S4)**

# MOTORS | MARATHON ONLY MOTOR MODIFICATIONS

## INV. DUTY (LEADTIME 2 DAYS)

Mod #	Appl.	Mtr. Type	Mod
25	Variable Torque	Any	Add thermostats, re-nameplate
26	10:1 CT	EPAct TEFC	Oversized fan, Add thermostats, re-nameplate
	20:1 CT	NEMA Premium® TEFC	
43	10:1 CT	EPAct TEFC	Oversized fan, re-nameplate
	20:1 CT	NEMA Premium® TEFC	

Operation of motor on VFD exempts motor from Epact mandated efficiency levels.

### Leads - MOD0, MOD9, and MOD33, (Mult. Symbol S4)

All motors are provided with standard leads of ample length for easy connection in the conduit box to the power leads. Lead size and material are dependent upon the class of insulation system in the motor and the current capacity required.

### Reconnection - MOD9

Reconnect dual voltage 9-lead or 12-lead motors to a 3-lead single voltage. Connection is made inside the motor frame. Specify desired voltage when ordering. On single phase motors, specify rotation. Lead-time is 2 days.

\*Part Winding Start and Star-delta connections are excluded.

### Remark Leads - MOD33

Using cloth markers, remark leads with numbers or letters. Please specify markings. Lead-time is 2 days.

### Longer Leads - MOD0

Extend leads up to two feet longer than standard by splicing. Splice will be visible in conduit box. Not available on explosion proof motors. Lead-time is 2 days.

### Mounting/Assembly - MOD1, and MOD39 (Mult. Symbol S4)

Motors listed are horizontal, foot mounted. Many stock motors can be furnished in assembly positions as illustrated. Modification may include repositioning of vents, baffles, drains, and conduit box. Also end brackets are assembled and grease fittings are properly installed for operation with the motor in the position shown. No attempt is made to locate fittings on any particular side of the motor. Horizontal Ball bearing motor assemblies W5, W6, W7, and W8 are not suitable for external thrusts in excess of rotor weight and half-coupling. Cast Iron ODP and TEFC, 360 and larger, are not suitable for vertical operation. Consult Engineering for TEFC Build Up. Lead-time is 2 days.

### Convert to Floor, Ceiling, or Wall Mount - MOD1

Convert standard F1 mount to F2, W1, W2, W3, W4, W5, W6, W7, W8, C1, or C2 mount. The mounting symbol is required when ordering to indicate the proper mounting. Lead-time is 2 days.

Example: Motor will be modified F1 to wall mounting W3.

W-8

### Adjustable Motor Bases - MOD39

Adjustable bases are a convenient means for adjusting belt tension or may be used as mounting plates. Adjustable motor bases are bolted to fixed base of motor prior to shipping. NEMA 215T and smaller bases feature one adjusting screw. Bases on NEMA 254T and larger feature two adjusting screws. Bases are not suitable for vertical mounting. Lead-time is 2 days.

### Nameplates / Markings - MOD7 (Mult. Symbol S4)

Nameplate material is mylar or stainless steel depending on motor design and enclosure.

### Additional Data on Nameplate

Motors can be re-nameplated for alternate ratings. Changes in horsepower, altitude, ambient, voltage, frequency, etc. Lead-time is 1 day.

### CE Mark

CE compliant mark can be provided for all non explosion proof NEMA frame motors. Many stock motors already contain the CE mark. Lead-time is 2 days.

## Rotation Arrow

All motors utilize bi-directional cooling fans. Specify rotation facing shaft extension on order entry form. Available on Single Phase only. Lead-time is 1 day.

## Stainless Steel Nameplate

Replace existing mylar nameplate with 304 stainless steel nameplate. Lead-time is 1 day.

## Separate Nameplate for Customer Data

A separate customer nameplate can be furnished. Information contained must be submitted at time of order. These additional nameplates cannot be supplied with CSA or UL Listings unless installed to motor in a Marathon Motors facility. Lead-time is 2 days.

## Packaging - MOD29

### (Mult. Symbol S4)

Heat Treated Pallets

ISPM-15 requires the use of heat-treated wooden packaging materials when shipping into all foreign countries (a temporary exemption exists for Canada). Modification includes replacement of wooden pallet with heat-treated pallet. Does not include export crating for ocean freight (contact factory for export packaging cost).

## Paint - MOD8

### (Mult. Symbol S4)

The standard paint finish is a two-coat paint system. The first coat is a rust-inhibitive primer applied to protect the castings during storage and manufacturing. The second coat is a powder coat on 48-140 frame, enamel on non-severe duty motors, or a 2-part epoxy on severe duty 180-5000 frame motors.

Special paints and color options are available if compatible and reviewed by application engineering. Paint chips and material safety data sheets are required.

## Repaint to a Marathon Stock Color

Repaint motor to another Marathon Motors stock paint color. Colors include: Marathon Motors Blue Chip™ blue, PowerWash™ white, farm duty black, Fire Pump red, light gray, or dark gray. Specify color on order. Leadtime on enamel paint is 2 days. Epoxy paint requires a 3 day lead-time.

## Screens - MOD0 (Mult. Symbol S4)

Corrosion resistant screens can be furnished over the air intake and discharge openings of cast iron Drip proof motors. Drip proof motors equipped with these screens conform to the Drip proof guarded definition appearing in NEMA MG-1, Part 1. Call for lead time.

## Service Factor - MOD7 (Mult. Symbol S4)

A multiplier that may be applied to the rated horsepower of a motor, which indicates a permissible horsepower loading at rated voltage and frequency. Lead-time is 1 day.

## AC Motor Service Factor Re-Rating

When a 1.15 Service Factor or higher is required, please refer to the list adder. Frame size is subject to change. Not available on explosion proof motors. Lead-time is 1 day.

## Severe Duty Construction - MOD16

### (Mult. Symbol S4)

This modification starts with a Marathon Blue Chip™ Totally Enclosed cast iron frame motor and reworks it to all cast iron construction. With additional enhancements, the motor is prepared for a severe or harsh industrial environment. (Domestic Built Product Only)

Remove polypropylene fan cover and sheet metal conduit box from the motor and replace with cast iron fan cover, threaded and gasketed conduit box, apply epoxy finish to motor exterior, and add brass drain and breather. Lead-time is 2 days.

## Shaft Modification - MOD0, and MOD42

### (Mult. Symbol S4)

Motors are furnished with a single straight shaft with sled runner keyway and a rectangular key. For motors in frames 143T through 449T, a long shaft for V-Belt drive is supplied. 2-Pole motors in frames 324 through 449 and certain other 4-Pole ratings are furnished with short shafts for direct connections. Modifications are for existing shafts only. Not applicable if a new shaft is required.

## Drill & Tap Hole - MOD42

Drilled radially or in the end of the shaft. Drilled and tapped in the end of the shaft. Lead-time is 3 days.

## TS Shaft - MOD42

Convert "T" frame shaft to a "TS" Frame shaft. Modify motor by reducing the shaft, adding new keyway, and shortening the shaft length to the NEMA "TS" dimension. Lead-time is 3 days.

## Mill Flat on Shaft - MOD0

Mill a flat on the drive end shaft extension. Provide detail of flat with the order. Lead-time is 3 days.

## Steps on Shaft - MOD0

One to three reductions in shaft diameter. Customer to specify number of reductions at time of order. Call for lead time.

# MOTORS | MARATHON ONLY MOTOR MODIFICATIONS

## Space Heaters - MOD12, and MOD41 (Mult. Symbol S4)

Space heaters are used to prevent the build-up of condensation on the windings of the motor when the motor is not operating. Space heaters are typically installed on the end-turns of the coils.

## Space Heaters - ODP & TEFC - MOD12

Space heaters can be furnished on Drip proof and totally enclosed motors. Heater leads are normally brought out to the motor conduit box. Heater voltage is available in three voltages for 60 Hz operation of 115, 230, or 460 volt, single-phase. Space heaters are sized per NEMA standards.

Lead-time is 2 days.

## Space Heaters - IEC Frames - MOD12

Space heaters can be furnished on IEC motors. Heater leads are normally brought out to the main terminal box. Heater voltage is available in two voltages for 50 Hz operation.

Lead-time is 2 days.

## Space Heaters - Explosion Proof - MOD41

Space heaters can be furnished on explosion proof motors. Heater leads are normally brought out to the motor conduit box. Heater voltage is available in three voltages for 60 Hz operation of 115, 230, or 460 volt, single-phase. Space heaters are sized per NEMA standards.

Lead-time is 2 days.

## Terminal Blocks - MOD0 (Mult. Symbol S4)

Conduit box mounted terminal blocks provide for a convenient termination of power leads. The terminal blocks are sized for the proper amperage and voltage of the motor. The Globetrotter® IEC motor has IEC terminal blocks as standard.

## Terminal Block

Install terminal blocks in conduit box of NEMA motor with lead connection. Customer to advise on lead connection. Call for lead-time. Contact factory to verify capability.

## Thermal Protection - MOD0, and MOD14 (Mult. Symbol S4)

Thermal protection are built in protective devices that prevent motor overheating. They work either by interrupting the power supply when the motor overheats or by incorporating a pilot device that opens the holding circuit of a magnetic starter or energizes an alarm bell or warning light.

## Thermostats - All Motors - MOD14

Thermostats are mounted on the stator winding and are temperature-sensing only, with normally closed snap action contacts. These devices are installed on the end-turns of the motor winding. Their purpose is to activate a warning device or shut down the motor upon excessive winding temperatures. The standard arrangement is the addition of 2 or 3 thermostats to the winding end-turns, connected in series with the leads brought out to the main motor conduit box. Class I Groups C & D / Class II Groups F & G Explosion Proof motors have hermetically sealed thermostats as standard.

Lead-time is 2 days.

## Thermistors - All Motors - MOD14

Thermistors are small, non-linear resistance devices placed on the stator windings. As the critical temperature is reached, the resistance of the thermistor changes radically, causing operation of a control relay. The standard arrangement is Q-3 positive temperature coefficient (PTC) type on winding end-turns with leads brought out to the main motor conduit box. On IEC motors the leads are brought into a conduit adjacent to the main conduit box and includes a terminal block. As standard, 3 Texas Instrument thermistors are furnished, one per phase. Control Module is available.

Lead-time is 2 days.

## Thermocouples - Non XP Motors - MOD0

Thermocouples sense temperature and offer inherent protection against abnormal stall and running conditions. The standard arrangement is the addition of an iron constantan thermocouple to the winding end turns or bearing housing with leads brought out to the main motor conduit box. Customer must specify number, type, and location at time of order.

Lead-time is 2 days.

## Weatherproofing/Special Service

### MOD5, and MOD49

#### (Mult. Symbol S4)

Weatherproofing or special service provides additional protection to windings and mechanical parts as well as special greases or modifications per industry specifications such as NEMA, or IEEE. Call for lead-time.

## Tropical Anti-Fungus Treatment - MOD5

Windings and mechanical parts coated with polyurethane for superior protection to resist tropical environments. Not available on brake motors.

Lead-time is 2 days.

## Hazardous Duty™ Service

### Division 2 Hazardous Motors - MOD49

The Division 2 hazardous modification incorporates a new fan, fan guard, and nameplate on most TEFC motors. XRI-SD and IEEE841 motors have Division 2 statement on the nameplate as standard. The nameplate will say "CSA certified, Group I, Division 2, Groups A, B, C, and D, Temperature Code.

(See chart below) Call for lead-time.

NEMA FRAME	SERVICE FACTOR	POWER SUPPLY	FREQUENCY RANGE	TEMP CODE
143-449T	1.0	SineWave	50-60Hz	T3
143-449T	1.0	PWM	3-120Hz	T2D
143-449T	1.15	SineWave	60Hz	T2B

Nameplate CFM	455
Volts	115
RPM	1500/1100
Amps	1.5
Speeds	2
Rotation	CW
Type	Shaded Pole
Bearings	Sleeve

## Fasco

Item ID	B45230
Nameplate CFM	460
Volts	208-230
RPM	1600/1400
Amps	1.2
Speeds	2
Rotation	CCW
Type	Shaded Pole
Bearings	Sleeve

## Fasco

Item ID	B45267
Nameplate CFM	460
Volts	115
RPM at Free Air	1600/1400
Amps at Free Air	2.90
Speeds	2
Bearing	Sleeve
Hertz	60

## Fasco

Item ID	B68042
Nameplate CFM	815
Volts	115
RPM	1100
Amps	5.6
Speeds	1
Rotation	CW
Type	Shaded Pole
Bearings	Sleeve

## Fasco

Item ID	A1000
Nameplate CFM	1000
Volts	115/230
RPM	1100/1100
Amps	4-2.9/2-1.4
Speeds	2
Rotation	CW
Type	Shaded Pole
Bearings	Sleeve

## Fasco

Item ID	A1200
Nameplate CFM	1200
Volts	115/230
RPM	1500/1400
Amps	8-6.8/4-3.4
Speeds	2
Rotation	CW
Type	Shaded Pole
Bearings	Sleeve

## Direct OEM Replacements for Water Heaters

5. 56H, 143T, and 145T Combination Base with 12 mounting holes

Z. 56HZ with 7/8" shaft dia., 3-1/2" shaft height, and slotted 56 frame base

## Carrier, PSC, Open Air Over, Resilient Ring & Thru-Bolt Mount

### Features

- Ball bearings
- Multi-speed capability, as noted
- Resilient ring/belly band mount
- Capacitor not included, see Electrical section

Item ID	HP	RPM	Volts	Frame	Model No.	F.L. Amps	Weight (lbs.)	Frame Length (in.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Replaces	Notes

### Notes:

16. Fixed CCW Rotation, viewing opposite shaft (or lead end) of motor  
39. No thru-bolts, shaft end

51. Does not include resilient rings, see Electrical Section  
68. Rated 60/50 hertz, 190/380 or 380 volt at next lower horsepower  
Replacements listed may not be an exact duplicate of the original motor

## Carrier, PSC, Open Air Over

### Features

- Single and multi-speed models, as noted
- 3 lug mounting
- Ball bearings (except as noted)
- Capacitor not included, see Electrical section

**Notes:**

42. Includes Cord and Plug  
189. Includes reversing plug

304. Run capacitor mounted on motor shell  
329. Motor has 4 studs on both ends

498. 50/60 Hertz  
499. Identical bolt pattern as OEM motor

500. Includes Cord and Lyall Plug  
551. Low Temp. Oil

## Hill Refrigeration, PSC, Open Air Over

### Features

- Resilient base
- Ball bearings
- Capacitor included

Item ID	HP	RPM	Volts	Frame	Model No.	F.L. Amps	Weight (lbs.)	Frame Length (in.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Replaces	Notes

**Notes:**  
87. Includes straight Lyall plug

551. Low Temp. Oil

## Huebsch, Single Phase, Drip proof, Resilient Base

### Application

Commercial laundry dryer motors.

### Features

- Replaces Huebsch commercial laundry dryer motors
- Automatic reset thermal protection
- Special threaded shaft extension
- Ball bearings

Item ID	HP	RPM	Volts	Frame	Model No.	F.L. Amps	Weight (lbs.)	Shaft Dim. (in.)	Length Less Shaft (in.)	Notes

POE OIL!  
FOR MORE  
VERSILITY**

## BRISTOL COMPRESSORS

### H2EB

- Improved sound and vibration levels
- Reduced suction and discharge pulsations
- Increased energy efficiency
- Enhanced capacity
- Extended voltage range for selected models
- Approved for R22/R407C
- Charged with POE oil
- See Page 216

### HTRB AND HTRJ

- Trane **drop-in** replacement with rotolock connections
- Includes sweat adapters and wiring harness
- Approved for R22/R407C
- Charged with POE oil

### HCRB

- Copeland **drop-in** replacement
- Includes wiring harness
- Approved for R22/R407C
- Charged with POE oil
- See Page 217

## Bristol Residential Heat Pump And AC Reciprocating Compressors

H22J

H22A

### Features

- Single phase and three phase
- Designed for easy drop in installation in air conditioning and heat pump applications
- Quick connect wiring connections
- Direct replacement compressors for OEM applications
- Compressors come with internal high pressure relief valve and internal linebreak motor protection
- Compressors come completely dehydrated, fully oil charged with mounting hardware and terminal cover

## Bristol Commercial Air Conditioning Reciprocating Compressors

### Features

- Completely dehydrated, fully oil charged with mounting hardware and terminal cover provided
- Single and two speed compressors
- Internal line break protection through 12 HP
- 15HP through 24HP compressors shipped with external protective module
- Available with Rotolock and Sweat connections
- Available with sight glass
- See compressor accessories on page 255-265
- H92G series are charged with POE Oil for use with R407C and R22

## Bristol Commercial Air Conditioning Reciprocating Compressors

Rotolock with Sight Glass

H2DA Series

### Features

- Completely dehydrated, fully oil charged with mounting hardware and terminal cover provided
- Single and two speed compressors
- Internal line break protection through 12 HP
- 15HP through 24HP compressors shipped with external protective module
- Available with Rotolock and Sweat connections
- Available with sight glass
- See compressor accessories on page 250-265
- H92G series are charged with POE Oil for use with R407C and R22
- H2DA series are charged with Mineral Oil for use with R22 only

## H Series - Residential and Light Commercial Scroll Compressors

Danfoss Residential and Light Commercial Air Conditioning Scroll Compressors install quickly and easily and feature a design that minimizes internal parts, decreasing the overall weight and significantly reducing noise during operation. With a bolt pattern and

liquid and suction line connections that line up with those of other major scroll compressor manufacturers, Danfoss scroll compressors can be used to replace compressors made by nearly any company.

See page 262 for wire harness specs.

## Danfoss Residential Heat Pump And Commercial AC

### Features

- Carrier and Bristol direct replacements
- High-quality, quiet, and easy to install
- Universal replacement for air conditioning and heat pump applications
- Same 7.5" square bolt pattern with similar suction/discharge connection heights as Copeland
- Lighter and quieter with 30% fewer parts than Copeland
- Unloaded scroll set eliminates the need for start capacitor
- Superior thermal fault protection (blocked TXV, loss of charge, etc.)

## S Series - Light Commercial and Commercial Scroll Compressors

Danfoss Performer® Universal Scroll Compressors are designed to serve as quick, easy replacements for most commercial air conditioning scroll compressors. These compressors come with a bolt

pattern, suction and discharge lines, and performance characteristics that match up directly with some competitors' products.

### Nomenclature / Model No.

## Commercial Air Conditioning Scroll Compressors

### Features

- Economical **Trane Direct Replacements**
- All SM115-SM185 compressors feature brazed connections and thermostat motor protection
- "Q" as the 7th digit denotes that the compressor has a bracket to enable tandem installation
- Fully oil charged with mounting kit with grommets, bolts, nuts, sleeves and washers
- Standard SM product includes sight glass along with oil pick up tube and Schrader Valve for easy oil removal

Item ID	MFG #	Volts-Phase-Hertz	Capacity (BTU)	Discharge ODF (In.)	Suction ODF (In.)	Replaces

## A HIGH QUALITY OEM DROP-IN REPLACEMENT

### QUIET START-UP AND SHUT-DOWN

Discharge check valve minimizes sound

### INTERNAL OVERLOAD PROTECTION

Thermal switch protects the compressor motor from overheating

### DISCHARGE TEMPERATURE SENSOR

External thermal sensor protects the scroll mechanism from overheating

### INTERNAL PRESSURE RELIEF

A relief valve that opens to protect against high internal pressure

← **SQUARE MOUNT FOR A QUICK AND EASY INSTALL**

## LG Scroll Compressors

### Features

- **Quiet Start-up and Shut-down:** Sound is minimized by a check valve in the discharge port of the scroll sets
- **Discharge Temperature Protection (DTS):** External thermal sensor protects against excessively high scroll temperatures
- **Internal Pressure Relief (IPR):** Relief valve opens at very high internal pressures protecting the unit
- **Internal Motor Overload Protection (OLP):** Thermal switch senses high temperature of the compressor motor windings

## Danfoss/Nidec (Secop) Refrigeration Compressors

### Features

- Triple duty compressors that may be used in low, medium and high temperature applications (Copeland and Tecumseh Replacements)
- Replacement compressors for food service equipment, vending machines, bottle coolers, ice machines and other refrigeration equipment
- The BD Compressor (Battery Driven) has been widely used in N. America for over 20 years by OEM's such as Dometic in the transportation, marine and medical sectors

## Maneurop® Reciprocating NTZ Series Compressors

### Features

- Maneurop NTZ series hermetic reciprocating compressors are designed for low evaporating temperature applications.
- The NTZ series is specifically designed for use with the HFC refrigerants R-404A and R-507A, using 160PZ polyester oil as lubricant.
- All compressors come with threaded sight glass and 3/8" oil equalization connection
- Parts shipped with compressor:
  - Mounting kit with grommets, bolts, nuts, sleeves and washers
  - Suction and discharge solder sleeves, rotolock nuts and gaskets
  - Initial oil charge and installation instructions

<sup>1</sup> Evaporator temperature = -25°F, condensing temperature = 105°F, superheat = 20°F, subcooling = 0°F

<sup>2</sup> Single compressor, threaded sight glass, 3/8" oil equalization connection

## Maneurop® Reciprocating MTZ Series Compressors

### Features

- Maneurop MTZ series hermetic reciprocating compressors are designed for medium and high evaporating temperature applications.
- The MTZ series is specifically designed for use with the HFC refrigerants R-407C, R-134a, R-404A, and R-507A, using 160PZ polyester oil as lubricant.
- Replacement for Trane Compressors

1. Evaporator temperature = -25°F, condensing temperature = 105°F, superheat = 20°F, subcooling = 0°F

2. Single compressor, threaded sight glass, 3/8" oil equalization connection

3. These compressor models have threaded sight glass and 3/8" flare oil equalization line.

4. Evaporator temperature = 45°F, condensing temperature = 130°F, superheat = 20°F, subcooling = 15°F.

5. To determine the nominal capacity for R-407C, visit [www.danfoss.com/odsg](http://www.danfoss.com/odsg).

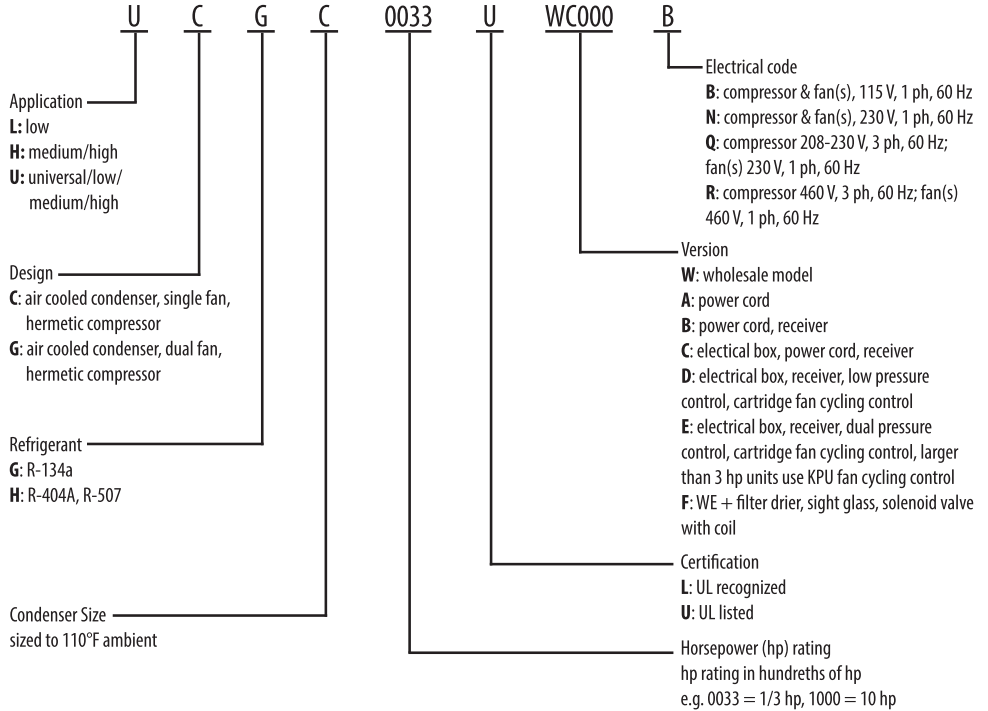

6. Actual connection for MTZ 22-28 (208-230/1/60) is rotolock 1 1/4" x 1" and connection with supplied sleeve is 5/8" x 1/2" ODF.

## Danfoss Refrigeration Condensing Units

### Features

- Broad range of condensing units from 1 1/2 HP to 13 1/2 HP
- Designed for specific applications
- WF version includes: Electrical box, receiver, dual pressure control, fan cycling control, dual fan units larger than 3 HP use KPU fan cycling control, filter drier, sight glass, solenoid valve with coil.

## Danfoss Refrigeration Condensing Units

### Features

- Broad range of condensing units from 1 1/2 HP to 13 1/2 HP
- Designed for specific applications
- WF version includes: Electrical box, receiver, dual pressure control, fan cycling control, dual fan units larger than 3 HP use KPU fan cycling control, filter drier, sight glass, solenoid valve with coil.

## Liquid Chillers

### Applications

- 1/2 - 80 tons

### Features

- Easy to install
  - Compact size means it fits easily into confined spaces, especially when replacing a much larger shell-and tube heat exchanger
- High Performance
  - High turbulence created by corrugations in the plates results in closer approach temperatures with much smaller units
  - Fully brazed construction handles high operating pressures
  - Copper brazed 316L stainless heat transfer plates
- Proven and Reliable
  - UL listed and ASME Section VIII available
  - Every heat exchanger is tested before it leaves the plant

Maximum Allowable Working Pressure: 650 psig (45 Bar)

## TechTip

from Packard Academy

In brazed plate heat exchangers (BPHE) the #1 mode of failure is freezing. Do not cool water below 33° F. In water chiller applications the low pressure cut-out on the refrigerant side should be set no lower than 28° F, based on evaporator refrigerant pressure at this temperature.

Maximum Allowable Working Pressure: 650 psig (45 Bar)

## Subcoolers

### Applications

- 1 to 120 tons

### Features

- Easy to install - Compact size means it fits easily into confined spaces, especially when replacing a much larger shell-and tube heat exchanger
- High Performance
  - High turbulence created by corrugations in the plates results in closer approach temperatures with much smaller units
  - Fully brazed construction handles high operating pressures
- Copper brazed 316L stainless heat transfer plates
- Proven and Reliable
  - Every heat exchanger is tested before it leaves the plant

Maximum Allowable Working Pressure: 300 psig (20.7 Bar)

## GBE Economy Models

### Features

- An economical solution for decentralized hot water systems, separating systems and various regenerative applications
- Compact brazed plate heat exchangers designed for hydronics
- Applications with up to 30 bar/435 psi and max. 200°C/392°F
- High thermal efficient plate heat exchangers
- Handle everything with minimal size and weight for maximal efficiency, quality and profitability

Item ID	Standard Connection	Depth (in.)	Weight (lbs.)

## Vacnox Brazed Liquid Heat Exchanger

### Features

- Vacnox Stainless Steel Heat Transfer Plates
  - Vacnox is a new, unique and revolutionary technology for a solid/resistant connection of stainless steel plates
  - Vacnox is the solution for applications with aggressive media and high pressures
- High Performance
  - High turbulence created by corrugations in plates results in closer approach temperatures with much smaller units
  - Handle high temperatures and pressures up to 35 bar/508 psi with special brazing filler free of non-ferrous metals
- Easy to install
  - Compact size means it fits easily into confined spaces when replacing a much larger shell-and tube heat exchanger
- Proven and Reliable
  - UL listed and ASME Section VIII available
  - Every heat exchanger is tested before it leaves the plant

Item ID	Standard Connection	Depth (in.)	Weight (lbs.)
<b>5" x 12" Models (4.9"W x 13.2"H)</b>			
GVH400H-8	1 MPT	1.2	6
GVH400H-10	1 MPT	1.4	6
GVH400H-12	1 MPT	1.6	7

GVH400H-50	1 1/4 MPT	5	18

Maximum Allowable Working Pressure: 363 psig (25 Bar)

**WE OWN  
PACKARD!**

*Our Indy Team!*

**CALL US for more information about the GNS and GB-DW Series and place your order!**

## GNS Series

### Features

- When resistance of copper is not enough, nickel as brazing material is chosen
- This series has all advantages of a brazed plate heat exchanger, but it is more stable against corrosive media such as ammonia, deionised water, sulphides and sulphates
- A wide range of applications up to 200°C/392°F and 16 bar/232 psi the demands of the market
- Proven technical features like Safety Chamber™, Delta Injection™ and Full Flow System™ available
- 75% is made of pure nickel

GNS400H	(100 plates max.)	4.9" x 13.2"
GNS500H	(100 plates max.)	4.9" x 20.9"
GNS700L/M	(150 plates max.)	10.7" x 20.9"

## GB-DW Series

### Features

- Double-walled for better protection
- Heat exchangers consist of double-walled, hermetically sealed plates
- Two stainless steel plates instead of one
- Second wall not only separates the media from each other, but also makes the leak visible
- Reliability, efficiency and highest safety in one product

GBS-DW400H	(100 plates max.)	4.9" x 13.2"
GBS-DW500H	(100 plates max.)	4.9" x 20.9"

232 psig/16 bar models also available

## Mounting Brackets

### Features

- Holding a brazed plate heat exchanger in place while you pipe it up can be a difficult challenge, especially with sweat connections. Kelvion makes this easy to prevent. Most Kelvion brazed plate heat exchanger is equipped as standard with mounting studs which allow the use of our proprietary mounting brackets.
- Bracket is made of AISI 304 stainless steel

Model	Description	Weight (lbs.)
BKT5X12	Mounting Bracket (5x12)	1.1
BKT5X20	Mounting Bracket (5x20)	2.2
BKT10X20	Mounting Bracket (10x20), Max 40 Tons	3.1
FR10X20	Mounting Bracket (10x20), Max 80 Tons	4.9

## Y Strainers

### Features

- It is important to keep the liquid media clean to reduce fouling and clogging of the Kelvion heat exchanger. In some cases, it is a requirement for operation of the system. We stock sizes up to 2-1/2".
- Construction material is cast bronze
- They are rated for working pressure of 400 psig at 150°F
- Connections at both ends are Female Pipe Thread (FPT)
- The 20 mesh filter is removable and cleanable

Model	Pipe Connection	Mesh	GPM @ 1 psi PD	GPM @ 2 psi PD	Weight (lbs.)

## Danfoss TUA/TUAE Series Expansion Valves, Bodies and Orifices

### 1. Valve Body Selection

Equalization	R-22	R-404A	R-134a
Internal	<b>068U2235</b>	<b>068U2285</b>	<b>068U2205</b>
External	<b>068U2237</b>	<b>068U2287</b>	<b>068U2207</b>

All valves above have 3/8" x 1/2" solder ODF connections and are designed for evaporator temperatures -40°F to 50°F (N charge). Other variations available upon request.

### 2. Orifice Selection

TUA/TUAE valve capacities are based on the installed orifice. To select the correct size, use one of the two methods below:

A. System characteristics: Select the orifice using appropriate refrigerant, evaporator temperature, and system capacity.

OR

B. Nominal capacity of the installed valve; Use the nominal capacity of the originally installed valve and match with the nominal capacity in chart (3rd. column from left.)

**IF EXACT CAPACITY IS NOT FOUND, USE NEXT LARGER ORIFICE**

R-22		Evaporator Temperature (°F)

## Thermostatic Expansion Valves for Ice Machines, Type TUA

### Application

TUA universal thermostatic expansion valve kits for ice machines. These kits are designed with the contractor in mind to help save time and money by providing a universal valve that can easily be adapted to replace most OEM specific thermostatic expansion valves.

### Features

- Can easily be adapted to replace most OEM specific thermostatic expansion valves
- **Used in Manitowac and other Ice Machines**
- Each kit includes an exchangeable orifice valve and a selection of (3) orifice sizes covering ice machines ranging from 75 to 2300 pounds of ice per day
- The kits also include copper fittings (2 elbows and 1 reducer), copper bulb strap, insulation tape and instructions to allow for replacement of most OEM expansion valves originally installed

Item ID	068U4900 <sup>1</sup>	
Cuber	Flaker/Nugget	
	Nameplate lbs. of ice/24 hrs per valve	Estimated orifice size
75 to 150	75 to 200	1
151 to 350	201 to 500	3
351 to 600	501 to 950	5

Valve in kit above has straightway 1/4" x 3/8" ODF connections.

Item ID	068U4901 <sup>1</sup>	
Cuber	Flaker/Nugget	
	Nameplate lbs. of ice/24 hrs per valve	Estimated orifice size
351 to 600	501 to 950	5
601 to 1200	951 to 1650	7
1201 to 1800	1651 to 2300	8

Valve in kit above has straightway 3/8" x 1/2" ODF connections.

<sup>1</sup>Ice machine kits contain valve, (3) orifices in corresponding tables, (2) elbow fittings

**I OWN  
PACKARD!**

*I'm proud to be a Packard employee owner because...*

Quality HVACR products and timely customer service are Packard's areas of excellence.

To deliver those experiences as a Packard employee owner brings me an immense sense of pride. 🙌

**CHAD ROGHAI**  
Regional Sales Manager

## Danfoss TGE Series Fixed Orifice, Adjustable Superheat Expansion Valves

TGE is a series of TXV's for R22/R407C, R134A, R404A and R410A with a fixed orifice. The hermetic design meets demands into the future for a wide range of application that includes: Commercial air conditioning systems, Heat Pumps, Chillers, Transport refrigeration.

### Features

- Stainless steel capillary tube and bulb
- Laser welded stainless steel power element
- 2-way balance port
- Adjustable superheat
- MAH (Maximum Operating Pressure Anti-Hunt) charge standard for R22/R407C and R410A
- N charge standard for R404A
- Straight-way flow
- Maximum working pressure 667psi

## Danfoss TR6 Air Conditioning And Heat Pump Expansion Valve Kits

### Features

- Complete with valve, bulb strap and instructions
- Includes Aeroquip and Chatleff fittings normally found in most evaporators
- Anti-hunt bulb charge
- Retrofit unit with a capillary tube for energy efficiency upgrade
- Contractor friendly bulb strap
- Durable stainless steel power element and capillary tube
- Ideal to optimize performance of mismatched system
- Internal check valve permits use in heat pump systems

## Danfoss Pressure Regulators- EPR, CPR, Head Pressure, Hot Gas Bypass

### Features

- All valves may be used with all CFC, HCFC or HFC, except R410A
- Hermetic brazed construction - 100% leak tested
- Stainless steel elbows
- Built-in valve seat dampening design
- 1/4" Schrader valve for pressure testing
- Pressure regulation side:
  - KVP/KVR- opens on a rising pressure
  - KVC/KVL- opens on a falling pressure

# VALVES AND SIGHT GLASSES

## Danfoss Ball Valves

**Maximum flow in open position, Maximum tightness in closed position**  
 GBC valves are used in liquid, suction and hot gas lines in all refrigeration and air-conditioning systems with fluorinated refrigerants. Danfoss GBC ball valves are manually operated shut-off valves suitable for bi-directional flow. The valve concept includes a high precision laser welding ensuring both a strong and a light slim line valve body design. The design, weld, and choice of the sealing material enables the ball valves to meet the most demanding requirements, for example, the high working pressure when operating with R410A.

### Features

- UL and CUL recognized
- Seal cap with retaining strap
- Has a pressure rating of 650 psi and is approved for R410A
- Precision laser welded
- Rotation stops and position indicator
- Full flow with minimum pressure drop
- Panel mounting holes
- Bi-directional flow – valve orientation is unimportant
- Slimline design ensures easy operational handling
- Burst proof spindle design prevents liquid from being trapped internally
- Teflon valve seat to secure maximum tightness and a long lifetime
- Access port with schrader valve reduces cost if service of the system is necessary

## Danfoss Liquid Line Filter Driers

Black, high-quality and durable coating offers a cleaner appearance after brazing.

Easy to remove pull-off cap for sweat or twist-off cap for flare.

One-piece plasma welded shell minimizes risk of refrigerant loss.

Eliminator<sup>®</sup> core for the highest possible drying capacity.

High dirt retention - down to 25 µm particles - with minimal pressure drop.

### Features

- Solid core design
- Mixture of molecular sieve and activated alumina ensures excellent absorption of moisture and acid
- Greater protection against contaminants
- Industry leading moisture capacity
- Solid copper connections for easy installation

## Danfoss Filter Drier Cores

Item ID	Description	Material
<b>Danfoss</b>		
023U1392	DCR core insert, type 48-DM solid core	100% molecular sieve
023U4381	DCR core insert, type 48-DC solid core	80% molecular sieve & 20% activated alumina
023U5381	DCR core insert, type 48-DA solid core	30% molecular sieve & 70% activated alumina

## Danfoss Suction Line Driers

### Features

- Solid core design with mixture of activated alumina and molecular sieve maximizes acid and moisture absorption
- Contains two schrader valves for measuring pressure drop across the drier
- Burn out drier to be installed ahead of compressor

## Danfoss Heat Pump Biflow Filter Driers

### Features

- Solid core design
- Check valves are insensitive to dirt and give minimum restriction regardless of flow direction
- Industry leading moisture capacity
- No dirt released in reverse flow
- High dirt retention – down to 25 µm particles with minimal pressure drop

## Spun Copper Driers

### Features

- All Copper Shells
- 100% Molecular Sieve with XH9 and XH11 desiccants
- Fully Compatible with ALL new refrigerants

\* PD4178: New breakthrough drier with UV Dye already installed in the drier to make it easy to locate leaks in sealed systems.

## Danfoss KPU Pressure Controls

### Features

- Designed with contractor input
- Fingertip reset
- High visibility contrast scale
- Fail-safe bellows available
- Durable, rust proof plastic cover
- Universal mounting bracket
- Snap action switch
- Easy to maintain and access contacts with 24 FLA rating
- Large connector area
- Easy, direct replacements for most competitor controls
- Finger-tip test for contact operation

**ADOPTED BY

<sup>1</sup>Competitor Part No. equipped with capillary tube for all but P170LB1 which has flare connection.

<sup>2</sup>KPU 6 and the high pressure side of KPU 16 are designed with fail-safe double bellows.

<sup>3</sup>Convertible reset controls can be adjusted for either automatic or manual reset.

All controls are supplied with universal mounting brackets and mounting screws. Ambient temperature: -40° F to +122° F (175° F for maximum 2 hours).

KPU 1, 2, 6, 16 suitable for all HFC refrigerants, including R-410A.

## Cartridge Pressure Controls

### Features

- 18 inch leads
- Hermetically sealed
- Tamper proof construction
- Direct mounting on tubing
- For use in residential and commercial A/C and commercial refrigeration
- 100% tested
- Contacts rated at 6 amps, 24-240 volts
- UL recognized

## Differential Pressure Control / Lube Oil Protection Control, Type MP

**ADOPTED BY ORIGINAL EQUIPMENT MANUFACTURERS**

### Application

Used to protect refrigeration compressors against low oil pressure. Compatible with HCFC and non-flammable HFC refrigerants.

### Features

- Reliable, long life stainless steel bellows
- Sturdy metal cover and universal mounting hole patterns
- Integral 1/2" NPSM swivel connection allows direct attachment of 1/2" male pipe thread connector
- Simple manual trip, electrical test function eliminates need of tools and test "jumper" wires
- Suitable for both alternating and direct current (AC and DC)
- Versions available with adjustable or fixed differential

## Thermostat Type KPU

### Features

- Eliminates temperature fluctuations.
- Reliable and robust SPST and SPDT contact system, copper capillary tubing and bulb are stout to resist breakages.

**Replaces Penn/Johnson Controls and many others thermostats.**

<sup>1</sup>Bulb must be installed in colder position than thermostat housing and capillary tube.

<sup>2</sup>Temperature variations in excess of 70° F between sensing bulb, housing, and capillary tube will influence scale accuracy.

## Three Wire Compressor Terminal Repair Kits

### Features

- The Term-Lok Kit was designed for the repair of burned or damaged spade terminals or for non burned terminals to prevent future burn off.
- They are made of high quality, heat sensed brass and are guaranteed for the life of the compressor.

### Includes:

- Brass cylindrical tube with a diameter large enough to slip over the pins
- Stainless set screw to lock onto the terminal
- Wrench for easy installation
- Anti-arcing spacer to prevent arcing between posts
- Will never crack, break or burn off
- Provides four full points of contact on the new terminal

Item ID	Gauge	Services
<b>Term-LOK</b>		
TLC38	8	5 ton units and above
TLC310	10	3 - 5 ton units
TLC312	12	1 - 3 ton units

## Bristol and Danfoss Wiring Harnesses

### Features

- Most compressor failures may be attributed to mis-wiring the compressor. These wiring harnesses with molded plug help to eliminate costly mis-wires and eliminates the guess work out of wiring in the compressor. The Wiring Harness provides a low cost solution by getting the serviceman to the next job faster.
- For Bristol or Danfoss compressors

# COMPRESSOR ACCESSORIES

## Universal Self Regulating Crankcase Heater

### Applications

Used on refrigeration compressors up to 5 HP and 40" circumference in non-hazardous locations.

### Features

- UNIVERSAL - Self Regulating
- Pre-stripped leads
- Flexible Lockstrap
- 60 watts at 0°F
- No thermostat required

Item ID	Length (in.)	Lead Length (in.)	Volts	Replaces

## Tutco Crankcase Heaters

### Features

- High temperature silicone rubber element and VW-1 insulated lead wires rated for 150°C
- Wattage for each model matches compressor requirements
- Nominal power consumption due to highly efficient heat transmission and low wattage
- Voltage ratings through 600 VAC
- Corrosion resistant exterior
- Completely moisture-proof
- Quick and easy installation
- UL recognized
- Custom leads and terminations available

### Notes:

Compressors with sweat fittings or brazed fittings cannot be adapted to Rotolocks.

## Two Wire Electro-Mechanical Voltage Sensing Relay

### Features

- Potential relay and start capacitor for compressor hard start applications
- More reliable than PTC type hard starts
- Two wire connection
- For use with Hermetic or Scroll compressors
- Quick connect terminals
- Bleed down resistor to safely discharge the capacitor

Item ID	Capacitor Size (µF)	Tons	Compressor	Pick-Up Voltage (VAC)	Maximum Coil Voltage (VAC)	Replaces
<b>TorQstart</b>						
TQS1	189-227	1.5 - 3	Recip and Scroll	239-268	502	T0-5 SK3W3

## Hard Start Kits And All In One Hard Start Packs

### Standard PTC Relay and Hard Start Capacitor

### Features

- Increases compressor starting torque for faster recycling
- For all permanent split capacitor, single phase air conditioning and heat pump systems
- Wired with "Piggy-Back" terminals for easy installation on run capacitors
- Designed for 115 volt thru 277 volt systems
- Mounts easily with either screw or clip

### All Purpose 3-N-1 Kit

### Features

- Combination relay, overload and capacitor
- Pre-wired for easy installation
- Extra long compressor leads for mounting flexibility
- All models adapt to 115 volt compressors with external overload protector

# What's inside matters when it comes to HVACR...

●●● Packard stocks virtually every commercial refrigeration component for a complete package.

# CONTROLS

Innovative technology is ever-present in our controls. Shop products that offer dependability, quality and customizable features.

# Through innovation, comes affordability!

*Designed around capacitive touch sensing technology, the new and innovative I<sup>3</sup>™ – Series Touch Thermostats from ICM Controls feature huge displays and a patent-pending dynamic interface for intuitive programming that uses familiar icons that illuminate only when they are needed – all for an amazingly affordable price!*

## Features:

- **Large Display** – Touch icons positioned off display for larger viewing area; keeps display clean of fingerprints
- **Buttonless/Switchless Front** – No mechanical buttons or switches to break or wear
- **Dynamic Interface** – Highly intuitive - patent-pending! Icons illuminate ONLY when they are needed
- **Customizable Printed Interface** – Color and plastic can be customized
- **Customizable Icons** – Can use branded icons, or those found on most cell phones, in any desired backlit color
- **Humidity Control** – Humidity control model available
- **Positioning** – Thin profile ideal for either “in control” or “wall mount” applications
- **Mounting Base** – Designed with sub base to make installation a “snap”
- **Removable Logo Plate** – Great for customers to promote their business
- **WiFi** – WiFi compatible model available with user friendly connectivity
- **Thermal Safety** – Excessive heating bi-metal safety switch
- **User Coded Lockout** – Designed with renters and children in mind

## Dimensions

## Specifications:

- 6 (1A) relay outputs
- Dual powered – 24 VAC, 2 AA batteries & power stealing
- Remote temperature monitoring inputs (optional)
- Humidification/dehumidification (optional)
- WiFi (optional)
- Sub-base terminations
- Up to 13 buttons for customization

## Typical Applications:

- Temperature controls
- Appliances
- Pool & spa
- Test equipment
- Security locks
- Kiosks/POS displays
- And lots more!

## Thermostats

### Features

- Through innovation comes affordability! ICM's Programmable I<sup>3</sup> Series of touch thermostats is designed around a unique way of using capacitive sensing technology to bring affordability to the touch marketplace. Each model features a huge display and a patent-pending dynamic interface for intuitive programming that makes installation and set up incredibly easy.
- Large Display: Touch icons positioned off display for larger viewing area; keeps display clean of fingerprints
- Buttonless/Switchless Front: No mechanical buttons or switches to break or wear
- Dynamic Interface: Highly intuitive – patent-pending! Icons illuminate ONLY when they are needed
- Customizable Printed Interface: Color and plastic can be customized
- Customizable Icons: Can use branded icons, or those found on most cell phones, in any desired backlit color
- Wi-Fi: Wi-Fi compatible model available with user friendly connectivity
- Humidity Control: Humidity Control model available
- Dual Fuel Compatibility: On all 3H/2C models
- Positioning: Thin profile ideal for either “in control” or “wall mount” applications
- Mounting Base: Designed with sub base to make installation a “snap”
- Removable Logo Plate: Great for customers to promote their business
- Thermal Safety: Excessive heating bi-metal safety switch
- User Coded Lockout: Designed with renters and children in mind

Simple to install.  
Simple to operate.  
Simply dependable.

**SimpleComfort®** means simple control for year-round comfort and energy savings. These elegantly designed thermostats are extra rugged, highly reliable and accurate — ready for many years of worry-free operation. Simply perfect for residential or light commercial new construction or replacement. Easy, intuitive operation makes it simple to match temperature to any family's lifestyle. And with exclusive **SimpleComfort®** staging control, you can easily configure for optimum energy savings — or extra comfort.

#### **SimpleComfort® thermostats feature:**

- Vertical or horizontal mounting options (model dependent)
- Large display
- Precise temperature sensing
- Accuracy:  $\pm 1^{\circ}\text{F}$
- Easy access terminal block
- Soft touch controls
- Adjustable temperature differential
- Zoning system compatible
- Integrated four-minute short-cycle protection
- Mercury-free, environmentally safe
- Status LEDs

## Simple to install and operate enhanced quality features

Simplicity is in its name. ICM Controls **SimpleComfort® PRO** thermostats feature innovation and technology that delivers measurable value, simplifies installation and increases profitability. Blending the latest advances in thermostat technology with our new, patented **thermal intrusion barrier** and patented **SimpleSet™ Target Programming**, our **PRO** series thermostats set new industry standards exclusive to ICM Controls.

### **SimpleComfort® PRO** thermostats feature:

- Flexible 7-day, 5-2-day and 5-1-1-day programming (5000 series models only)
- ICM patented **thermal intrusion barrier**
- New ICM patented **SimpleSet™ Target Programming** technology
- Large display with backlight
- Permanent memory
- Accuracy:  $\pm 1^{\circ}\text{F}$ ,  $\pm 0.5^{\circ}\text{C}$
- Manual or auto changeover
- Field adjustable calibration
- Adjustable maximum heat/minimum cool setpoints
- Extra comfort and energy savings modes between stages
- Adjustable temperature differential
- Integrated four-minute short-cycle protection
- Configurable remote sensor compatible
- Mercury-free, environmentally safe
- Selectable  $^{\circ}\text{F}$  or  $^{\circ}\text{C}$
- Keypad lockout
- Soft-touch controls
- Remote sensor compatible
- Status LEDs

	<p><b>FS40</b></p> <ul style="list-style-type: none"> <li>• When it comes to freezing cold temperatures, you can relax knowing that ICM's Frost Sentry™ is on guard. This low-cost, single-set point thermostat is perfect for areas requiring temporary or permanent freeze protection. Its special foam backing improves accuracy by providing separation from the wall at installation, while sealing up any unsightly wiring holes. This insulated backing helps eliminate the risk of "wall effect" (wall temperature causing false temperature readings). Ideal for storage areas, garages, workshops, crawl spaces, and other critical areas where protection from extreme cold is essential.</li> <li>• Easy, 2-wire installation</li> <li>• Fixed set point at 40°F</li> <li>• Special foam backing improves accuracy</li> <li>• Compatible with most standard electric heating units</li> <li>• Ideal for storage areas, garages, workshops and crawl spaces</li> </ul>	<ul style="list-style-type: none"> <li>• Input: 18-30 VAC</li> <li>• Output: 2 amp maximum</li> <li>• Temperature Set Point: Fixed 40°F</li> <li>• Accuracy: +/- 5°F</li> </ul>	R, W, G

## Thermostats

### Features

- One-time configurable temperature minimum/maximum set points
- Patent-pending Abnormal Rate of Change (ARC) detection technology
- Placebo option
- 7-Day, 5-2 day, and 5-1-1 day programming (programmable models only)
- Auto and/or manual changeover
- Large, digital backlit display
- Selectable °F and °C
- Precise temperature sensing (accuracy  $\pm 1^\circ\text{F}$ )
- Patented Thermal Intrusion Barrier
- Permanent memory
- Adjustable temperature differential
- Easy-access terminal block
- Integrated 4-minute short-cycle timer
- Soft-touch controls
- Status LEDs (all models but MP2010L)
- Mercury-free, environmentally safe

### Specifications

- Electrical Rating: 24 VAC (18-30 VAC)
  - 1 amp maximum per terminal
  - 3 amp maximum total load (4 amps on multiple-stage units)
- Temperature control ranges:
  - 45°F to 75°F Heat (7°C to 24°C)
  - 70°F to 90°F Cool (21°C to 32°C)

## Dryout Thermostats

### Features

- Two-wire installation
- Four fixed setpoint models to choose from 60°F to 75°F
- Temporary use for dryout applications
- Can be used as a low ambient cutoff switch

### Specifications

- Input: 18-30 VAC
- Output: 2 amp maximum
- Temperature Control Range: 60°F to 75°F (±9°F)

## Air Pressure Sensing Switch Kits

Manufactured by  
CLEVELAND CONTROLS

### Features

- Mounts with the diaphragm in vertical plane
- Easy installation
- Designed for residential furnace and light commercial aftermarket applications; duct heater, oven, and other HVAC or energy management applications

Item ID	Description	Range	Operating Temp. Range	Contact Arrangement	Connection	Approval
<b>Packard</b>						
PS000	Field Adjustable Switch Kit	0.10"wc To 10.0"wc.	-40F To 190F	SPDT	1/4" Quick-Connect Terminals	UL, CUL

Item ID	Description	Range	Operating Temp. Range	Contact Arrangement	Connection	Approval
<b>Packard</b>						
PS495	Field Adjustable Switch Kit	0.20"wc To 1.0"wc.	-40F To 190F	SPDT	3 Male 90° Quick-Connect terminals	UL

Item ID	Description	Range	Operating Temp. Range	Contact Arrangement	Connection	Approval
<b>Packard</b>						
PS498	Field Adjustable Switch Kit	1.0"wc To 4.0"wc.	-40F To 190F	SPDT	3 Male 90° Quick-Connect terminals	UL

Item ID	Description	Range	Operating Temp. Range	Contact Arrangement	Connection	Approval
<b>Packard</b>						
PS222	Field Adjustable Switch Kit	0.05"wc To 12.0"wc.	-40F To 180F	SPDT	Screw Top Terminals With Cup Washers	UL

## Air Pressure Sensing Switch Kits

Manufactured by  
CLEVELAND CONTROLS

### Features

- Mounts with the diaphragm in vertical plane
- Easy installation
- Designed for residential furnace and light commercial aftermarket applications; duct heater, oven, and other HVAC or energy management applications

Item ID	Description	Range	Operating Temp. Range	Contact Arrangement	Connection	Approval
<b>Packard</b>						
PS221	Fixed Set Point Switch Kit	Operates On Pressure Rise At 0.05±0.02"w.c.	-40F To 180F	SPDT	1/4" Male 90° Quick-Connect terminals	UL

Item ID	Description	Range	Operating Temp. Range	Contact Arrangement	Connection	Approval
<b>Packard</b>						
PS400	Field Adjustable Switch Kit	0.15"w.c To 5.0"w.c.	-40F To 180F	SPDT	Screw Terminals With Cup Washers	UL, CUL

Item ID	Description	Range	Operating Temp. Range	Contact Arrangement	Connection	Approval
<b>Packard</b>						
PS415	Field Adjustable Switch Kit	0.15"w.c To 5.0"w.c.	-40F To 180F	SPST-NO, SPST-NC, SPDT	1/4" 90° Quick-Connect Terminals, Screw Terminals With Cup Washers	UL

Item ID	Description	Includes
<b>Packard</b>		
PS606	Universal Air Flow Sample Probe & Tubing Kit	7" Universal Probe, Mounting Flange, 6-32 Slotted Flange-Locking set Screw, 3" Tubing

## Thermocouples

### Features

- Designed to simplify installation on automatic controls and burners.
- Stainless steel head and weld at tip to provide reliable performance.
- Kit includes adapters to fit most types of pilot burners.
- Five popular lengths are available.

## Defrost and Head Pressure Controls

ICM Control	Features and Applications	Specifications	Replaces
-------------	---------------------------	----------------	----------

### Defrost Controls - Form, Fit and Functional OEM Replacement Parts

**ICM304**

- Replacement for ICP 1069364
- Sensor input for defrost terminate
- Time and temperature terminate
- 10-minute fixed defrost time
- Pin-selectable intervals: 30/60/90 min.
- Y input tracks compressor run times
- Integral short cycle protection
- Cool active reversing valve  
(See ICM323 for heat active model)

- Voltage: 18-30 VAC
- Frequency: 50-60 Hz
- Strip heat, reversing valve outputs: 24 VAC, 1 amp
- Defrost time: 10-minute fixed
- Interval times: Pin-Sel. 30/60/90 min.

- ICP: 1069364

**ICM318**

- Low cost, time and temperature defrost
- Time and temperature terminate
- Pin-selectable intervals: 30/60/80 minutes
- Test pins reduce test time by 256x
- HOLD input tracks compressor run times
- High power output (1/2 HP fan @ 240 VAC)
- Strip heat, reversing valve outputs (24 VAC, 1 amp)

- Voltage: 18-30 VAC
- Frequency: 50-60 Hz
- Outdoor fan relay output:
  - 1/2 HP fan @ 240 VAC
- Strip heat, reversing valve outputs: 24 VAC, 1 amp
- Defrost time: 10-minute fixed
- Interval times: Pin-selectable 30/60/80 minutes

- Goodman: B1226008
- ICM: W1001-4

**ICM321**

- Low cost, time and temperature defrost
- Time and temperature terminate
- 10-minute fixed defrost time
- Pin-selectable intervals: 30/50/90 minutes
- Test pins reduce test time by 256x
- High power output, outdoor fan (1/2 HP fan @ 240 VAC)
- Strip heat, reversing valve outputs (24 VAC, 1 amp)
- Integral short cycle protection

- Voltage: 18-30 VAC
- Frequency: 50-60 Hz
- Outdoor fan relay output:
  - N.O.: 20 amps
  - N.C.: 10 amps
- Form: SPDT
- Anti-short cycle time: 5 minutes
- Defrost time: 10-minute fixed
- Interval times: Pin-selectable 30/50/90 minutes

- Carrier: CES0110063-00  
CES0110063-01  
CES0110063-02  
CES0110063-02A  
CES0130024-01  
150-83-6A

**ICM350C**

- Adjustable 30, 60, 90, & 120 minute timing sequences
- Speedup jumper for quicker testing and troubleshooting
- Brownout monitoring
- Microcontroller precision timing
- Time and temperature termination
- Quiet Shift : Reduces noise disturbance when entering & exiting the defrost sequence (HK32EA003 & HK32EA008)
- 5 minute anti short cycle delay (HK32EA003 & HK32EA008)
- Optional random start timer (HK32EA003 & HK32EA008)

- Voltage: 18-30 VAC
- Frequency: 50/60 Hz
- Power Consumption: 1 Watt max.
- Current Draw: 300mA maximum
- Maximum Defrost Sequence: 10 minutes

- Carrier: HK32EA001  
HK32EA003  
HK32EA008  
And comparable defrost control boards

### Head Pressure/Low Ambient Fan Controls

**ICM325HN (120-480 VAC)**

- Typical application: A/C and heat pumps
- Integral heat pump bypass circuitry allows electronic bypass of speed control
- Eliminates overshoots common to on/off and pressure switch controls
- Helps prevent evaporator freeze-ups, low pressure cut-outs and liquid-slugged compressors in low ambient conditions
- Hard start, low temperature cutoff, isolated 24 VAC supply
- Controls up to 3 refrigerant circuits

- Input:
  - Control: 18-30 VAC
  - Frequency: 50-60 Hz, 1.8 VA max.
- Line input: 120-480 VAC (ICM325HN)  
600 VAC (ICM325HNV)
- Output:
  - Maximum: 10 amps
  - Minimum: 100 mA
- Modulation: 70°F to 100°F
- Dimensions: 4.5" x 3" x 1.75"

- ACT: FM2000
- Hoffman: 800, 800A, 800AA  
814-50  
816-10
- Ranco: E31Series

## Head Pressure Controls

## TechTip

from Packard Academy

Minimize potential condensate problems. Regularly check condensate pumps for proper operation. Maintain clear condensate lines and drains. A condensate control is a cost effective method of providing an alert and preventing costly water damage if pump failure or drain blockage occurs.

### I OWN PACKARD!

*I'm proud to be a Packard employee owner...*

“ because not only do I value the customer-focused way of life, but I live by a family-focused way of life. Packard allows me to be a valued full-time team member and a full-time parent. Which I am proud to be a part of and provide for others. ”

**ANN CAREN**  
 Program/Project Administrator

### I OWN PACKARD!

*I love Packard because...*

“ they foster a teachable environment in which I can learn more and more about the ins and outs of our products! ”

**ALLISON GOSS**  
 Warehouse - Receiving

## Motor Protection and Surge Protectors

ICM Control	Features and Applications	Specifications	Replaces
-------------	---------------------------	----------------	----------

### Single Phase Motor Protection

- ICM491**
- Low cost single phase motor protection
  - Built in anti-short cycle protection
  - Detects high/low voltage conditions
  - Helps prevent rapid system recycling
  - LED indicators: • Green for normal conditions, Red for fault
  - Heavy duty SPDT, isolated relay output
  - Interrogation delay prevents nuisance trips: 5 seconds

- Voltage: 95-270 VAC
- Output: Relay: SPDT  
N.C./N.O.: 5 amps
- Time delay range: Adjustable 6-600 seconds
- Dimensions: 3.25" x 3" x 1.25"

- A-1: EAC-401, EAC-402  
EAC-403, EAC-404
- Diversified: CV-100-RS  
CV-200-RS15  
CV-200-RS20
- Wagner/DiversiTech: DSP-1

- ICM492**
- Protects against over and under voltage, and rapid short cycling caused by transient faults and power interruptions
  - Easy-view, backlit digital display
  - RMS voltage monitoring
  - Adjustable voltage set point
  - Adjustable over voltage setting
  - Adjustable under voltage setting
  - Adjustable anti-short cycle time delay
  - Adjustable response time
  - Control mode
  - 5-fault memory
  - Universal line voltage input
  - Heavy duty SPDT relay output
  - Universal control voltage input (for integrating a thermostat)

- User adjustable settings:**
- Voltage set point: 80-300 VAC
  - Anti-short cycle time delay: 0-720 sec.
  - Over voltage setting: 5-25%
  - Under voltage setting: 5-25%
  - Control mode: On and Off
  - Response time: 0.1-10 seconds

- Inputs:**
- Line voltage: 80-300 VAC
  - Frequency: 50-60 Hz
  - Accuracy: ±2%
  - Low power consumption:
    - Maximum 50 mA @ 120V
    - Maximum 100 mA @ 240V
  - Control voltage: 24-240 VAC
- Output:**
- Type: Dry relay contacts
  - Form: SPDT
  - Relay contact ratings:
    - N.C. contacts: 10A resistive @ 277 VAC
    - N.O. contacts: 10A resistive @ 277 VAC

- Mechanical:**
- Case dimensions: 3"L x 3.2"W x 1.35"H

# What's inside matters when it comes to HVACR...

...Packard stocks a full-line of controls with enhanced quality features.

# TechTip >>>>

from Packard Academy

The National Weather Service estimates that there are 25 million lightning strikes per year. The economic loss suffered if equipment is hit by a strike can be very substantial. Surge protection in the system can protect expensive equipment from a costly loss.

## TechTip

from Packard Academy

**RICK'S TIP**  
 Rick Streater  
 National Training Coordinator

Delay on break relays prevent a compressor from starting within a specified period of time after being de-energized. It can prevent short cycling of the compressor, that is, starting too quickly after it has completed an operating cycle. Short cycling can result in the loss of oil in the crankcase, liquid flood-back, and motor insulation failure. These can all lead to premature compressor failure. The time delay relay is also effective in helping to prevent a scroll compressor from starting in the wrong rotation.

# TITAN ICE®

REPLACES OVER 1,000 OEM MODELS

## TITAN ICE® POTENTIAL RELAY ADVANTAGE

- Up to 500,000 cycles ■
- Over 40 years proven performance ■
- Original GE tooling and design ■
- Replaces GE 3ARR3 ■

## APPLICATIONS

- Central air conditioner compressors
- Submersible pump motors
- Motors generally over 1/3 HP with start capacitors

## Potential Relays

### Applications:

Central air conditioner compressors

Submersible pump motors

Motors generally over 1/3 HP with start capacitors

# TITAN ICE<sup>®</sup>

### Features

- Universal replacements for thousands of GE 3ARR3 model relays and many other OEM's
- Manufactured using the original GE designs and tooling
- Proven performance for 40 years
- Contact rating: 35 amps max, break only
- Endurance up to 500,000 operations depending on load
- Screw type terminals #8-32 thread
- Six (6) quick connect terminals and screws packaged included with each relay
- Instructions included
- UL approved

## Time Delay Relays

### Application

- Prevents short cycling of air conditioning, refrigeration and heat pump compressors

### Features

- Universal voltage
- Mounts in any position
- Adjustable up to 10 minutes
- Easy two-wire installation
- Delay on make / delay on break

## Adjustable Thermostats

### Applications

- Covers approximately 95% of the hundreds of different temperature ranges and styles used on dryers and heating applications

### Features

- Dial knob
- 1/4" quick connect terminals
- UL recognized

## Heat Sequencers

### Features

- Contact ratings: up to 25 Amps at 120 or 240 Volts
- Full-load rated auxiliary contacts
- Standard operating ambient between -50°F (-45.5°C) and 165°F (73.8°C)
- Shock and vibration resistant
- Solid state
- Quick-connect terminals
- Mounts in any position
- UL recognized

ICM Control Comfort Control Center	Features and Applications	Specifications
---------------------------------------	---------------------------	----------------

### ICM CC750-115 and ICM CC750-230

- The multi award-winning Simple Systems™ CC750-115 Comfort Control Center enhances comfort and indoor air quality of your home or workplace by controlling the blower speed in your existing air conditioner or heat pump. By making your existing system more effective at removing and controlling excess air moisture, the CC750 creates drier, more comfortable living conditions. The CC750 can also protect your home from mold propagation by keeping humidity levels low. Best of all, the CC750 provides enhanced comfort and indoor air quality while saving on electricity.
- Multi award-winning variable frequency/variable voltage blower motor speed control
- Enhances comfort by more effectively removing moisture from the air
- Improves indoor air quality by allowing more efficient use of air cleaning devices
- Reduces energy costs by improving overall system efficiencies
- Also provides hot discharge air in heat pump installations
- Field programmable to maximize benefits/results regardless of environmental conditions present at each install
- Works with your existing A/C or heat pump system equipped with a standard or inverter grade PSC, or shaded pole motor
- General Features:
  - Converts a PSC motor to a variable speed motor
  - Field programmable
  - Varies the air flow based on delta T
  - May be mounted in/out of the air handler
  - Motor lubrication algorithm
  - Inverter bypass
  - Over-current protection
- Standard thermostat interface programming features:
  - Differential temperature setting
  - Minimum frequency
  - Maximum frequency
  - "G" call frequency
  - Skip frequency
  - Maximum run time
  - Power setting
  - Repeat cycle function B or O active (for heat pumps)
  - Discharge temperature
  - Minimum coil temperature
  - Maximum coil temperature Ratings:
    - Nominal 24 VAC inputs (+/- 25%): 18-30 VAC RMS absolute
    - Power consumption: 10 Watts typical line ratings- nominal 115 VAC RMS
    - Inverter operation: 95-135 VAC RMS absolute
    - Bypass operation: 85-145 VAC RMS absolute
    - Maximum inverter amps: 10 amps RMS
    - Maximum bypass amps: 20 amps (60 HZ)

- **115 Ratings:**
  - Nominal 24 VAC inputs (+/- 25%): 18-30 VAC RMS absolute
  - Power consumption: 10 Watts typical line ratings- Nominal 115 VAC RMS
  - Inverter operation: 95-135 VAC RMS absolute
  - Bypass operation: 85-145 VAC RMS absolute
  - Maximum inverter amps: 10 amps RMS
  - Maximum bypass amps: 20 amps (60 HZ)
- **230 Ratings:**
  - Nominal 24 VAC inputs (+/- 25%): 18-30 VAC RMS absolute
  - Power consumption: 10 Watts typical line ratings- Nominal 208-230 VAC RMS
  - Inverter operation: 180-264 VAC RMS absolute
  - Bypass operation: 170-264 VAC RMS absolute
  - Maximum inverter amps: 8.5 amps RMS
  - Maximum bypass amps: 10 amps (60 HZ)

## TITAN HD® Oval Motor Run Capacitors

### Features

- Manufactured to EIA-456A standards
- Up to 60,000 hours operational life
- Aluminum cans filled with soybean based oil
- UL-801 fault current protection
- RoHS compliant
- Approval certifications: UL, cUL, IEC 60252
- Made in USA

## TITAN PRO® Motor Run Capacitors

At 60,000 hours of operational life, Titan Pro® Professional Grade Motor Run Capacitors get the job done by outperforming standard motor run capacitors of similar value in the toughest conditions.

## TITAN Pro 370<sup>®</sup> Motor Run Capacitors

### PRO - series: Features & Benefits

- RELIABLE.** Tested to 60,000 hours
- COMPLIANT.** Built to EIA-456A industry standard for endurance
- CERTIFIED.** Meets UL 810 safety standards
- TESTED.** 100% electrical testing
- ROBUST.** Heat tolerant, high-grade metallized polypropylene film and proprietary Epoxidized Soybean Oil (ESO)

### Features

- Dry, electrolytic, non polarized capacitors for intermittent duty in AC motor starting circuits
- Cases are made of moisture and oil resistant molded phenolic resin or plastic
- Standard dual blade terminals
- Operating temperature range: -40°C to 65°C (-40°F to 149°F)
- UL and cUL recognized
- Rated 3-second start
- 20 Starts per hour
- 50/60 Hertz

## Packard Start Capacitors With Resistors

### Features

- Most popular Start Capacitor with resistors to use in Compressor applications
- Includes 15,000 OHM resistor
- Dry, electrolytic, non polarized capacitors for intermittent duty in AC motor starting circuits
- Cases are made of moisture and oil resistant molded phenolic resin or plastic
- Standard dual blade terminals
- Operating temperature range: -40°C to 65°C (-40°F to 149°F)
- UL and cUL recognized
- Rated 3-second start
- 20 Starts per hour
- 50/60 Hertz

## Packard Dry AC Motor Run Capacitors

### Features

- Commonly used on motors in fans, pumps and blowers
- Constructed with Self-Healing Dielectric Metalized Polypropylene Film
- 1/4 inch blade quick connect terminals; Metal tab mounting bracket
- Operating temperature range: -40°C to 85°C (-40°F to 185°F)
- Capacitance tolerance: +/-5%
- Protected 10,000 AFC
- Available in 370 and 440 Volt
- 50/60 Hertz
- Plastic ABS case
- RoHS compliant

## Packard Mini-Split Dry Cell Capacitors

### Features

- Specifically designed for Mini-Splits and other equipment with confined space
- Constructed with Self-Healing Dielectric Metallized Polypropylene Film
- 2 - 1/4 inch QC terminals
- Plastic mounting foot
- Temperature range: -40°C to 85°C (-40°F to 185°F)
- Capacitance tolerance: +/- 5%
- Protected 10,000 AFC
- RoHS compliant

## Lighting Capacitors: Oil-Filled And Dry AC Film For HID Lighting Applications

### Applications

- High Intensity Discharge (HID) lighting applications
- Other high voltage ballast applications

### Features - Oil-filled AC Film Capacitor

- Constructed with specially formulated metallized polypropylene film
- Designed to operate in the high temperature environments found in typical HID lighting fixtures
- Endsprayed with zinc
- Manufactured to EIA-456A
- ROHS compliant
- Epoxidized Soybean Oil (ESO) filled
- Round and oval metal case
- Voltage ranges from 330 VAC to 525 VAC
- Operating temperature to 90°C

Oil-Filled AC Film

## Two Wire Electro-mechanical Voltage Sensing Relay

### Features

- Potential relay and start capacitor for compressor hard start applications
- More reliable than PTC type hard starts
- Two wire connection
- For use with Hermetic or Scroll compressors
- Quick connect terminals
- Bleed down resistor to safely discharge the capacitor

Item ID	Capacitor Size (µF)	Tons	Compressor	Pick-Up Voltage (VAC)	Maximum Coil Voltage (VAC)	Replaces
<b>TorQstart</b>						
TQS1	189-227	1.5 - 3	Recip and Scroll	239-268	502	TO-5, SK3W3
TQS2	270-324	3.5 - 5	Recip and Scroll	280-315	502	KS1, SK3W6S

## Hard Start Kits And All In One Hard Start Packs

### Standard PTC Relay and Hard Start Capacitor

### Features

- Increases compressor starting torque for faster recycling
- For all permanent split capacitor, single phase air conditioning and heat pump systems
- Wired with "Piggy-Back" terminals for easy installation on run capacitors
- Designed for 115 volt thru 277 volt systems
- Mounts easily with either screw or clip

Item ID	Operating Voltage (VAC)	Recommended range (HP)	Increase in Torque (%)	Replaces
<b>TorQstart Hard Start</b>				
TQS5	115-277	1/2 to 10	300%	32701 600-057 SPP5
TQS6	115-277	1/2 to 10	500%	32702 600-052 SPP6
TQS8	115-277	1/2 to 10	600%	32708 SPP7S

### All Purpose 3-N-1 Kit

### Features

- Combination relay, overload and capacitor
- Pre-wired for easy installation
- Extra long compressor leads for mounting flexibility
- All models adapt to 115 volt compressors with external overload protector

Item ID	Compressor Sizes	Volts	Replaces
<b>TorQstart 3-N-1 Kit</b>			
TQS21	1/2 HP	115	600-210 RC0210
TQS41	1/4 and 1/3 HP	115	600-410 RC0410
TQS81	1/12 thru 1/5 HP	115	600-810 RC0810

# ARC SUPPRESSION TECHNOLOGIES

## NEW **NOsparc®** ARC SUPPRESSION TECHNOLOGY!

**Knock out 99.9%** of the damaging arc energy that occurs in contactors!

### **NOsparc®** Arc Suppressors virtually eliminate:

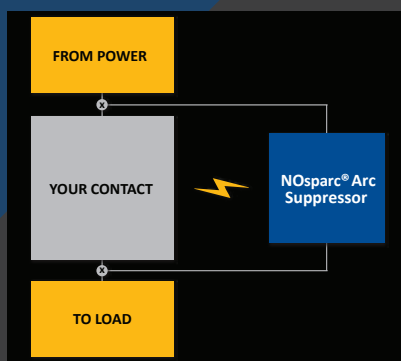

- Contact point scarring
- Single phasing compressor motors
- Tripped breakers in air conditioning racks

MGXDC1F250 | 12-250V  
DC NOsparc® Arc Suppressor

Single Phase: GGXAC1F480 | 110-480V  
AC NOsparc® Arc Suppressor

Three Phase: 3P-GGXAC1F480 | 110-480V  
AC NOsparc® Arc Suppressor

### **NOsparc®** AC | DC Arc Suppressors support the following AC | DC power load categories

#### **AC POWER LOAD**

Ballast • Capacitive • General Purpose  
Heater • Inductive • Motor  
Pilot Duty • Resistive • Tungsten

#### **DC POWER LOAD**

General Purpose • Inductive  
Resistive • Motor • Capacitive • Tungsten

## NOsparc Arc Suppressors

### Features

#### Extends Contact Life 10X or More

- Reduced maintenance, repair and replacement costs
- Dramatic reduction in total cost of ownership

#### Small Footprint

- Easily adapted to existing infrastructure
- Quick and simple panel mount retrofit process
- Minimal impact to design due to size of the hardware solution

#### Green

- RoHS compliant
- Reduced carbon footprint and greenhouse gasses

#### Low Power

- Improves contact switching transition efficiency 20x

#### Only 2 Wires

- No external power required
- No special or complicated assembly requirements or associated connections to auxiliary equipment

#### Lower EMI

- Average 30dB reduction of EMI over 30MHz to 1GHz range

### Features

- Up to 480 Vac
- Circuit fuse rating of 100 A (resistive) and absolute maximum current rating of 235 A(rms)\*
- Panel mount
- UL recognized component

Item ID	Volts (AC)	Hertz	Phase
<b>AC NOsparc Arc Suppressor</b>			
<b>GGXAC1F480</b>	110-480	50/60	Single

### Features

- Up to 480 Vac
- Circuit fuse rating of 100 A (resistive) and absolute maximum current rating of 235 A(rms)\*
- Panel mount
- 3-phase configuration pre-assembled on DIN clips
- UL recognized component

Item ID	Volts (AC)	Hertz	Phase
<b>AC NOsparc Arc Suppressor</b>			
<b>3P-GGXAC1F480</b>	110-480	50/60	Three

### Features

- Up to 250 Vac
- Circuit fuse rating of 50 A (resistive) and absolute maximum current rating of 75 A(rms)\*
- Panel mount
- UL recognized component

Item ID	Volts (DC)	Hertz	Phase
<b>DC NOsparc Arc Suppressor</b>			
<b>MGXDC1F250</b>	12-250	50/60	Single

**IMPORTANT:** The absolute maximum current rating for NOsparc arc suppressors also represents the maximum allowable Locked Rotor Amperage (LRA) for motor loads and the cold filament inrush current for tungsten loads.

## Definite Purpose Contactors

### Features

Contactors meet UL508 specifications for devices up to 600 Vac.

- 50/60 Hertz •
- Coils have class B insulation
- Includes lugs, spade terminals and covers
- All single pole include shunt

Notes:  
\* Spade terminals and cover only.  
Auxiliary Switches sold separately. See page 226.

## Magnetic Contactor

Item ID	C18001
Type	DPST N.O.
Resistive Amps	30
Full Load Amps	30
Locked Rotor Amps	120
Coil Voltage	24
Hertz	50/60
Max. Surrounding Air Temp.	40°C
Phase	Single

### Replaces

3ARR8E4	MC11	18001
90-230	R850B1146	

## DP Contactor

Item ID	PR4013
F/L Inductive Amps	30
Poles	1
Resistive Amps	40
Coil Voltage	24

### Replaces

DP1030A5013

Maximum dependability in a "one for one" replacement for the Furnas DP contactor and many more.

### Features

- **MEETS THE ARI 780/790 STANDARD**
- **Universal metal mounting plate allows for complete ease of replacement**
- **Long electrical life; tested to 250,000 cycles**
- **Reliable mechanical life; tested to 1,000,000 cycles**
- **EE magnet assembly assures optimal performance without sacrificing power consumption**
- **Superior copper coil**
- **Performance unaffected by mounting position**
- **Flexible termination options suitable for various applications**
- **Dust-free internal construction**
- **Removable contact inspection plate**

## DISCONNECTS - METALLIC

### Features

- Non-Fused Pullout
- Rated NEMA 3R for outdoor use
- Line, load, and ground terminals aligned for easy hook up with heavy wires
- Full dead front
- Knockouts accommodate three sizes (1/2", 3/4", and 1")

- Rear, bottom and side entry knockouts
- Heavy gage steel case
- Large internal wiring space
- Individually wrapped in boxes of 6
- Folding pivot locking tab

Item ID	Description	Fused
<b>PACKARD</b>		
<b>PD60NF</b>	60 Amp Non Fused Metal	NO
<b>PD30F</b>	30 Amp Fused Metal	YES
<b>PD60F</b>	30 Amp Fused Metal	YES

Dimensions (LxWxH): 8.77 x 5.45 x 3.18

## DISCONNECTS - NON-METALLIC

### Features

- Amperage Rating: 30 and 60A
- Rated NEMA 3R for outdoor use
- Non-fused pullout
- Standard 1/4" head screw on dead front
- Great for salt air regions
- Plastic non-metallic enclosures have a single unit door and protective shield for installer convenience

- Plastic non-metallic enclosures are durable and provide excellent weather resistance
- Rear, bottom and side entry knockouts
- Individually wrapped in boxes of 6

Item ID	Description	Fused
<b>PACKARD</b>		
<b>PD-NM-60NF</b>	60 Amp Non Fused Plastic	NO
<b>PD-NM-30F</b>	30 Amp Fused Plastic	YES
<b>PD-NM-60F</b>	30 Amp Fused Plastic	YES

Dimensions (LxWxH): 8.81 x 6.26 x 4.39

## Air Conditioning Disconnect

### Features

- 60 amp A/C disconnect box
- Outdoor enclosure
- Metal
- Non-fused
- 240 VAC
- Single phase
- Flip top door
- Nema type 3R

Item ID	Description	Fused	Replaces
<b>PACKARD</b>			
<b>PDB60NF</b>	60 Amp A/C disconnect box	NO	DDS-60U MA-Line MA-NFD60A 83315 Square D 755-60NF

## Mini-Split Kit

### Features

- Non-metallic electrical whip ½" x 4'
- Disconnect 60 Amp non-fused metallic
  - Non-fused pullout
  - Rated NEMA 3R for outdoor use
  - Line, load, and ground terminals aligned for easy hook up with heavy wires
  - Full dead front
  - Rear, bottom and side entry knockouts
  - Heavy gage steel case
  - Large internal wiring space
- Surge protector ICM516
  - Type 2 surge protective device
  - Easy installation
  - Protects against: lightning power surges, voltage surges from A/C, generators, motors
  - Limited lifetime protection warranty service voltage: 120-240 VAC, single-phase
  - Maximum surge current: 100,000 Amps
  - Maximum energy dissipation: 1,020 Joules
  - Installation point: electrical panel, electrical disconnect
  - AC protection modes: line-line, line-ground
- Wall sleeve and fitting

**QUICK START KIT!**

**NEW**

Item ID	Description
Packard MSK001	Mini Split Kit

## Packard Whips

### Applications

- Commonly used for connecting air conditioners, pumps, motors, compressors, swimming pool equipment and similar equipment

### Features

- 600 volt; Intended for 208/240/480 volt single phase circuits
- 12" conductor leads with 1/2" insulation stripped
- Stranded copper THHN/THWN insulated singles; Green insulated copper grounding conductor
- Highly flexible non-metallic conduit with factory installed conductors
- Liquid tight flexible non-metallic conduit type B (LFNC-B) fittings for easy and hassle-free hook-ups
- Straight connector on one end and 90 degree connector on the other end
- Non-metallic raceway is non-conducting and resistant to rust, cracks, and separation
- Completely assembled delivered from the factory ready to install

For information on connections contact Packard Customer Service.

## Class CC - CCMR Series

### Description

The CCMR series is ideal for space saving protection of motors up to 40 hp\*. It was designed specifically to withstand sustained starting currents of small motors. The CCMR 60 fuse is the smallest 60 A fuse available rated at 600 V. Compared to other UL Listed fuses, Class CC fuses are the most current-limiting, rating for rating.

### Features

- POWR-PRO® Performance
- Extremely current-limiting
- Ratings up to 60 Amps
- 300 kA interrupting rating (self-certified)

### Applications

- Motor and motor branch circuit protection

### Specifications

#### Voltage Rating

AC: 600 V  
 DC: 250 V (CCMR 2/10 – 2 A)  
 (CCMR 4 1/2 – 10 A)  
 (CCMR 35– 60 A)  
 300 V (CCMR 2 1/4 – 4 A)  
 500 V (CCMR 12– 30 A)

#### Amperage Rating

2/10 – 60 A

#### Interrupting Rating

AC: 200 kA rms symmetrical  
 300 kA Littelfuse self-certified

DC: 20kA

### Approvals

AC: Standard 248-4, Class CC  
 UL Listed 2/10-30 A (File: E81895)  
 Standard 248, Class CD  
 UL Listed 35-60 A (File: E81895)  
 CSA Certified (File: LR29862)

DC: Littelfuse self-certified

RoHS compliant (except 35-60 A)

### DIMENSIONS INCHES (MM)

## Class RK5-FLNR • FLSR Series

### Description

The FLNR/FLSR series of fuses set the standard for general purpose fuses. The dual-element design provides advanced short circuit and overload protection. FLSR series fuses provide excellent protection for all types of circuits especially those containing motors.

### Applications

- Service entrance switches
- Transformers
- Switchboard mains and feeders
- Motor control central mains and motor branch circuits
- All general purpose circuits

### Features

- Dual-element design
- Current limiting

\*Indicating available on special request

### Specifications

#### Voltage Rating

AC: 250 V (FLNR\_ID); 600 V (FLSR\_ID)

*I love Packard because...*

“ of the people. Woody Hayes once said “You win with people,” and that’s what Packard does with our GREAT people. ”

## Flame Sensors

### Features

- For use with Spark ignition, Flame sensing and Hot Surface Ignition (H.S.I.) systems
- High quality alumina ceramic insulator
- High temperature kanthal flame rod material that can withstand 1800° F
- Flame rod can be trimmed down to match the application

### PFS010

Single screw, plated steel mounting bracket

- Single rod
- 1/4" male connection
- Overall length 3 3/4"
- Probe length 2 1/2"

Replaces:

Goodman/Amana/Janitrol 20488501, B1172606, Goodman 0130F00010

### PFS053

Single screw, plated steel mounting bracket

- Single rod
- 1/4" male connection

Replaces:

York S1-SCP-9007053

### PFS081

90 Degree

- Length of mounting flange to sensor tip 2 1/4"
- Length of sensor offset 3 1/4"
- Termination 1/4" male quick connect
- Bracket included

Replaces:

Lennox 40L81

### PFS114

75 Degree

- Single screw, plated steel mounting bracket
- Termination 1/4" male quick connect

Replaces:

Trane SEN01114

## TechTip >>>>

from Packard Academy

A defective or dirty flame sensor can prevent the burners in a gas furnace from remaining lit. The furnace may repeatedly attempt to ignite the burners but unsuccessfully. When installing or cleaning the flame sensor avoid touching the rod. If the oil present in our fingers is absorbed by the rod, it may result in improper operation and premature failure.

### RICK'S TIP

Rick Streaker  
National Training Coordinator

## Flame Sensors

### Features

- Flame sensors for Hot Surface Ignition (H.S.I.) systems
- Can be mounted remotely on multiple burners or adjacent to igniter on other applications
- For use with spark ignition and flame sensing
- High quality alumina ceramic insulator
- High temperature kanthal flame rod material that can withstand up to 1800°F

#### PFS013

- Teflon insulated (250°C rating) lead wire
- Used on these Bryant & Carrier models: 355MAV, 345MAV, 340MAV, 350MAV, 373LAV, 58MXA, 58MVP and 58MCA

## Ditek Surge Protector

### PSP72KA Features

- Weatherproof enclosure
- Parallel connection for easy installation
- Diagnostic LED provides positive indication of power, ground presence, and surge protection
- Automatically resets to handle multiple surge events
- Typical Applications: A/C disconnect, small electrical panels, pool/well pumps
- Half the response time as similar models

### PSP38VDC Features

- Voice, Data and Signaling circuit surge protection
- Adds no resistance to loop circuits
- #22-#16 AWG screw terminal connections
- For 24 volt service

Item ID	Service Wiring	Peak Surge Current	MCOV	UL 1449, 3rd Ed. V.P.R.	Short Circuit Current Rating	UL1449, 3rd Ed. In Rating	Replaces

**TechTip**  
from Packard Academy

THE POSITION OF A FAN BLADE IS CRITICAL FOR PROPER SYSTEM PERFORMANCE. WHEN REMOVING AN OLD FAN BLADE, ALWAYS MEASURE THE LOCATION OF THE ORIFICE.

Learn more from the Packard Academy

## KH/KC Fans

### Applications

- Commercial air conditioning and ventilation
- Air handlers
- Cooling towers
- Large unit heaters
- Agricultural applications
- Bushings can be found on page 406

### Features

- 24 to 48 inch diameters
- Heavy-Gauge for added strength
- Steel spiders
- Rotation determined by viewing air-discharge side of fan
- Individually boxed
- 6 blade available
- Made in USA

\* Fan should be guarded before operating.

\* Tighten cap screws securely before operating.

## Swept Fans

### Applications

- Commercial and residential condensers

Item ID	No. of Blades	Diameter (In.)	Pitch (°)	Rotation	Bore (In.)	Hub Position
<b>Revcor 2-Blade</b>						
R22405	2	24	27	CW	1/2	Intake
R22701	2	27	28	CCW	1/2	Intake

### Features

- Carrier Replacements
- Up to 50% reduction in noise level
- Rotation is determined by viewing the discharge side of fan
- Made in USA

Additional models available upon request

## Propellers With Fixed Hub - 3-Blade

### Applications

- Unitary condensing units, heat pumps, unit heaters, ventilators and exhaust fans

### Features

- 14 to 30 inch diameters
- Embossed for added strength
- Factory balanced
- Steel spiders with 1/2 and 5/8 inch bores
- Individually boxed
- Aluminum fan blades unless otherwise specified
- Made in USA

Additional blade options available upon request

## Hubless Propellers

### Applications

- Air conditioning condensing units, power roof ventilators, heat pumps, heat exchangers, unit heaters, commercial and industrial equipment
- 10 to 24 inch diameter available
- Steel spiders
- Embossed for added strength
- Max motor speed for blades up to 16" is 1725 Rpm.
- Max motor speed for blades 18" to 26" is 1140 Rpm.
- Use with interchangeable hubs
- Individually boxed
- Aluminum fan blades
- Made in USA

## 3-Blade Propellers Heavy Duty Condenser Style

### Applications

- Air conditioning condensing units
- Power roof ventilators
- Heat pumps
- Heat exchangers
- Roof top air conditioners
- Commercial and industrial equipment
- Unit heaters
- Agricultural ventilating equipment
- Walk-in refrigeration units
- General cooling/heating applications

### Features

- 3-blade configuration is normally used in low pressure applications
- Square pressure-type blades are required for most condenser applications
- High quality aluminum blades
- Interchangeable hubs available from 1/4" through 3/4" bore, may be attached on either intake or discharge side
- Pitches available for most common horsepower and motor speeds up to 1725 RPM in both CW and CCW rotations

See page 374 for hubs

## 2-Blade Propellers OEM Style With Fixed Hub

### Applications

- For lower static pressure condensing units.
- Replacements for G.E., Rheem-Rudd, Singer-Climate Control, Trane, etc.

### Features

- 14 to 24 inch diameter
- High strength aluminum blades
- Each blade clearly labeled as to Pitch, Diameter, Rotation, and Maximum RPM
- Top quality, epoxy painted spiders with high salt spray characteristics
- Steel fixed hub - 1/2" bore - exact propellers as supplied to OEMs

...from universal to OEM direct replacements, your choice of reliable replacement parts is important to us.

## Universal Single Inlet Blower Wheels

Strip Wheels

Tab Lock

### Applications

- Draft inducers, power venting, small appliances, heating, ventilation, air conditioning, convectors, appliances, kitchen and bath exhaust

### Features

- 5 1/4" to 12 5/8" diameters
- Embossed backs for added strength
- Factory balanced
- Individually boxed
- Made in USA
- Additional blower wheels available upon request

## Universal Double Inlet Blower Wheels

### Applications

- Power venting, small appliances, heating, ventilation, air conditioning, PTAC, fan coils, and mini split systems

### Features

- 4 3/4" to 12 5/8" diameters
- Embossed backs for added strength
- Factory balanced
- Individually boxed
- Variety of materials available
- Made in USA
- Additional blower wheels available upon request

## Circulation Double Inlet Blower Wheels

### Applications

- Furnaces, ventilation, air conditioning, mini split systems, evaporative coolers, commercial A/C, and fan coils

### Features

- 9 1/2" to 12 5/8" diameters
- Embossed backs for added strength
- Factory balanced
- Individually boxed
- Made in USA
- Additional blower wheels available upon request

## Double Inlet Blower Wheels

### Fan Blade & Blower Wheel Puller

A89000

See page 417

### Features

- Universal replacement wheels for direct drive blowers
- Galvanized, cold rolled steel
- Recommended for application temperatures that do not exceed 135°F (60°C)

## HVAC Belt Options

- GripNotch™ Belts
- Super GripBelt™
- Browning Classical V-Belts: Super Gripbelt & Gripnotch
- Notched/Cogged Raw Edge V-Belts
- Browning 358 Belts: 358 Gripbelts & 358 Gripnotch
- Browning FHP Belts: Wrapped

**PACKARD STOCKS OVER 250 DIFFERENT BROWNING BELTS  
LET PACKARD BE THE FIRST STOP FOR YOUR REPLACEMENT NEEDS!**

### 358 Gripnotch Belts

#### Features

- Precision molded raw edge construction
- More horsepower in less space
- Notches are molded extra deep

### Wrapped FHP Belts

#### Features

- Wrapped construction provides smooth, quiet operation
- Formulated for maximum flexibility for use with smaller diameter sheaves
- Oil and heat resistant — static conducting

## Browning Tension Checker

Item # BTC1

### Features

- Adjusts for a 10" to 170" belt span and up to 35 lb. of tension
- Helps extend the belt life

Now Available!

Browning Belt  
**Tenso-set** reduces time to  
 change v-belts, maintain  
 superior drive alignment  
 and improve  
 overall safety.

## Super Grip Classic B Section V Belts

### Features

- Wrapped construction provides smooth, quiet operation
- More tolerant of slip and misalignment than raw edge belts
- Oil and heat resistant — static conducting

## TechTip

from Packard Academy

A replacement belt should be selected based upon:

- The top/outside length of the belt
- The top/outside width of the belt
- The construction characteristics of the belt

# **W**hat's inside matters when it comes to HVACR...

...down to the essentials, we know  
the importance of each replacement part.

# Stock PVP Variable Pitch Single Groove Pulleys

**Features**

- Fitted with hollow head set screws
- Any standard double groove Packard Drive Sheave can be used as a companion sheave

# ACCESSORIES

Completing a job means adding all the finishing touches. Packard is your all-inclusive resource for the comprehensive repair packages your technicians need to wrap-up jobs on time and on budget.

## Bracket Adapter for Trane

### Application

Bracket to adapt 48 frame motors to Trane Cap-Can motor mounting

### Features

- Includes bracket and 8 bolts

Replace an OEM Cap-Can motor mount design

with a Standard 48 frame motor and TR001 bracket

Item ID	Brand
TR001	Packard

## Shaft Adapter

### Features

- Used on unit bearing motors

Item ID	I.D. (In.)	Length (In.)
A60098	1/4	1

## Shaft Adapters

### Features

- 5 per package

Item ID	Dimensions (In.)		
	I.D.	O.D.	Length
A80427K	1/4	5/16	1.00
A80513K	5/16	3/8	1.00
A80082K	3/8	1/2	1.00
A60097K *	1/2	5/8	1.50

\* Split bushing with key.

## Stearns 56000 Series Brake Kits - Inverter Duty TENV Black Max® and Blue Max® Motors - E3

### Features

- These brake kits fit on both Black Max® and Blue Max® TENV motors
- These can also be used together with the double C-Face SL56 encoder to make a closed loop inverter brake motor

Non-stock items

Torque Rating (lb-ft)	115/230 Volt		208-230/460 Volt		575 Volt		Weight All
	Item ID	Kit No.	Item ID	Kit No.	Item ID	Kit No.

### Customer Focused...

“ means that we perform on a day to day basis with the understanding that we are here for the customer. Packard is one of those rare companies that truly puts the customer first knowing that when you do, sales and profits will follow. It has been part of our culture for 50 years and our standing today is testimony to the fact that being customer focused works.”

## EC Motor Tester

**Application**

For use with EC Motors

**Features**

- Analyzes GE EC motors independent of the HVAC system
- Test basic settings of Fan-only, Heating, Cooling, Dehumidify and Variable Speed
- Detect and isolate motor failures from HVAC system failures

Item ID	Brand
GA447	FASCO

## Conduit Box with Adjustable Bracket

**Applications**

- For use on 48 & 42 Frame Motors

**Features**

- Encloses Electrical Connections
- Includes Adjustable Bracket

Item ID	Brand
TACBB1	Packard

## Flex Mount Brackets

**Features**

- 3-Leg Torsion-Flex Brackets
- Designed to effectively isolate and prevent torsional vibrations from reaching blower housing and causing noise
- No preassembly; bracket clamps to motor shell. Includes 3 Grommets, 1 Bolt, 1 Nut, 3 Steel Washers

Item ID	Diameter (In.)
TFM50	5
TFM55	5 5/8

## Four Leg Torsion Flex Mount Bracket

**Application**

For use with 5 5/8" Diameter Motors

**Features**

- Helps isolate and prevent torsional vibrations from reaching blower housing and causing noise

Item ID	Diameter (In.)
TFM54	5 5/8

## Flex Mount Bracket Adjustable Diameter

**Application**

For use with 5" or 5 5/8" Diameter Motors

**Features**

- Plastic insert allows you to adjust for 5" or 5.5" diameter
- 3-Leg Torsion-Flex Brackets
- Designed to effectively isolate and prevent torsional vibrations from reaching blower housing and causing noise
- No preassembly; bracket clamps to motor shell. Plastic inserts supplied for adapting bracket to NEMA 42 frame.

Item ID	Diameter (In.)
TFM556	5 or 5 5/8

## Mounting Brackets

### Application

Used to mount motor to blower housing

### Features

- Kit includes: steel bracket with 3 welded legs, 3 steel sleeves, & 3 sets of rubber grommets

Item ID	Diameter (In.)	Frame
A60042	5	42
A60048	5 5/8	48

## Mounting Brackets

A80293, A80295

KIT50L

KIT55L

Item ID	Diameter (In.)	Bolt Circle	Brand
A80293	5.5	6 7/8 - 8 1/8	Packard

KIT55L*	5.5	8 1/8 - 12 1/8	Fasco

Notes:

\*Has extended lugs

## Universal Lug Mounting Bracket

### Application

For use with 5 5/8" Diameter Motors

### Features

- Two mounting options. Small slots accepts 1/4" bolt. Large hole accepts 3/4" Rubber Grommet Kit (A60049K).

Item ID	Diameter (In.)
1410A	5 5/8

## Unit Bearing Mounting Bracket

Item ID	Shaft Height (In.)	Bracket Height (In.)

A11602	4 9/16	2 41/64
A11603	5 3/8	3 29/64
A11605	6 1/4	4 5/16

## Motor Mounting Bracket for Rheem

### Features

- Butt-Mount Bracket
- Galvanized stamped-steel bracket mounts 5-5/8" diameter motors in Rheem-Ruud condensing units
- For NEMA 48 frame motors

Item ID	Brand	Replaces
A60306K	Packard	Rheem AS-55306-02

## FLEX Mounting Bracket for Rheem

### Application

Replaces mounting bracket on direct-drive blowers in Rheem furnaces

### Features

- Torsion-Flex Bracket Kit
- Includes 4 brackets and 8 mounting screws

Item ID	Brand	Replaces
A61698K	Packard	Rheem AE-61698-01 AE-61698-02

## Mounting Kit

### Features

- Holes for 4.4" and 5.6" diameter motors
- One kit will adapt both ends of motor for base mounting

Item ID	Brand
KIT200	Fasco

## Unit Bearing Motor Bracket

### Features

- Adjustable for motor shaft height 4-1/8" to 5-3/8"
- Includes 2 studs and bracket

Item ID	Brand
A68004	Packard

## Motor Bracket

### Features

- Bracket for 48 Frame Motor in York Units
- 5.5 mounting bracket
- 11 bolt circle diameter
- Kit includes: bracket with 3 welded legs, rubber grommets and mounting hardware

Item ID	Brand	Replaces
A60459	Packard	York 326-31459-000 York 02626372000, York 37308073700, York 3730807300

## Evergreen Belly Band Mounting Kit

Item ID	Mounting I.D. (In.)
5K003	10
5K004	11
5K005	13

## Fasco Bases

- NOTE: The base numbering system uses the first two numbers to indicate shaft height (30 is 3.0" and 35 is 3.5") and the last three numbers represent distance between cradle arms (386 is 3.86" etc.)
- Example: B35417 has a 3.5" shaft height and 4.17" cradle base
- To achieve the shaft height listed, the 2 1/2" diameter rings must be used
- \*B dimension is the mounting dimension between mounting rings, center to center

Cradle Base "B" Dimension	3.54	3.86	4.08	4.17	4.35	4.61	4.79	4.92	5.17	5.42	5.58	5.95	7.05
3" Shaft Height	B30354	B30386	B30408	—	B30435	B30461	B30479	B30492	B30517	B30542	B30558	B30595	B30705
3 1/2" Shaft Height	B35354	B35386	B35408	B35417	B35435	B35461	B35479	B35492	B35517	B35542	B35558	B35595	B35705

## Condenser Fan Rainshield

### Features

- Fits NEMA 42, 48 or 56 frame motors
- Disc Type

Item ID	Dimensions (In.)	
	Bore Dia.	O.D.
A61000	1/2	6.88
A61056	5/8	6.88

## Condenser Fan Rainshield Deep Dish Style

### Features

- Made of phenolic with internal cooling fins for increased motor efficiency

Item ID	Dimensions (In.)	
	Bore Dia.	O.D.
A80105	1/2	7

## Rainshields - Plastic Deep Dish Style

### Application

Fits NEMA 42, 48 or 56 frame motors

Item ID	Dimensions (In.)	
	Bore Dia.	O.D.
1411A	1/2	7
1412A	5/8	7

## Shaft Extension Kits

### Features

- Includes shaft coupler & shaft

Item ID	Diameter	Length
A61308K	1/4"	4 1/2"
A61310K	5/16"	4 1/2"
A61475K	1/2"	4 1/2"

## Shafts

### Features

- SAE 1018 Cold Rolled Steel
- Ground and Polished

Item ID	Diameter (In.)	Length (In.)
S38220501	5/8	20
S38209601	3/4	20
S38269301	3/4	35
S38209501	1	25
S38249201	1	35

## Rubber Grommet Kit

### Features

- Used for 3/4 inch slots. Sheet metal screws and sleeves included. 3 per package.

Item ID	Brand
A60049K	Packard

## Rubber Grommet Kit

### Features

- Used for 1/2 inch slots. 6 per package.

Item ID	Brand
A60047K	Packard

## Resilient Mounting Rings

**Application**

For Mounting 48 Frame Motors in Rheem Condenser Units

**Features**

- 2 per package

Item ID	Hub Ring Diameter (in.)
1182A	2 1/2

Item ID	Hub Ring Diameter (in.)
1220A	2 1/4
1255A	1 3/4

## Rubber Vibration Insulators

**Application**

Eliminates noise and excessive vibration. Used for motors, compressors, fans, pumps, etc.

**Features**

- Used on Coleman motors
- 4 per package

Item ID	Stud Dimension (In.)
A61519K	3/8 x 8-32 x 3/8

## End Frame Length Adapter Kit

Item ID: 615059-001

**Features**

- Use on 5" & 5 1/2" Century-extended through bolt motors to gain additional length to fit in old base
- Kit contains adapter plate with mounting ring, 4 split rings, 8 nuts and 4 lock washers
- Fits 5" motors with a 90 degree bolt pattern and 5 1/2" motors with 60-120 degree and 90 degree bolt patterns

## Rubber Vibration Insulators

**Application**

Eliminates noise and excessive vibration. Used for motors, compressors, fans, pumps, etc.

**Features**

- 4 per package

Item ID	Dimension (In.)			
	A-Insulator Diameter	B-Screw Diameter	C-Insulator Width	D-Screw Length
A67804K	1	5/16	1	5/8
A67805K	1	1/4	3/4	1/2

## Rheem Mounting Cables

**Features**

- 4 per package

Item ID	Length (In.)	For Motor H.P.
A60325K	3 1/4	1/6
A60350K	3 1/2	1/4

## Speed Controls

### Features

- Solid State. Infinitely variable adjustment for single speed fan and blowers, kitchen appliances, etc.
- Use only with shaded pole and PSC motors
- UL Listed

Item ID	Max Amps	Volts	Mounting	Size (In.)
1233A	5	120	Wall	4 1/4 x 2
1234A	4	120	Panel	
1407A	5	240	Wall	4 1/4 x 2
1408A	10	120	Wall	4 1/2 x 4 1/2

## Conduit Box

### Application

For universal design motors with conduit connector holes only

### Features

- Mounts on one of the extended motor stud bolts

Item ID	Motor Diameter (In.)
KIT142	3.3
KIT144	4.4-5.0-5.6

## Conduit Kit

### Features

- 3/8" Conduit Connector
- Allen Stevens type, complete with mounting screws
- Packaged three per kit

Item ID	Brand
A60102	Packard

## Conduit Fitting

### Application

For 4 5/16" diameter motors

### Features

- Two-Piece—Stamped Steel 5 Pack

Item ID	Brand
1202A	Century

## 90 Degree Plug and Cord

### Features

- Used with unit bearing motors: plug and cord assembly
- UL recognized

Item ID

**PLUG018**

Length (In.)

25

## Straight Plug and Cord

### Features

- Used with unit bearing motors: plug and cord assembly
- UL recognized

## Anti-Wind Brakes

### Features

- Used to stop wind milling of rooftop motors

Item ID

**A60012**

Diameter (In.)

1/2

**A60058**

5/8

## Pitch Gauge

### Features

- To aid in determining pitch of the fan blade

Item ID

**PG5099801**

Brand

Packard

## Fan Blade & Blower Wheel Puller

### Features

- Max depth of 2.4 inches

### Application

Assists in the removal of a fan blade or blower wheel from a motor shaft

Item ID

**A89000**

Brand

Packard

## Capacitor Mounting Kit

### Features

- Bracket dimension: 2 1/8" x 1 1/4"
- Cover dimension: 1 5/8"

Item ID

**A60010**

Brand

Packard

## Cap Guard

### Features

- Weather proofs capacitor connections by simply sliding on to the capacitor
- Fits oval caps 2 thru 17.5MFD 370V and 2 thru 12.5MFD 440V
- Sheet metal screws included

Item ID	Brand
A60000	Packard

## Capacitor Brackets

### Features

- For motor start capacitors
- 5 per package

Item ID	Capacitor Length (In.)
A76501	4 3/8
A76502	3 3/8
A76503	2 3/4

## Capacitor Brackets

### Features

- For round motor run capacitors
- 5 per package

Item ID	Diameter (In.)
A75400	1 3/4
A75500	2
A75600	2 1/2

### Features

- For oval motor run capacitors
- 5 per package

Item ID	Dimensions (In.) Width x Depth
A75100	1 5/16 x 2 5/32
A75200	1 29/32 x 2 29/32
A75300	1 31/32 X 3 21/32

## Capacitor End Caps - Top Lead Hole

### Features

- For motor start capacitors
- Leads exit through bracket
- 5 per package

Item ID	Diameter (In.)
A76611	1 7/16
A76612	1 13/16
A76613	2 1/16
A76614	2 9/16

## Capacitor End Caps - Bottom Lead Hole

### Features

- For motor start capacitors
- Leads exit opposite bracket
- 5 per package

Item ID	Diameter (In.)
A76601	1 7/16
A76602	1 13/16
A76603	2 1/16
A76604	2 9/16

## Capacitor Jumpers

### Features

- With 1/4" female terminals
- 10 per package

Item ID	Length (In.)
A63004	4
A63006	6

## Capacitor Resistor With 1/4" Female Terminals

### Features

- With 1/4" female terminals
- 10 per package

Item ID	OHMS	Watts
A63106	15000	2

## Capacitor Resistor

### Features

- 10 per package

Item ID	OHMS	Watts
A63105	15000	2

## Rubber Boots

### Features

- Lead protectors for motor run capacitors
- 5 per package

Item ID	Hole Location
A76000	1 Hole on End
A76001	1 Hole on Top
A76002	2 Hole on Top
A76003	3 Hole on Side

## Digital Capacitor Tester

### Features

- Range 2 MFD to 2000 MFD
- Accuracy  $\pm 5\%$
- Color coded test leads
- Insulated rubber casing
- 9 Volt battery included
- Fuse protected

Item ID	Brand
CT1	Packard

I OWN  
PACKARD!

*I'm proud to be a Packard employee owner...*

“ because I know that my contributions, and those of everyone at Packard, help our customers develop and maintain true partnerships with us. ”

## Fin Comb

### Application

Cleans and straightens fins

### Features

- Adjustable to 4 sizes per wrench
- Stainless steel teeth
- Cushioned handle
- Reversible

Item ID	Brand
PFC550	Packard

## Sand Screen

### Application

Used in preparation for brazing, soldering and epoxy repairs

Item ID	Roll Size
A52005	1 1/2" x 5 Yards
A52008	1 1/2" x 2 Yards
A52010	1 1/2" x 10 Yards
A52025	1 1/2" x 25 Yards

## Heat Gun

### Application

Used to defrost coils and frozen water pipes. To strip paint, remove adhesives, and many other uses.

### Features

- 120 Volt AC • 12 Amps • 4 tips included
- Double insulated • UL listed
- Low setting 750 Watts
- High setting 1500 Watts

Item ID	Brand
HG1000	Packard

## Hex Bit

Item ID	Length (In.)
PHB316	3/16

## Ratchet Wrench

### Features

- Reversible

Item ID	Square Size (In.)
PRW516	1/4-3/8-3/16-5/16

**What's inside matters  
when it comes to HVACR...**

...even the finishing touches.

## Caulk

### Features

- Sold in cases of 12

Item ID	Type
PS9980	Silicone, Aluminum Caulk in a 10.1 oz. tube
PS9981	Multipurpose Silicone, White in a 10.1 oz. tube
PS9982	Clear Silicone Caulk in a 10.1 Oz Tube
PS9983	High-Temp Red Caulk in a 10.1 Oz Tube

## TechTip >>>

from Packard Academy

**JOEY'S TIP**  
Joseph Laminack  
Product Engineer

To maximize air delivery, caulk should be used to seal joints and connections in air handling equipment and ductwork. Sealing joints and connections will also help to eliminate annoying air noise that can occur when air passes through a joint. The caulk will also help in keeping water out of the system.

### Motor Data Request

\* REQUIRED

Company/Acct#	*	_____
Contact/Branch Location	*	_____
Phone/Email	*	_____
Motor Application <small>(EX. Blower, Evaporator, Condensing Fan, Ventilation Fan)</small>	*	_____
Manufacturer	*	_____
Model#	*	_____
Serial#		_____
Horsepower	*	_____
Voltage, Hertz and Phase <small>(EX. 208/230V 60Hz 1PH, 220/240V 50Hz 3PH)</small>	*	_____
RPM	*	_____
AMPS	*	_____
Speed Taps		_____
Frame		_____
Enclosure		_____
Shaft Dimension	*	_____
Mounting Type	*	_____
Bearing Type		_____
Capacitor Rating		_____
What equipment did it come out of? <small>(EX. Home refriger., Restaurant side-by-side refriger., Residential cond. unit, Refriger. condensing unit)</small>	*	_____

**Notes:**

## Kelvion Request Form

Confidential

To obtain a quotation for your replacement product, give as much data as possible and e-mail/fax the completed questionnaire to Packard. Fax 770-427-5140, email customerservice@packardonline.com

Company _____	Contact: _____
Address _____	Title: _____
_____	Phone: _____
City _____	Fax: _____
State, Zip _____	Email: _____

**Application:** \_\_\_\_\_  
 (Example: Evaporator, Condenser, Subcooler, ETC.)

Application Data (specify if °C)	Hot Side	Cold Side
Name of Fluid*		
Rate of Flow* (GPM)		
Entering Fluid Temp* (°F)		
Leaving Fluid Temp (°F)		
Maximum Permissible Pressure Drop (PSI)		
Target Evaporator Temp/Design Pressure* (°F/PSI)		
Superheat (°F)		
Load (Btu/H)*		
Maximum Working Pressure (PSI)		
Target Condensing Temperature* (°F)		
Gas Entering Temperature (°F)		
Subcooling (°F)		
Fluid Fouling Factor (h•ft <sup>2</sup> •°F/Btu)		

Need at least 5 data points. Items marked with \* must be filled in. (If applicable to application desired.)

## Compressor/Condensing Unit Request Form

### Compressor/Condensing Unit Data Request

**\*REQUIRED**

Company/Acct#	*	_____
Contact/Branch Location	*	_____
Phone/Email	*	_____
Compressor/Condenser	*	_____
Manufacturer:		_____
Model#	*	_____
Serial#		_____
Code/BOM#		_____
Voltage, Hertz and Phase (EX. 208/230V 60Hz 1PH, 220/240V 50Hz 3PH)	*	_____
Current Refrigerant	*	_____
Alternative Refrigerant (If changing refrigerant)		_____
Box Temperature (Low -10°F/0°F, Med 30°F/35°F, High 55°F +)	*	_____
<b>OR</b>		
Evaporator Temperature (Low -20°F/-10°F, Med 20°F/25°F, High 45°F +)		_____
What equipment did it come out of? (EX. Home refrig., Restaurant side-by-side refrig., Residential cond. unit, Refrig. condensing unit)	*	_____

**Notes:**

## Aftermarket Terms and Conditions

---

1. Prices are those in effect at time of shipment. Prices are subject to change without notice.
2. Minimum order requirement is \$25.00.
3. All shipments are F.O.B. shipping point.
4. Wholesale single release orders of \$2000.00 or more receive prepaid freight to the first destination within the continental U.S. Method of shipment is at the discretion of Packard. Orders less than \$2000.00 will be shipped freight prepaid with the freight charge added to the invoice. If the customer specifies the carrier on a charge freight order, the order will be shipped freight collect.
5. Air shipment or other premium shipping method may be requested at the customer's expense.
6. Claims for shortages and damages must be reported within five business days following the date of delivery. Shortages and/or other visible damages to the exterior packaging must also be noted on the bill of lading. Claims are subject to count/inspection. Damaged product is to be kept for 90 days after claim is reported unless otherwise directed by Packard.
7. Terms: Net 30 to all customers having approved credit standing.
8. Return authorization must be obtained from Packard by the wholesaler before returning any products. Merchandise cannot be returned without a return authorization form.
9. Returnable items will receive a 20% - 50% restocking charge, depending on manufacturer. Customer pays return freight. All returns must be within 30 days from date of shipment and be new, in original packaging, clean and unmarked. Non-stock specialty items are not returnable.
10. Possession of this catalog does not constitute an offer to sell.

## Warranty Procedures

---

1. All items sold by Packard, Inc. are warranted against defects in workmanship or materials under normal use for a period of one (1) year. Products are covered for up to a maximum of two (2) years from the manufacturer's date code on the product or one year after installation, whichever comes first.
2. No warranty is made as to the fitness of vendor's products for a purpose. Buyer acknowledges that it alone has determined that the goods purchased will suitably meet the requirements of their intended use. In no event will Packard be liable for consequential, incidental or other damages.
3. For products other than those listed below, please MAIL the original nameplate (label or sticker) for each item. Copies of labels will NOT be accepted. Please do NOT fax or email labels!
4. A reason for failure MUST be provided for each item on the warranty claim.
5. Credits are NOT to be taken by customer until merchandise or original nameplate has been received by Packard, Inc. and credit is issued.
6. Credit will be issued upon verification of purchase history for ORIGINAL labels dated within manufacturing date code requirements.
7. Do not field scrap products until credit has been issued.
8. In the event Packard or the manufacturer requires evaluation of warranty items, Packard will issue a return authorization form. Do not return warranty items unless requested.
9. Please contact Packard Warranty for these products prior to mailing claims.

\* Danfoss, Embraco, Bristol, LG and SECOP compressors and condensing units require a warranty request form (available on Packard's website).

\* ICM controls and Kelvion (formerly FlatPlate and GEA) heat exchangers must be returned to the factory for warranty evaluation, so please call Packard Warranty for return authorization.

**PACKARDONLINE.COM**

With over 60 years of experience in compressor technologies, we have strengthened our position as a performance leader with the acquisition by Nidec Corporation. Under the Nidec Corporation, we will now be able to utilize the

synergies that exist between motor and advanced compressor technologies, further strengthening our commitment to be the leader in advanced compressor technologies around the world. Welcome to Nidec Global Appliance.

**Nidec**  
All for dreams

**SECOP**

# LOOKING FOR LIKE-FOR-LIKE? LOOK HERE!

KEEP 'IN IT COOL! WITH CONSCIENCE!

Both OEM as well as Service Professionals will find the perfect fit "Like-For-Like" in the Nidec Global Appliance compressor line.

Nidec Global Appliance is achieving the perfect balance between performances and cost in the development of its new families of environmentally friendly compressors.

Since the divestiture from Danfoss in 2010, Nidec Global Appliance has invested millions of dollars developing new products utilizing the environmentally friendly refrigerants, launching innovative variable speed technology, as well as upgrading the current portfolio. With a focus on single piston reciprocating compressors, we are delivering superior compressors to the market. This includes upgraded features such as copper tubes and mounted electrical components. These improvements were implemented to save you time and money.
